Bertini S.	Chancellor
Rodrigo del Fresno	Auxiliary Technical

**PROCEEDINGS AGAINST - AMANDA MARIE KNOX + 1 -**

PRESIDENT - At 9.40 am is called the process of the Court of Assizes, the hearing on April 23 2009, are present for the office of the prosecutor Dr Mignini and Dr. Comodi. Also found both defendants assisted by their lawyers, the lawyers in place Rocchi Bongiorno Advocate and Advocate Maori for Raffaele Sollecito, and Dalla Vedova Ghirga Lawyers for Amanda Knox. It is this also the interpreter. Parties are also incorporated in the person of the Civil defense, the lawyers Perna, even in place of Advocate Maresca, the lawyer instead Bartolucci Advocate Pacelli as delegation and the Attorney Magnini.

It is acknowledged that it received a note from the instance.

DEFENCE - AVV. MAORI - I have already given copies to both the prosecution and to civil parties that their colleagues.

PRESIDENT - The injury was known to the defense of Raffaele Sollecito on the intercepted conversations.

CIVIL PARTY - President, excuse me, in opening, as I early, I wanted to renew the request for release of the house on Via Della Pergola, was completed the survey, the reasons are the ones I already mentioned in the previous

application received.

PRESIDENT - This instance of release from seizure?

PROSECUTOR - DR COMODI - The prosecutor at this point, expressing a favorable opinion.

PRESIDENT - The other parts?

DEFENCE - AVV. MAORI - We abide by the decision of the Court.

## **DECISION**

The Court of Assizes on the application for release from seizure, taking into account the work undertaken and the evidence collected, noted the favorable opinion from the office of the prosecutor, also took note of the points deducted in today's hearing that previously defended by the accused; no longer viewed as necessary to the seizure of the Via Della Pergola 7, and the objects that are still in it, has the release from seizure and restitution of the property to the beneficiaries and the objects found there. Delegated the enforcement personnel who have custody of the property and the objects known.

PRESIDENT - The prosecutor wanted to ...

DEFENCE - AVV. MAORI - Excuse me President, before he takes the word to the Public Ministry, I would just like to point out who is here with us also our consultant, Dr. Adriano Tagliabracci, forensic genetic counselor.

PROSECUTOR - DR COMODI - So the prosecution produced as by order of this Court at the last hearing, the booklets relating to requests, authorizations and extensions to the decrees of the wiretaps and the inherent environmental RIT of which was sought transcription.

PRESIDENT - Okay. Such acts are acquired for the purposes already simplified the previous decision concerning the request

for transcripts of conversations and are available to the parties. The Court reserves the right to determine on request (deregistration) to the next hearing scheduled for May 1'8, it also meets the requirement of being in a petition filed in Court on 22 April 2009 by the Defense Raffaele Sollecito. We give the first heads.

**DESPOSITION OF THE WITNESS - INTINI ALBERTO -**

THE WITNESS, a warning under ART. 497 CODE OF PROCEDURE CRIMINAL, THE LAW OF RITUAL FORMULA.

GENERAL: Alberto Intini, head of the State Police, currently Director of Scientific Police of the State Police. Born August 29, 1956 in Rome.

PRESIDENT - Please prosecutor.

**PROSECUTOR - DR COMODI**

QUESTION - You said that it is Director of the Scientific Police in Rome and was also at the time of the murder of which we are concerned?

ANSWER - Yes

QUESTION - So that was invested in its quality of investigations into the murder itself.

ANSWER - Yes

QUESTION - Do you want to report to the Court, making a picture beforehand of what is precisely the service of the Scientific Police, the sectors that make up and then the mode of your presentation, either generally or in this case, also with reference to the relationship between Local Police Science, and Perugia, and your department.

ANSWER - The Scientific Police is a branch of the State Police that historically, more than one hundred years, is occupied with say technical - related scientific

investigation. The structure that I lead is a national organization that has a joint hierarchical regional and provincial level. The Scientific Police Service, as I said, is based in Rome, is inserted in the direction of the central crime of the State Police, the Department of Public Safety, so it is a joint central department, but unlike any other, has also an operational value because the Inside has four thematic divisions and a number of sections in the various aspects of criminology, and various fields of chemistry, physics, biology, ballistics, fingerprinting, etc., obviously with the laboratory specialists from all sectors. So besides having coordination tasks of the Scientific Police nationwide, has its own autonomy technical - scientific, therefore, to give support at the national level in all the activities because those are the ones operating in the territory at the provincial and regional level. Every province, every police station there is a toilet Provincial Police Science, precisely as in Perugia, and the provincial cabinet in a region are coordinated by the respective regional toilets, which are 14, and the joints that are most relevant. So to summarize this discussion, the immediate response is made plain by the provincial cabinets at each location where in fact the investigation office moves to activities of the Judicial Police, where there are more demands, not so much professionalism as well as equipment support staff number of involved regional toilets. The central service areas where it will carry on activities that are more specialized, just the service, where there are some cases even more relevant at the national level. In this case only the personnel of the Provincial Cabinet of Perugia, who spoke and did all the

technical activities - scientific, the intervention of the service was determined on the basis of precisely this function. Since 2005 within the service has been established the ERT, we called this symbol with a structure that is a team of research experiments traces. Basically because of the high professionalism, but as I said, especially for equipment which is fitted superspecialistiche service, this team is made up of all sectors ... in theory by all sectors involved in the practical skills needed by the individual case. This team of experts obviously composed of specialists in various fields has already occurred since 2005 in various parts of Italy, in various situations in which criminal acts of some importance in fact showed the appropriateness of intervention by higher level and more specialist. On this occasion, I remember there was, as we are informed at the center of all significant events in which the scientific police action, then I come to know directly, I and my staff, and then again when it did, when it was discovered the murder issue, the service of the Scientific Police was informed. In particular, if I remember correctly, it was the province of Perugia's cabinet colleagues, given the importance of the case that showed the seriousness of the crime, the brutality of the crime, and also a number of elements that were perceived the crime scene, have the opportunity to undergo an operation in more than just the service and help was given that it involved the ERT that occasion, just attagliata type of murder, provided the ad hoc profiles. For example, the ballistics expert was not sent because it looked like a murder committed with firearms and not so the team was composed, was composed and was sent with the ad hoc profiles with ecperi of inspection equipment and capable

of performing the inspection also in terms of technology and then use the results and appropriate tools, a biologist, doctor of biology, a chemist, a doctor in chemistry for the exaltation of the fingerprints, then later for the reconstruction of a physical dynamic. That is not normal and you know this because I want to say about the organic structure is obviously an organic standard, which can not be numerically and qualitatively the same level in all locations, a visit which involves murder, the police team scientific, three graduates in three different disciplines is not a normal thing. I must say, we have been fortunate over all, and we must also emphasize the sensitivity, perception of the operators of the Cabinet Scientific Police of Perugia, who immediately was then evaluated as the facts, unfortunately, have highlighted the importance of this case and therefore the Police Scientific has been put on the field of professionalism that I can say with confidence and even humility, are set at national level in different sectors. So let's say the full potential that unfortunately not all situations are unable to deploy, because not always you imagine then the relevance of a case. I do not know if this summary may be sufficient, beyond a few specific questions.

QUESTION - Yes, if we want to continue to report to the Court how the intervention was organized, and what she knew personally, that is, what was your role, if purely organizational, if it intervened on the spot or if he has coordinated and organized and which, in this case, and if the case meets the general rules, which has been the interaction between the Cabinet of Scientific Police of Perugia and then the ERT who spoke, I guess, then. If we want to give a chronological picture of the interventions.

ANSWER - I remember it was November 2, around lunchtime, now exact times ... was announced in Rome this event, the unveiling of this event, the various stages which led to the intervention, the first action of the operators of Police of Perugia and activation, also facilitated by a closeness between Rome and Perugia, the activation This ERT team was fairly straight already around the first 17 elements. Why then precisely urgency have also moved, do not say individually, but in several installments, the first operators to the Scientific Police in Rome, already at 17 o'clock came to the area. There is and there was a distinction of activities and tasks between the personnel of the Cabinet of Perugia, who had already launched an initial examination and the ERT team of service because the division of labor in our business is determined by the specialist fields .The sopralluoghista makes the activity of inspection documenting the various stages of the same survey, the research dattiloscopista fingerprints, a research biologist at other tracks, so everyone has a role determined by its professionalism and its specific sector. Thus the interaction between the provincial cabinet of Perugia and the ERD has been working in common, so there was a difference also in this first inspection level is that in the later stages has always worked together; the toilet provincial because it has jurisdiction in the area and has played together all the activities at this point, therefore, more support, interaction of the activity , the staff of the place. First indications were given on the occasion, I remember, as of course you always been to make the crime scene was totally isolated and that the activity of the first operators of Scientific Police of Perugia was limited to a mere documentation of the scene of the crime

itself waiting for the intervention of specialists awio concretely detailed site survey and then do not let anyone who could change the scene was. So it is with the intervention of the ERT team that started the survey in its various aspects, in its various stages unless this early stage to documentation of staff.

QUESTION - What do you mean by documentation? If you want to explain to the Court.

ANSWER - Historically also, say the educational field, the survey is divided into a series of major activities which are photographic, fingerprint, descriptive and planimetric, are the four areas. The operator then operates the forensics on the scene and has to make a description of the scene where he is, then how do I access, it is composed, as it is formed, then a descriptive level of relationship, this description must or may bring in a plant where Serbs where planimetric measurements may one day serve to highlight the distances of various objects or situations that are found at the crime scene, and then photo videofotografica obvious at this point because the first, the activity of fotosegnalamento , a survey of science is dated from the early 900, is born from 1903 to the Scientific Police, and in these 106 years has obviously been huge development facilities as well as methods and techniques. So now for a couple of decades, in addition to shooting a video response also becomes the scene of the crime because of documented trace of any situation. In this story, in this activity intervention ERT survey technique could provide in this activity and descriptive video documentation as an added value of being a device that only highly specialized and can not be used everywhere every day, in quest ' personal visits at expert

who spoke took him, and is the Sferon, is a fixed station that stands in a field, on a tripod, like a large camera, which scans the environment. That is instead the operator to turn around and do a series of photos that can never be complete with all the environment in its cubic form obviously, 360 degrees horizontally and even in height with photo scans completely, then a photograph of ' whole environment and that environment that allows scanning to see him back later in all the details as if one fell within the crime scene. So with this tool we could and we could fall again, virtually of course, how many times we wanted in the murder room, turning the computer, the computer mouse in any direction of the room, zooming in for details and perhaps noting the aspects that the first survey usually fails to show in its entirety. The first survey aims to document as well as to collect all the tracks, all the elements that can then serve as a technical and scientific development to provide the answers of course also of probative value. It is obvious that in a first visit is normal, it is common, it is always useless then acquire different findings are unnecessary and could even happen that are not acquired for important findings that then subsequently appear. So this tool is important to get beyond the documentation videofotografica which is partial because it is led by a man with his limitations of perspective, obviously, and movement on stage, here gives us a record total, the whole environment, with the opportunity to come back in every room, so we had obtained this documentation of the entire apartment with the possibility of returning at any time even going to zoom in corners, the places of the apartment and re-verify the situations or people like me who is not

been on the rise, precisely because I have personal envoy, I followed, I coordinated, I supported their activities in all the months of investigations, however, I have not carried out direct on-site inspection, but I have had cognizance of the reality , obviously like all parts of the process, the scene of the crime that is important to have a full knowledge of the fact then.

QUESTION - President if and when the Court considers it we can make you see just the images through this technique, this Sferon, I do not know if the equipment or technique, the Sferon is the name of what?

ANSWER - The Sferon is the name of the equipment.

QUESTION - Here's the equipment.

ANSWER - imagine how those stand, one of the two stands holding the screen, a station which has the above, a camera of this size that pretty much say does a scan of the entire volume with a series of photos which then binds the computer, as if it were a movie.

QUESTION - It is a witness, I would like perb attivasse Sferon just that.

ANSWER - Yes, I can handle myself.

CIVIL PARTY - President, I apologize if I'm intruding, but if we start the production of the videos I renew the instance of closed doors that I have not formalized in writing because it would have been identical to those already presented, of course, in the manner and time that the Court may deem fit, for the projection of video and / or photos. Thanks.

PRESIDENT - On this instance?

CIVIL PARTY - Obviously for the same reasons already mentioned several times in the most excellent Court.

PRESIDENT - On this instance the other parts?

DEFENCE - AVV. MAORI - Nothing we go back and look at what we had

already indicated at the last hearing.

PROSECUTOR - DR COMODI - we too forgive, that we agree with the Civil Part. Let's say for a moment when I wanted to show the operation of this system, then maybe we will see in more detail when we hear the operators.

PRESIDENT - On this the Court did not even know the images that they say will be screened and therefore does not know the contents of the same or the relevance of the images them as regards ...

PROSECUTOR - DR COMODI - Watch Doctor do not see it at the crime scene.

PRESIDENT - In terms of the instance in question, but maybe you do when this will be projected images depicting the scene of the crime with reference to the vision of the victim ...

ANSWER - No, I take the kitchen which is an anonymous room.

PRESIDENT - For those images so they say now, when these images are projected there will be behind closed doors.

ANSWER - Here I am with the mouse ...

DEFENCE - AVV. MAORI - Excuse me doctor, these are images that we do not know if we were ever filed by the prosecutor ...

PROSECUTOR - DR COMODI - Why not?!

DEFENCE - AVV. MAORI - if we can explain the prosecutor in which pleadings have been acquired because we do not know, we have never seen, we never had any acquaintance with that image, so if we want to explain.

PROSECUTOR - DR COMODI - This is the documentation relating to the Scientific Police.

PRESIDENT - So I'm already on record.

DEFENCE - AVV. Ghirga - No, no, not anywhere, we take note of us now.

DEFENCE - AVV. MAORI - at this time 'he noted.

DEFENCE - AVV. Ghirga - The movie of 2 to 3 November, the first access of the Provincial Police, Scientific, and all the murder house, this is what is in documents filed with knowledge?

ANSWER. - No, no, this is a further, there are photos and movies, there are videos of the inspection, this is a value-added is the value of the site inspection by staff of Perugia and our staff of Rome, was still performed in its dynamic activity in various parts of the inspection. This is a multiple of the scene as a whole for the reasons you need to also revisit certain situations.

DEFENCE - AVV. Ghirga - not an act of the process, even in the acts of the Prosecutor will we know exists, then we object.

PROSECUTOR - DR COMODI - At I can not answer, but it was also a tool used exclusively for the consumption of the Scientific Police are listening to the staff of the Scientific Police has also used this additional tool that is not anything different because the house fortunately the Court has the view that we are not filming a different house, so now it dateremo with staff who have worked with this tool because practically Dr. Intini would not be able to report the date or the time or the persons that made this ...

ANSWER - It's been done on 2, the day of the inspection, at first, but who did it ...

QUESTION - Then we'll ask who did it, when did it and what filming concurrently, but there is nothing sensational, is not a scoop, not a surprise test, is simply a different view, As explained Dr. Intini, so at 360 degrees of the same scene shot with a traditional camera.

PRESIDENT - He reserves the Prosecution to make it available.

DEFENCE - AVV. MAORI - We are opposed, however, because Mr. President is a clear and flagrant violation of the right of defense, as this type of movie, which of course we can well understand the form and manner for which it was done and we can also share, however, had to be filed and the act of filing must be notified to the parties, which to us, at least to our defense and I think the defense of Knox, was ever notified. So we believe it to be experienced first formal activities provided by the code, and then the notification of filing of this movie in the files of the Public Ministry and Then later you will decide whether or not visible and projectable, then we object.

PROSECUTOR - DR COMODI - The notice of filing in the course of preliminary investigation was not necessary because obviously neither expected nor was investigating an activity so there was no notice of filing that would be ...

DEFENCE - AVV. Ghirga - Excuse me, I wanted to complement, not take away was the word ...

PRESIDENT - So Defence is opposed to what?

DEFENCE - AVV. MAORI - the vision that was never made aware of this type of movie defenses.

DEFENCE - AVV. Ghirga - It is clear that acts subsequent to a 415! Clearly, if we believe this act is not understood in all the documents filed pursuant to a further 415 new evidence or activities conducted by the Public Ministry, in this case before I get it, but after the decree ordering judgment, However, this type of acquisition is a regulation in the 430 as my colleague says, at least I think, even if it was done before I guess, because I feel that says 2 to 3 November 2007, but because they have a destiny of the case correctly, in our opinion, not having

been deposited during the whole hearing are subsequent acts. We see them now, I guess that regulated this type of acquisition and production under 430, like other pieces of new evidence the prosecution took place after the decree of trial. I guess this is also the norm.

DEFENCE - AVV. DALLA VEDOVA - In connection with these photographs, because they actually are photographs, movies are not die, we already know, because it was deposited with a 415, a movie about 45 minutes, which again was done on day 2 .Then we oppose the examination as presented unless a prior examination of the document because we repeat this is new, we have not had cognizance during the investigation, we have not taken cognizance of a 415, we have no cognizance had then with the 'Further investigations then it seems to me that it is inappropriate for Defence to take cognizance of this document before having an examination at the hearing here, however I repeat that there is a movie of 2 November 2007 that I think will be viewed today.

PROSECUTOR - DR COMODI - I do not know, let's see. As the doctor Intini said this is nothing more than scanning photographs of the entire house and then especially the room where the murder was committed, scanning and reconstruction of these photos scanned in sequence through highly sophisticated equipment for which there is a sequence that allows an immediate view, three-dimensional images that were scanned. There are photos, it's as if I had offered to the Court, for example, to better facilitate the site visit to view the pictures in a collage that would have allowed, for example, simultaneously, to see the foot and the eye of Meredith, I do not know if I'll explain. This is nothing but a collage made so technologically advanced, is not new

evidence, photos are not different from those that the defense was available, the 430 has nothing to do because there is an additional investigation was made the day the police discovered the corpse, the day when the survey began. It provides the Court, for convenience, a visual way different, more convenient, photos that are available to the defense. On the other hand I want to say the notice when it should have been done? Ever, precisely because it is not an additional investigation and in the course of investigations, the Court knows better than I the Code of Criminal Procedure so I will not dwell more.

CIVIL PARTY - President 107 index in the file produced by the prosecution in the notice of termination of investigations is made available to the defenses of the entire business picture - made video playback ...

DEFENCE - AVV. Ghirga - Other than this though!

CIVIL PARTY - if I can conclude!

PRESIDENT - Sorry, we avoid. Please, go on then.

CIVIL PARTY - I repeat, the entire documentation in particular the video footage, say, ordinary, not through Sferon, plus all the photos. At this point the text of today and the next relazioneranno hearings, there had been, I think, required by all parties to the original vision of video footage and made an ordinary in the ordinary way and on this point seems to me that the Court had decided, or was anyway already reserved at the entire video. The entire video, and we shall then direct the appreciation of the lyrics, covers, and is showing exactly the same photos and pictures of the house at that time made arrangements with different techniques, which I imagine that the doctor can respond only as a way technique because then he has not made him. So I think it is important to us now explain how

different techniques, ie how to set up and how it embodies the use of Sferon. Then with reference books, operators of Science, the Court will appreciate the identity of the vision and possibly even make this video available to all parties.

PROSECUTOR - DR COMODI - That is not a video.

CIVIL PARTY - Sorry, not a video, but a succession of pictures with Sferon.

### **DECISION**

THE COURT noted exceptions advanced by the defense, after hearing the clarifications made by the office of the prosecutor, also took note of the points deducted also from the Civil Party, given that the photos of them during the examination of the witness is Alberto Intini asked the vision does not appear to be any additional investigation activities, but the representation of the place already documented in the available documents by the parties, however, has reserved to proceed beyond the exclusion of the usability of photos that may result from a novum compared to what is already made available parts and save, in each case, within the limits mentioned, the applicability of Article 430 on the application to proceed in camera. Provides that this mode of conducting any hearing will be limited to the projection of images found on the body of the victim. To this end requires the prosecutor, and then to the other parties, to highlight the situation in the examination and cross examination in place so as to allow the subsequent conduct of the hearing indicated mode.

PRESIDENT - I pray.

PROSECUTOR - DR COMODI - As I anticipated, in fact, I asked the doctor only to anticipate the vision mode with this system, so we take a room is not affected by particular scenes. That's it.

ANSWER - We say, as has been mentioned, I am not a technician and then I mean in terms atecnici though understandable, as if it were connected across a series of photos, then a complete scanner and a This software system allows us makes the viewer of this video, said video improperly, can move the mouse in place, the room reviewing every detail. So whether you see it moving in all directions, this is the Sferon to be clear, this dish that is placed on a tripod and that makes this kind of ... Then you can, for example, magnifying details and makes us understand the detail of those images that are obviously digital. You see, we almost have to read the paintings in the next room. So it's definitely a tool not only for those who like me had not been on the scene and wanted to realize, but also for anyone and especially for those who were and who must make assessments of the evidence collected can go to review, that gives the idea of how this can be misleading when made on the spot checks, closed or even if it is outside the crime scene, totally missed the scene of the crime and then work on those elements captured in a single time on a viewed scene only a few hours. Sure, the place closed multiple-access, but most accesses cause even more chaos, more pollution, this is obvious and this is also an object of discussion of this and many other processes. This lets you get ten, hundred, a thousand times on a crime scene and see the details and today after two years, a year and a half, the Court itself can move beyond access that has already been done, however, in a later situation, well-

qualified, it can move beyond this I am doing to see the kitchen to see what was the crime scene when the staff of the Scientific Police intervened. So let's say a scene where there was almost no pollution-only access of the first operators to police, rescuers, the first intervention, then we say this is beyond, as explained by the prosecutor, a new indication or image elements that are not there, it gives a chance to revisit in detail a number of aspects that may be, that surely would have been lost under normal conditions; here, we read post-it on the refrigerator and served it on something, obviously seeing him in the office. That's why we have avoided the initial inspection of the November 2 to 3 to make additional access that would be needed, there are cases where you do 3 - 4 - 5, 10 also access the crime scene because there is a need to develop investigatory pending review or go check out some things. In this episode we we avoided specifically not to go further to take in the scene of the crime, we have placed at a distance of about two months, December 18, however in these two months we had the opportunity to enter hundreds of times in a virtual crime scene. This tool is of great utility for us definitely.

QUESTION - Doctor just said that she has never done so and that access has coordinated the activities having practically getting news and results from the lab staff intervened.

ANSWER - Yes

QUESTION - But I want to ask you something else, and so far I think it's the last question, there are protocols that the scientific police must follow in order to successfully perform the inspections, surveys etc. etc., there are specific criteria? What is the autonomy of the operators and which is also the directives that you can give, what value

do these protocols, if any, if there are written protocols, but if there is also dictated by protocol rules experience etc. ..

ANSWER - No doubt the staff of the Science that operates in a technical field can not follow scientific protocols, rules and techniques. The laboratory activities are exclusively carried out according to international scientific standards, laboratory activities, the place of the scientific process itself, the technical assessment - scientific activity that leads from an initial result of a process that must follow these protocols, these international standards. The activities at the crime scene in principle also follows the protocols; say in principle because every crime scene is different, ie, while the exaltation of a latent fingerprint on a glass object, or the extraction of profile of DNA from a blood trail are always equal and then to achieve the result you must follow a protocol with the international standards the crime scene is different from one another. So work in this area, then the technical inspection - with a scientific sort of check list also in American and British culture that we are accustomed, than the Italian one, to operate without improvisations, we are a bit 'more imaginative and also capable of initiative, the American culture in this activity tends to have checklists, protocols detailed in every situation. There are texts that indicate how you investigation for murder than robbery. The Italian culture a little 'escapes from this screen very hard, these trappings of a specific check list because we believe that every situation is different and what's being tied to the door steps required to lose maybe instead of the initiatives' experience of those working for years on

stage of crime can give this in general. The Police Scientific, I must say with great humility, but this is the story ...

PRESIDENT - There's a buzz too, here comes attenuated, but imagine ... if you can avoid it especially for the parts that are closer.

PROSECUTOR - DR COMODI - Even for the same witness, however.

PRESIDENT - Even for the same witness who will surely ...

PROSECUTOR - DR COMODI - Aila not help concentration.

PRESIDENT - We are more distant, but those closest to him feel more and more it is disturbed for the purposes of fairness. Please, go on then.

ANSWER - I would say though that this lack of (...) drives, or the detailed rules for each activity does not mean that there is an autonomy of the individual operator, absolutely, this investigation does not take place in the activity in general let alone in that technical - scientific. Moreover these rules, I say this with great humility, I'm a bit 'dictated by the Scientific Police, if we want the history of forensic science in Italy was played by the Scientific Police and as I said already created more than one hundred years ago and has operated in more than one hundred years these college together, so what are the forensic sciences in Italy the Scientific Police say that he lived, created, or not say certain ...

PRESIDENT - But to return to the question of the prosecutor.

ANSWER - There I was coming. That is to say that these rules obviously in the years this activity has become increasingly specialized, so relations, I said the national, international relations are also been crucial in recent decades. So for us it is already a reference to emphysema, would be the European network of forensic

science institutes. Periodically meet our experts in Europe with their colleagues in the Scientific Police, but also the university of forensic medicine, all institutions that deal with forensic science and that there is a field for every field of criminalistics, so there dattiloscopisti of the group, the group of ballistic, biologics, etc., then we follow these rules even international activity. The survey, to get real demand, following these rules there are rules that are good for every situation, the rules that you define in specific situations, basic rules and regulations of a second or third level, that is the goal of the operator to catalyze, photographing, freeze the crime scene without external interventions that are before this activity and then repertarla in the ways in which various objects, the various situations repertare can be acquired to be maintained and preserved. The personnel working in the Police Scientific awentizio is not personal and that comes from evening to morning starts doing this activity, is composed of technical roles, ie graduates, as I said before, in biology, physics, chemistry, engineering electronic or other related fields that enter in technical roles and are only technical activities, activities that are not ordinary police work and crime scenes and laboratories according to the standards of their studies and subsequent investigations, the master and other activity. The rest of the staff that Police personnel entered the structure of the Scientific Police after a course of four months, specializing in general and then in the time to specialize in andandosi sectors. So to conclude I would say that there is no initiative or autonomy of the individual that everyone wants to work as though there are not any catalogs or precise details of the check list that

can not take a step without the libretta tell you what to do.

PROSECUTOR - DR COMODI - But I guess there are tricks of the valid, that is to be followed on all occasions, starting from clothes.

ANSWER - Yes.

QUESTION - Maybe for you it will be something obvious, but I can assure you it is a topic that recurs often.

ANSWER - In fact, as I have said that the rules needed to achieve the aims of the survey are mainly those of the whole scene and crystallize before any items on the outside and get all 'the items acquired, non-removable videofotografica with documentation, as removable with material acquisition. The other rule of this fact the next step is to capture those elements that are not modified or damaged and then the important step, although it is less talk of conservation because it can be acquired in finding the best possible way, with the best techniques and attention and then stored in improperly maybe some temperatures, in some refrigerators or not transported by suitable means of storage and then the track is lost or deteriorates. It is obvious that to make the cleanest possible environment inspection professionals involved with the forensic suits and other devices which can minimize the pollution. I say reduce because it is impossible to speak of a possible total elimination of pollution, ie there is just human nature. Only by entering the scene of a crime, obviously in a house, opening the door already in theory you can pollute because there is an entry of external agents that can change, even moving with the wind or other agents that enter, so the same operator of Police Science is not a dragonfly flying across the room and not touch anything,

you have to move. Not to mention that there are necessary access to the scene of the crime, prior to our intervention at times, which are to aid, in some situations must necessarily intervene to check if there is one person and two if the person is wounded or dead and three if it is to be assisted or not. So we already take for granted the possible pollution, then it is obvious that access not be led to the interference of small businesses that may be polluting. Our mission is to minimize them assuming that there is a physiological minimum, the judge of this possible contamination is the result later, only after the result can tell us if our task was completed in incorrectly. It is not as important awedere the libretta, if you used a system or another, the important thing is to see the result. I can say that in this investigation if contamination means the entry of external agents outside of what the crime scene had to keep us in this inquiry will not ce n 'is not one. When our business is often frequently occurring trace operator, so much so that for example in technical highlighting and comparison of fingerprints there are two roads that it is in history, as well as the codes are shown: that of compared to that of suspicion and confrontation of exclusion. Who knows history knows that when the fingerprint is an impression found at a crime and should be attributed to a person first becomes an attempt to exclude the award and then to suspicion. That is, does this mean? Before going to see if the mark has left the author of a robbery in a house I have ruled out that that impression is one of the frequenters of the house and I have to be ruled out as an operator who also spoke . Sorry to say but unfortunately I'm not saying that is common but it happens that the operator, and operators

mean everyone, can be to the rescue, may be the cop who makes the inquiry, may also be the judge with all respect, inawertitamente anyone can leave a mark on his entering the crime scene. It is then encoded nell'attivi CT compared with that of the tracks from the first by exclusion, when it was found that the fingerprint is not recognized by one of those who live or frequent the home, there is an intervention that has worked is probably the imprint of the author, then you go for suspicion, or rather, now that we have the AFIS with the computer that we can identify the 'footprint. Consider as an annotation, to confirm that what I say, that in England, which historically has the first database of DNA from at least 2000, are seven or eight years that it has, and has something like 4 or 5 million records Today, there is a pre-database called Elimination Date Base which is a first step as a filter of biological trace that contains profiles of all operators of Police. That is to say that is normal, so normal that the pollution that is encoded in the Anglo-Saxon structures is a database, and also that we have obviously not yet in the manner of data, but banks say the archive, there is a database with genetic profiles of the operators of Police scientific work in that place. When the scene of a crime is found, a biological trace, extracted the DNA profile, before inserting it into the database to see who it is and then find any author, this profile is passed in this Elimination Date Base used to say "no, leave it alone because that is the operator X which has left at a crime scene, so it's not a trace, a genetic profile useful to the investigation." We unfortunately do not have a bank of DNA, however, our operators have released their genetic profile and when you do the activity is excluded from the

beginning that there is a profile identifiable with one of the operators, like fingerprints. It has happened many times to me to release my fingerprints and compare them by exclusion. That is to say that pollution, so if you want to call it, is not the same operator. I say that is physiological and it is frequently taken for granted and must be verified each time. In this investigation we have found fingerprint fingerprint, a genetic profile, an imprint of the shoes of actors on the police intervened. I think this is an objective fact, that I bring, that I record, a fact that attests action, now obviously do not want to heap praise excessively the work of my men, however, stating that work done with care, certainly not with levity, certainly not with non-compliance with the rules that the doctor indicated I think, the minimum essential rules of conduct valid always and evaluated on a case by case basis.

QUESTION - It is unusual that there are two investigations of the Scientific Police in a crime like this?

ANSWER - You are referring to visits at different times?

QUESTION - Yes, and also to the number.

ANSWER - I repeat, if we had not had the Sferon it we would have made at least six, seven or ten. Have you seen only in those few minutes that I have shown only one side of the kitchen that, as you all know, is in a whole apartment, where, beyond the scene of the crime, it is important to the whole outline, all that c ' you can find. Today I can say that there are probably elements there in that house that were not found, seen, because obviously it is impossible to have cognizance, recording every millimeter. So definitely a situation we would need several, on the order of at least a dozen operations, it is obvious

that any intervention would have to operate in a situation worse than before because any intervention would lead to pollution, a change of environment , we have instead focused on a second that for other 'has gone already knew where we wanted to get my hands. For example, I recall that on a smear of blood on the fingers of a wall the first evaluation of the biologist who told me was that of the blood sample to identify the genetic profile of the blood, then work in a quiet, normal. It is obvious that an investigation is thought that the victim and in fact it did, then did not respond useful for investigative purposes. In the view of evaluations linked Sferon it was thought that because we saw that the wall is rough, and since then the checker is in the first part where the tips had liquid blood was lighter, in the end where the fingertip is cleaned and determine rubbing the finger with the wall Dr. Stefanoni told me: "Here we could possibly find epithelial cell exfoliation of who now has swiped his hand on the wall", and so this was a goal in the second survey of 18 December. Dr. Stefanoni went to non-sampling on the blood of the strips, but the clean side below in the hope of finding the hypothesis of different tracks. This is because the approach in a hot scene of the crime can not be complete, because there is a range of information and because it operates without making too many assessments but also in offices, laboratories are doing.

QUESTION - No further questions for now.

CIVIL PARTY - no questions.

**DEFENCE - AVV. MAORI**

QUESTION - The few questions I would like to see, and as explained to us and how we know her in this case, although

the director of the Scientific Police followed him personally several times and came to Perugia to confront their public ministries, and has a knowledge ...

ANSWER - No, this ...

QUESTION - NO?

ANSWER - NO.

QUESTION - It has a direct knowledge ...

ANSWER - I followed as an office.

QUESTION - It has a direct knowledge of the various phases of this process. She is aware that the crime was discovered inside the footprint of bloody shoe?

ANSWER - Yes, more footsteps, not once, more than one.

QUESTION - And those footsteps as they were treated, were photographed, was made earlier by a report from her staff employee?

ANSWER - Yes, yes.

QUESTION - Can you explain?

ANSWER - Yes, right. As I mentioned earlier findings the scene of a crime that are acquired legally in some cases are not removable, and those are taken physically removed, stored and transported to the laboratory. Those are not removable and therefore must be left in place are documented, a 'footprint of a tire of a wheel in the mud can not be taken away and must be documented in a certain way. Similarly, an imprint of the sole of the shoe that left bloody on the floor design, more or less the sole, and they were no longer a crime scene, and also in the room, I think, outside the scene of the crime, is not removable, so it's been documented on the paino photo, then photography were photographed with these and other footprints.

QUESTION - Are you aware, Dr. Intini, the report made November 7,

2007 by staff from her employee, and in particular by the Inspector and the Assistant Ippolito Mainieri?

ANSWER - Yes, Yes

QUESTION - Can you explain the outcome of this relationship?

ANSWER - A part that we are the operators, it seems that Hippolytus is also mentioned, and then explain in detail to him because there is not a technical or ...

QUESTION - (Unintelligible - overlapping voices).

ANSWER - No, I wanted to clarify that my course is not a technical answer that in detail, here is how can I not be accurate. Again he was captured a picture of this stamp, when they were seized at the time of arrest, if I understand correctly, Mr. Dunning, who had a sole of the shoes like the track, the operators made a photographic comparison. Not an activity specific technical scientific mold that was made later by technical operators own experts footprints, and are mentioned too, Bremia and Rinaldi, who did business as a fingerprint expert, a task just for reconstruction of various impressions and a comparison between them, and this will obviously respond properly and in detail .In this case, from what I remember, was made a mere photographic comparison, that is an overlap between the photograph of the impression left by the soles of blood on the floor and the soles of the shoes seized at Mr. Sollecito, then a superposition of these two computer images showed that, remember, compatibility, compatibility of a mere two fingerprints the same, that is the real one of the left shoe on the floor.

QUESTION - The virtual identity, then we'll talk later ...

ANSWER - Yes, indeed.

QUESTION - We'll talk later with Hippolytus. Remember, even if in the survey inside the apartment of Rudy Guede were found

and photographed the footsteps of shoe?

ANSWER - In the home of Rudy Guede I think so, it seems to me that there were fingerprints found similar in the sense that the sole was in concentric circles, and even this was done because when the search warrant, if I understand correctly, the accused, Mr. Rudy Guede, was not present, was on the run, I do not know if it was sought formally or not, there was no cognizance of the ... I remember that it was acquired, I do not know if acquired or seized by moving a box of shoes always the same brand of that type from which he was done, I think, a comparison.

QUESTION - Can we show this ... Mr. President, then I would like to see Dr. Intini copies of the photographs that have been filed. Here it is the shoe box.

ANSWER - Watch with formal precision no, I am convinced that this is also because it is the only one that was acquired. I remember that was bought a box of Nike shoes, always a model slightly different from that of a sole reminder that he is not unlike that of the same urge.

QUESTION - And then I would like to see, because these pictures are photocopies of photographs that have been produced by us at the hearing on February 27, 2009 and refer to the photographs of footprints. If we can get them because these are photocopies ...

PRESIDENT - Yes, binder number 3.

DEFENCE - AVV. MAORI - Meanwhile President, can my co-worker, Lawyer (...), attack your computer and show the movie? Our movie is a lot easier.

CIVIL PARTY - May. photos look now?

DEFENCE - AVV. MAORI - These are the pictures of the first and second visit but will be another question. Then we had deposited the last hearing, there was the colleague of the

photos had been filed concerning the footsteps of shoe that had been found inside the home Guede, I repeat here the photocopies of photographs that have been filed and now not found. My question was this: if you remember these tracks were similar to those found ...

ANSWER - I remember that were found, now I do not know if one or more than one, more than mud tracks, and traces of blood were in the home, most of the mud with a pattern of concentric circles similar to that to which we referred to the first , remember this.

QUESTION - What kind of assessment has been made by you to verify the compatibility of the footprints found inside the home with that Guede Della Pergola found inside the home?

ANSWER - It 's been done, as I said, the engineer (Inaudi) and the Deputy Commissioner of Police Fingerprint Division of the Bohemian Scientific comprehensive advice on all shoes plantar footprints, ie both feet bare foot shod in all scene. That we talked about earlier was that famous one comparison between photographic print of blood near the body of poor Meredith with the soles of the shoes seized reminder. One to which she refers, ie those at the home of Rudy Guede and the other in the home of the crime were the subject of a single comprehensive, detailed to me the extent of the information available, comparison of all the footprints of shod feet and of a bare foot orthotics which were found the results in detail, then I do not know. So now that I think it was compared with all other right to name all the shoes. Precise, if I may, to explain all the judges who are less accustomed to the popular detective stories - technical - scientific comparison of fingerprints of soles of shoes is a comparison which normally had a judgment of compatibility, normally. The results of the investigation

are identity or compatibility, identity when there is a certain overlap with that of a relic compared to suspicion, compatibility when there are differences but it is not possible to rule on certain identity. The soles of shoes, of course, as a model of Nike, especially young people use a lot, there are around a thousand, and there might be a compatibility and identity. The identity is given by the characteristic signs, ie if a sole of shoes has a clear consumption at a point or these tears or changes, a characteristic that is a hallmark of fact, as we define it, may determine an identity with each other, whereas in a normal situation we arrive at a judgment of compatibility. Lawyer to explain when I was told that with the shoe ... because it is considered compatible with a photographic overlay that could be compatible, without expressing a judgment of identity.

QUESTION - Very clear on this point. I'd like to see at this point, we were able to get those photos that were produced.

PRESIDENT - The other parts have already been produced, known ...

CIVIL PARTY - NO.

DEFENCE - AVV. MAORI - You know them, were produced at the hearing.

CIVIL PARTY - Those of the last hearing?

PRESIDENT - Yes, the previous productions.

DEFENCE - AVV. MAORI - If you can see these photos *and* say they are the ones in his memory ...

PRESIDENT - The hearing on February 27, I do this.

DEFENCE - AVV. MAORI - Yes

ANSWER - I Look I can not express it ... then for fame, because these pictures have turned and turned, this blood, I repeat I can not say officially because I do not have an

origin, say eye, for how many times I have seen them think they are the ones near the body of the victim's fingerprints blood. These other, I was not ...

PRESIDENT - Excuse me doctor, can identify which refers?

ANSWER - These two tracks that are ...

DEFENCE - AVV. MAORI - The verbalization may nominate.

ANSWER - I'm bloody footprints left by the sole of a shoe that has a pattern of concentric marks.

PRESIDENT - That photo is? There is a number?

ANSWER - Photo 7 and Photo 12. Again, I think because one has a letter A and a letter C, I now if the house were taken more pictures ... I think those are the shoes that had walked into the room of Meredith's blood. This is only because I remember that they were footprints of mud I could say: "may, beyond what is written behind of course I read, could be the ones left in the home of Rudy," but I say that because they could not go, I nor did the survey I worked on these footprints, my guess is that I do not think it's wrong, but it is a guess.

DEFENCE - AVV. MAORI - You remember when the doctor filed the expertise, advice and Boemio Rinaldi gave the compatibility of the trail?

ANSWER - I do not remember the date.

QUESTION - I'll tell you, April 6, 2008, so there is a distance of five and a half months from the initial consultation Ippolito had given an indication of compatibility ...

ANSWER - There is a consultancy that of Hippolytus, I repeat, is an initiative of computer work done, the prosecutor did not ask. I remember that the operation ...

QUESTION - Is a technical report.

ANSWER - Yes, it is a relationship, not a consultancy that is assigned by the Public Ministry, is a technical trade. Any

activity that comes from Science comes up with a technical report, no voice obviously, but it was not advice (...).

QUESTION - So it confirms that there is a time gap of five and a half months between the technical report of Hippolytus and consulting Rinaldi - Boemio?

ANSWER - Yes

QUESTION - Now I'm referring to two of his letters, then we'll see a movie that we have extracted from the CD, the only CD we had in our possession, we do not have the powerful means of Sferon we became aware today, two letters She wrote Dr. Intini December 13, 2007 and December 17, 2007. The first, if you remember, she has sent to the Prosecutor's Office, Dr. Mignini, the second to Dr. Matteini GIP.

ANSWER - Yes

QUESTION - Do you remember these?

ANSWER - I seem to remember, if I mention ... I believe that evidence related to the incident that was asked, if I remember correctly.

QUESTION - Can you explain the contents of these?

ANSWER - If you can read me, maybe I do ...

PRESIDENT - Yes, maybe we can make them available to authorized and obviously, his letters are, then read them. The question Lawyer?

DEFENCE - AVV. MAORI - The question is this: you Dr. Intini December 13 asks the attorney can make a further inspection.

ANSWER - Yes

QUESTION - (Unintelligible - overlapping voices) ... because you were out there, even to photograph in different sizes, footprints that were found. She was aware that there were still those footsteps?

ANSWER - I could not have known it because I was not gone, nor the November 2 to 3 or later.

QUESTION - The staff of his employees had made this that these footprints were canceled for reasons ....

ANSWER - I said, "have been canceled," I said and I knew it had operations. I had the pictures we have seen the images before and that gave me the Sferon cognizance of the impression before any surgery, then I knew who had the league, as they say in the jargon, the mark because it was blood, then the operators f and f have ettuated the survey had their own league mark to capture the following elements in the laboratory on the DNA profile of blood that was eventually released from the shoe. So I had some cognizance, but imagine how it must have been, it was less positive than when it was photographed.

QUESTION - We can see the movie in relation to inspection November 2 to 3?

PRESIDENT - To which the witness was not involved.

DEFENCE - AVV. MAORI - did not participate.

PROSECUTOR - DR COMODI - It might be the case to show it when there are operators that C 'were.

DEFENCE - AVV. MAORI - was the question of whether or not the impression.

PROSECUTOR - DR COMODI - But if he was not there because we ask him?!

ANSWER - Perhaps the lawyer refers to what I write here, if I read this opinion.

PRESIDENT - Now let's see ...

DEFENCE - AVV. MAORI - In the movie we will see now that there is an operator, I believe Dr. Stefanoni, but I can not accurately indicate who he was because there is only the hand, making the cleaning or removal of the impression.

ANSWER - It is not cleaning, it is called sampling.

QUESTION - Sampling.

ANSWER - cleaning means cleaning the tile to remove ...

PRESIDENT - I'm sorry, expect demand.

DEFENCE - AW. MAORI - Basically, as you can see, this impression is in fact completely erased. But the question is this: Dr. Intini when making this letter, when he wrote this letter to the Prosecutor's Office asking for a site visit was known, had been told that this imprint was virtually no more visually?

PROSECUTOR - DR COMODI - No, except that still exists!

PRESIDENT - I'm sorry! We demand in the sense that this imprint was made in the transaction that is represented in the movie.

PROSECUTOR - DR COMODI - By sampling.

PRESIDENT - This operation, then let's let the witness answer or text.

DEFENCE - AVV. MAORI - This is the process of picking 'or sampling as it is ...

ANSWER - That's right.

QUESTION - In practice clears the mark completely.

PROSECUTOR - DR COMODI - But the "practical" you say true because P!

PRESIDENT - Sorry, we avoid interpretations at this stage.

PROSECUTOR - DR COMODI - The Question?

PRESIDENT - The question of whether the operator has reported to the heads of the transaction at issue here that we're watching the movie.

DEFENCE - AVV. MAORI - When the witness sent the letter, the letter to the Prosecutor's Office.

PRESIDENT - The letter, excuse me, while we can ...

ANSWER - I richiedevo in essence, as I said before, the

prosecutor to assess the opportunity to re-enter the crime scene.

PRESIDENT - And on this?

ANSWER - This on December 13, then the prosecutor, Dr. Mignini, asked her to consider, although obviously the thought of relief activity and detection, unique and ...

PRESIDENT - It was specified that the object or generically visit?

ANSWER - "Subject Kercher murder prosecution."

PRESIDENT - No, no, the inspection with reference to some specific aspect?

ANSWER - No, the object is only the case on file. Then if you want to read it, I say, "in reference to criminal proceedings in question above, please this authority to authorize legal staff to make this service unique nature of the technical measurements at the home of Meredith Kercher ... located in Perugia Via Della Pergola 7-.In this regard it is noted that during the analysis of findings from the first inspection of Police Science - the vision of the S f Eron and various briefings and assessments made in the office - has arisen the need to make additional findings - as I said what the Wall, the streak of blood so to speak - considered to be beneficial for optimal reconstruction of the crime.In particular it is considered necessary to acquire images from any angle photographic impressions of soles of shoes at the scene of the crime - in general the various imprints - unless the tracks they have not deteriorated as a result of the infusion of chemicals used in During the operations of detection of the latent fingerprint, or to other environmental factors. "This is because I say? Because as I said before that I had no certainty, says the lawyer, who had been clean, I was

definitely certain that it was deteriorated because of an impression which was made a detailed sample's lack of detail surely is not the original. But the intervention of the Scientific Police, I repeat, is not an aseptic surgery, is an intervention that changes, that's why I said: "where no one can take away shooting." The correctness of the intervention is to have, hold still, and we have seen today, the original photos of the impression it was before someone put his hand. We've had today. Finally, knowing that the room then used the cyanoacrylate ester, which is a chemical fingerprint to detect and then the biologist or someone in her survey has sampled a moving liquid with gauze specifically for these samples on the footprint if you do not clean at all would still deteriorated, I used this formula, I said: "Let's see there, we need to take fingerprints - though I have told prosecutors - we expect attention, now we are not sure ... ", this video I had not, at that time that I was not, then we could be faced with something that was not anything new, even worse was the first photograph taken by operators in the first intervention. So was likely to be, but I had no certainty.

PRESIDENT - Dr. Intini when she says "this video", refers to the video ...

ANSWER - Then this is done on December 18.

DEFENCE - AVV. MAORI - NO, November 3.

ANSWER - Yes, sorry.

PRESIDENT - That the defendant is projecting, relative video?

DEFENCE - AVV. MAORI - The investigation carried out by the Scientific Rome.

ANSWER - In the night between 2 and 3, at one o'clock.

QUESTION - And was made to employees of Dr. Intini. I.e it can confirm that it was performed by its staff?

ANSWER - Yes, yes, right. I do not remember seeing it, but I is not that I've seen ...

PROSECUTOR - DR COMODI - The first shooting of the movie were made from Perugia, and so if we can wait for the operators, ie if you want to confuse water!

DEFENCE - AVV. MAORI - I'm confused ...

PRESIDENT - Please Lawyer, we continue with the questions.

DEFENCE - AVV. MAORI - We now turn to the second letter, Dec. 17.

ANSWER - Yes

QUESTION - letter that she sent Dr. Matteini, Dr. Matteini to GIP, which as a result of instances of recording evidence presented by this defense to make the encounter with improbability dell'orma found Sollecito's shoe, had asked her just News Dr. Intini and she replied saying that it was not possible to make an inspection on the spot. Why?

ANSWER - No, no, the speech was this attention to: Dr. Matteini, the GIP, if I remember correctly he was asked by the parties, if you really do not know her, an incident of this imprint evidence, ie evidence that the focus was not test, the technical report made part of the police forensic evidence in an accident. So Dr. Matteini, being a technical matter, the probative obviously was intended for a technical trade, he asked for a technical opinion.

QUESTION - What was the object of the accident?

ANSWER - The question was whether you could do on the technical, scientific, obviously not legal, a recording evidence of the imprint, do an activity that is then compared with the true champion that he had issued the stamp. I allowed myself to tell him that you would definitely work on finding the worst of what we already had, that the finding of this stamp was what? Those two photos we've seen before in color, made at the beginning of the inspection when the

imprint was clean, pristine, untouched, as released by those who have walked on the blood the night of the murder. That is the finding that we have, survey done by the Police Scientific hours x at night, when the operator quell'orario before blood sampling, the finding of that imprint is the photograph of the impression intact. All I could do next, even with rifotografandola equipment with better contrasts of light, an imprint was made on deteriorated. As I said in my previous note ipotizzandolo, was then tested in the survey of 18, the mark was visually worse than the previous one to be acquired. He was not physically be removed because if the tile rose and broke the mark for another insisted on more tile, if I remember correctly, then you should take two or three tiles and maintain the same distance in the lab and bring this print certainly ruined, deteriorated because it was impossible to keep, to have an image worse than the initial one. So I represented on the technical evidence that the incident, beyond the legal assessments that were not mine, would have as its object worse than finding a home, and on which you could not do any kind of work.

QUESTION - She was asked if he could be removed or if it could be compared?

ANSWER - I was asked if he could be the fact of recording evidence, that is, comparing this fingerprint with other ...

QUESTION - And then on this same material worked its employees Boemio and Rinaldi?

ANSWER - Yes, the original finding, the pictures we have seen, not on what was left on the tile in 'home.

QUESTION - So ...

ANSWER - No to complete, so it is clear the discussion. I'm saying

that the find was damaged and unusable, but I refer to the department of science which had already worked and which to this image.

PRESIDENT - In this video clip?

ANSWER - That's right. But the find that is given by the picture I showed you before that I gave the lawyer, instead they were used so much that we worked with the advice of Defence and has worked with consulting office of Rinaldi and Boemio scientific, but always finding the original untouched and unspoilt. That's why I told the doctor Matteini: "it is useless to do something."

PRESIDENT - when she says: "finding the original" refers to the photo of the exhibit itself?

ANSWER - The first photograph, is the finding because that shows us the impression early on.

DEFENCE - AVV. MAORI - her first in answering questions from the prosecutor pointed out that, actually said or did an affirmation of the principle of absolute idea and said: "there were external factors entered into this investigation." What does this mean? It means that we have been on your part, by the Scientific Police of external contamination, is this correct?

ANSWER - Yes, yes, but I recorded the results, not on conviction.

QUESTION - I now I'd like to see those photos, I think she has to have already been filed and are related to inspections carried out on November 2 . . . these pictures have been extracted from the first site investigation on November 2 and December 18 seconds.

ANSWER - Yes

QUESTION - can look at these photos?

ANSWER - Yes, I'm seeing.

QUESTION - There are ten photographs, and are five depictions of

a particular, five different places of the house of the crime before November 2nd and then on December 18.

PRESIDENT - I'm sorry Lawyer, these are the photos taken?

DEFENCE - AVV. MAORI - I think the February 27 hearing.

PRESIDENT - From Defense Sollecito Raffaele.

DEFENCE - AVV. MAORI - Yes, the question is this: she could see the difference between the two surveys, consider it possible that there may have been taken into account exogenous contamination of the absolute diversity of the representation of places?

ANSWER - I do not I've done or I can make assumptions because it is not my role. I recorded a fact that the term of these investigations in our work has revealed, as a result, no trace dattiloscopica, genetic or sandals of foot and shoe to be attributable to an operator of Police, I recorded this. From this we can deduce, I think objectively, that surely there 'was no, certainly as I said, if I understand correctly, the survey was done with some care, with some care.

PRESIDENT - Yes, it said.

ANSWER - This I said.

PRESIDENT - when she says: "genetic trail" is like biological trace, is equivalent?

ANSWER - Yes, that is, for example, may have released my biological trace from which we extract the profile and then says, "but this is the operator."

PRESIDENT - Obviously.

ANSWER - I am from this objective fact, indisputable, irrefutable and documented it can be inferred that, but I can not say, I would say but I can not say that there was no external contamination. In fact I'll tell you more, and I have said already, it is impossible that there is, I said that we

have reduced to only two site visits in order to avoid interference, then surely this one she shows me normal.

PRESIDENT - when she says: "this guy" shows pictures.

DEFENCE - AVV. MAORI - It is normal in that sense, he wants to say?

ANSWER - It is normal in the sense that between the first and second pictures of the first inspection visit are before they would operate the lab, like those of Sferon because they are the same, the house has been recorded on the video and photography as it was when entered, there was a small access of those who tried to help, the first intervention of police, but very limited. Operators of Science, with all activity not only documentation, but repertazione, ran for two days in that house. How can you think that ... we went out Dec. 18, but on Nov. 4 when he took the pictures would have found a different situation from the lab because operators did not fly in the rooms and then and see what makes me normal, I'm not surprised because the action of 'Scientific operator has the amending action, destructive, try to minimize, before doing so and in fact today we have documented THAT' footprint com 'was originally and many others, however, change. So it seems natural that in a second entrance there is a different reality, one can ...

QUESTION - A different reality with a total distortion of places as they are shown in the photos?

PRESIDENT - I'm sorry Lawyer, we are a different reality and explained that in terms.

DEFENCE - AVV. MAORI - In relation to the contamination as possible that there was between the first and second visit, since, as you well know the squad has entered several times between the first and second survey,

therefore, between November 3 and December 18, there are records and therefore it is. How can it exclude Dr. Intini, that there was a contamination of DNA from one of the defendants, which may have been worn with a suit or something else from inside the room of the crime? Can not be excluded that there is a stain expected that DNA contamination clothing, furniture have been moved and are State, for example, with regard to the cabinet doors of the room of Meredith, have been removed, brought externally ...

PROSECUTOR - DR COMODI - No, not true!

DEFENCE - AVV. MAORI - Outside the room ...

PROSECUTOR - DR COMODI - not true!

DEFENCE - AVV. MAORI - Then we see the photos!

PROSECUTOR - DR COMODI - Precisely we see the photos!

PRESIDENT - I'm sorry! Lawyer enters.

DEFENCE - AVV. MAORI - So before concluding the question we can see the pictures on ...

PRESIDENT - So you are asking if it is possible that contamination has occurred with respect to biological traces.

DEFENCE - AVV. MAORI - Exactly.

ANSWER - First of all we talk about when we talk about the contamination by external agents because it is obvious that what ... repeat for the third time, I do not make a personal opinion, the record that all the exams ...

PRESIDENT - And this has already said.

ANSWER - Now ...

PRESIDENT - I'm sorry doctor, the lawyer asks how it is possible that a room has been brought to a garment of the person in another room and has resulted in contamination.

DEFENCE - AVV. MAORI - President, excuse me, these are photos

taken from the DVD for the first inspection of the November 3, if we go we find that these doors were taken off of the closet and bring the outside Meredith's room, not over the house, but compared the room.

ANSWER - Excuse me a moment I saw that answer is the image. This operation is clear, ie, no contamination, there are operators as seen in suit and mask, which are not removed before moving the cabinet, there are doing an operation of BPA, which then there is a consulting engineer Camana ...

PRESIDENT - I'm sorry, BPA would be?

ANSWER - BPA would Blade Pattern Analysis, that would be analysis of traces of blood. Since it was found that the doors of the cabinet there were a series of blood spatter, blood spatter is now the physical operation, according to the strength and direction of the sketch the shape of the drop of blood has a dimension particular. Experts from BPA, ie Blade Pattern Analysis conditions are, with scientific formulas, as did the engineer Camana, our bodies, to calculate the distance of the body, I can not say support because out of the body, the body part from which is splashed the blood. It was evident that the action of stabbing had occurred near those doors, so this sketch analysis of the technical operator, and has released an advisory to that effect, had to calculate how he could be or should be the scene of the murder when dell'accoltellamento when the blood splatters and make This has removed the doors. But I repeat, since activity of the Scientific, I would not make a public defense office to say that we are perfect because they're wrong, but I would not want to own shares that are being exchanged for protocol errors, that is, if you already have everything documented I I can go to a next step I need for another

investigation and modify. For example, the passage, when vaporized cyanoacrylate esters in a room to get the prints you atomizes a chemical change, deteriorates. If a substance is to be sampled to make DNA analysis is done first, that we have a whole series, here are the protocols, activities that can further modify the climbing scene, when we get there we are already at various steps, that has already done what he has photographed and filmed, and we have documentation of the closet as it was when they entered the early movers, so do not miss anything quell'anta. Who has worked and biological traces found in it, those who have already worked fingerprinted using the technique of powder with the brush and then with cyanoacrylate, then you need to be tackled later in which to do further analysis, which can be helpful to think in a Public Ministry also important, and it is clear that we are at a stage where there were two, three, four steps in the same survey. When the lawyer refers to several enter, the same two days in the room they entered different operators that various activities have to climb.

QUESTION - Just a comment to this thing and that is ...

CIVIL PARTY - President I apologize ...

PRESIDENT - What is it?

CIVIL PARTY - There is opposition to the use of these photos in this sense: they are definitely extracted from videos made by operators from the lab, but we do not know why you do not see the time and at the same succession of such moments. Then represent them well ...

DEFENCE - AVV. MAORI - Let's take a time now, we take it away.

CIVIL PARTY - So if we denote the moments, the doctor may also explain the evolution of the steps of its traders, because if we put the photos in the final situation and see for

first course or on the contrary, everything changes. So if we use these photos with a time and day for an exact comparison is fine by me and the doctor ...

DEFENCE - AVV. MAORI - Prowedo immediately.

CIVIL PARTY - Otherwise there is a formal opposition.

PRESIDENT - Lawyer then this movie makes it available?

DEFENCE - AVV. MAORI - Certainly. 14:55 hours on November 2. I wanted to comment ...

PRESIDENT - Perhaps a question, comment, then ...

DEFENCE - AVV. MAORI - Comment in the sense ... Then you talked about Dr. Intini shift of the doors ...

PRESIDENT - This, Excuse Lawyer, is always the image of that date?

DEFENCE - AVV. MAORI - 2 November at 18.55, I put at the disposal.

PRESIDENT - It was what you saw before. Please Lawyer.

DEFENCE - AVV. MAORI - November 2, 18:55 and following, the closet door is moved to Mass, to take measurements against a drying rack out of the room Meredith, in this drying rack there are of the clothing to dry out above. You can exclude as sharply as it did until now, there has been a contamination of DNA from the leaf of the cabinet which is then put back into Meredith's room with the possible DNA carried by the clothes hanging on clothes line ?

ANSWER - I can express with the results, there were no traces mixed. On quell'anta, if I understand correctly, with no trace of the victim's DNA and that's it, so if we speak of danger, pollution, I confirm what the lawyer says, there was definitely, there will be, but in fact But there was!

PRESIDENT - I'm sorry doctor, but she says: "tracks mixed", then mixed it means ...

ANSWER - No, because the lawyer comes to believe that it means

that contamination track 'organic, if it relates to biological trace we can speak of fingerprints, which is unique and has its own DNA because it refers to a person where come in contact with the biological trace of another can be mixed and from there exists a mixed profile, that is, when the operator ...

PRESIDENT - That did not happen.

ANSWER - Because they were not there then I record the result.

PRESIDENT - I'm sorry, we have heard, but also asks the lawyer, so I thought I understood the question as she does to exclude that from quell'anta cabinet that bore traces of blood of these traces of blood may have been brought on some of the clothing.

ANSWER - I understood perfectly.

PROSECUTOR - DR COMODI - No, the opposite would mean that the lawyer.

ANSWER - What clothes may have led ...

PRESIDENT - One moment, we specify the question then.

DEFENCE - AVV. MAORI - may exclude Dr. Intini, that there may have been contamination between the closet door that was against the drying rack ...

PROSECUTOR - DR COMODI - Against a drying rack you say so! It is a description of personal, subjective!

PRESIDENT - I'm sorry, but we allow the application is made.

PROSECUTOR - DR COMODI - It's against the wall is not against the drying rack, President!

PRESIDENT - To Favor.

DEFENCE - AVV. MAORI - The question is this: how can it be excluded that there has been a transfer of biological material from the leaf taken outside Meredith's room and reduced back into the room of Meredith?

PROSECUTOR - DR COMODI - has already responded!

PRESIDENT - On this?

ANSWER - I do not now know the proper verb and operational techniques that moment, but if quell'anta whose blood traces on this side had previously been sampled with a quell'anta then we can do whatever he wants if he needs for what what else, so I'm looking ... Then repeat the theoretical contamination there can be anywhere, in fact, I repeat, is that there is physiological in a field where there are more movements, but the ripped tracks have led to identification of profiles is not dirty, mixed or traces of unidentified persons .We have no genetic traces of people who do not know ozero mixed with other, then the result is what I log.

DEFENCE - AVV. MAORI - So there are mixed tracks, you've found within the mixed tracks?

ANSWER - No, the tracks are mixed only between the victim and others.The third, however, seems to me, now I will not go in investigative assessments, I do not compete, which are subjects of history, that there is no outer unknown, ie we have a mixture of the victim with un'x unidentified.I have mixed all of the victim and it is normal, with people who still come to history.

QUESTION - And how does it rule out that it has not been this mixed material of biological components of the story, just to be clear, and to urge ...

ANSWER - Since we're talking about in theory, as it is possible in theory can not be said in theory contamination.Or she demonstrates and shows me the contamination ... if we speak, not you and I we're two degrees in law, science or a technical but shows how the contamination occurred and it's OK, but as long as there is no scientific task that proves to me I c 'is.Hypothetically there, we can

hypothetically, there could have been, but it must be demonstrated. The DNA, I want to say one last thing to make clear to the jury, the DNA is not a physical entity that flies, as may be pollen or hair, DNA, so say layman understand even better why not a biologist and then speak the same language, the DNA is a protein that is in the cell, this DNA is not enucleable flying and you go to stick here and there. The DNA is in a cell which if it is located at a point is extracted, then this is to say that the contamination, although theoretically and hypothetically, can not be excluded in the,, in which the terms very theoretical postulates the Lawyer, however, the contamination is not easy, that there must be a real contact. That is when we find traces of epithelial someone on a handle of a knife or a metal object on a porous wall, there was a force, an action which has scratched, to use the term which is understandable, as the sandpaper scratched my skin and left of the small cells of skin, the engineers call it precisely tracks epithelial exfoliation, on the site. So it's not that our skin flakes off and fly, so even if such a small cell of skin that can not fly well. However, hypothetically, in a totally abstract, it can be demonstrated, however.

QUESTION - The disintegration of cells contain DNA?

ANSWER - I am not a biologist so that we can not ...

PRESIDENT - I'm sorry.

ANSWER - I heard to say yes.

PRESIDENT - Please lawyer, so maybe there are other texts which may perhaps be ...

DEFENCE - AVV. MAORI - Why did some considerations.

ANSWER - The Science of biologists has the highest level and can answer better than me for sure.

QUESTION - I just wanted to point out to Dr. Intini that my question answered: 'I do not know ', but it is first expressed in a very authoritative, and if his knowledge of perfect knowledge is the fact that cells contain DNA cleavage ?

ANSWER - Look I can be that exact term I used, exfoliation, exfoliation is logical now to a dead cell.

QUESTION - (Unintelligible - overlapping voices).

ANSWER - I do I can say that there are several cases that we've covered, even by investigators ...

QUESTION - The disintegration of cells contain ...

PROSECUTOR - DR COMODI - not a biologist!

ANSWER - I do not know, I'm not a biologist. Incomprehensible - overlapping voices.

PRESIDENT - I'm sorry! He said he did not know, gave this indication and the lawyer has made a clarification on that profile, as it had. However, he said, however specified, and then take the response and the subsequent clarification in terms of how we received it.

DEFENCE - AVV. MAORI - A single question on the issue of Rudy Guede. You remember, if followed, if it was his knowledge of the path that led to the grounding of today's defendants, and especially of Guede?

ANSWER - No, look I remember very general terms of what I was reverend in part and what I read. The technical part - I have followed the science more directly, unless the investigation, so now I give histories of arrests is a little unprepared.

QUESTION - How was the Guede you know?

ANSWER - I can tell you the scientific part, that no investigation.

QUESTION - Of course.

ANSWER - I remember the first analysis of various biological samples was found a male DNA profile that did not correspond to the period investigated, two of which were male. In particular, a genetic profile was extracted from the full repertoire detected and toilet paper in the toilet of one of two bathrooms, and even if I am wrong on the vaginal swab done to the victim. It seems to me only on these two, I would not be wrong, however, revealed a profile of a man, as biologists use to write in the report, 1 man, that did not correspond to the two. So we took cognizance that the crime scene, with a role that he would be assessed and of course there was definitely a different man from the two, as the third, as the second did not interest us and then there was the need to understand the investigative plan to which we told who it was. Simultaneously there was an activity of other operators, the fingerprint, which Boemio which is always mentioned with regard to a palmprint in blood on the pillow where he was the victim rested, good enough to be on a pillow that is obviously not as good a support surface of a solid, smooth, a palmprint that was identified by her fingerprints to the card then found the suspect Rudy Guede.

QUESTION - This print was evident handheld?

ANSWER - Evident in what sense? On a technical level and it was obvious enough to make a fingerprint comparison, as the engineers say, have identified more than enough points on the case law to consider the identity of this palmprint of blood on the pillow and the palmprint on the tag of Rudy Guede. Rather, I want to be more precise, we say the comparison is made on suspicion, not that we have identified the handheld from the impression. Among the

various suspects, I can not remember in what capacity, the mobile also indicated Rudy Guede, taking his card there was a confrontation between the palmprint ink on the tag fotodattiloscopico Rudy Guede and the imprint of blood and identity was given on the right points, at least, certainly more than 15.

QUESTION - But it could be done through the AFIS?

ANSWER - It is an interesting question because the AFIS is the fingerprint, we also have the APIS is the handheld and then nell'AFIS we have an automated response only on digital. On the handheld there is another part that is more recent, three or four years, there is only one million palmprints on the cards that we have the dates but we only have one million base compared to nine million digital so it's a database that is under development, deployment, but not yet complete. So do not give us response efficacy and self as it gives the AFIS for digital, then automatically we could not have an answer for the identification of the handheld. We arrived for a comparison, I suspect, as we did with the other, on a subject then was the right one identity reported by the Flying Squad.

QUESTION - At the moment, thanks.

**DEFENCE - AVV. ROCCHI**

QUESTION - You said it was important for you to use this video made with this Sferon. Can you explain the reasons which he considered essential?

PROSECUTOR - DR COMODI - Not a video.

ANSWER - Yes, first I did not ...

PRESIDENT - It is a scan of the images taken, has already exposed anyway.

ANSWER - I seem to have it explained, but if you want ...

DEFENCE - AVV. ROCCHI - Why essential?

ANSWER - important for an appearance, not essential in general. Among the different, obviously because they have different policy areas, including the various activities of the documentation, then only that the documents had a significant contribution, key repeat, but that part, because I repeat Sferon from being able to see me or operators themselves or by the same investigators photos and video from the scene of the crime would have a partial view; with Sferon that I saw as a photographer in a global, spherical, the whole room and other rooms there is a possibility of detail that by photos and video I would not.

QUESTION - This has been able to avoid additional inspections?

ANSWER - Yes.

QUESTION - The exact reason for the second visit, she already he noted, can you please repeat it to me?

ANSWER - Yes, I can not remember all, but in this period had been found some situations that were thorough, and I remember the one cited above, that the streak of blood, but probably there were other, so that it was appropriate to return acquire other items. Then there was the story of the impression that he was one of the other aspects, as part of the defense there was a need to acquire, that was my first note I explained that said, "well let's also try a new recovery of that image, I think that will be deteriorated ", as it happened. So I can not remember, however, a number of elements ... moreover exhausting all in an inspection is very simplistic, in a second aimed for other also to the needs of Defense notified in advance because the defenders themselves could then participating going to detect some aspects, such as those of the

impression of shoe, with their interested

QUESTION - And then after 45 days has seen fit to do this by ...

ANSWER - No, really ... yes, but that is not there, we could go even after three months or after one week, then the events and activities to be performed ...

QUESTION - You said that the opening of the door can pollute the environment.

ANSWER - Yes.

QUESTION - In the transition from room to room an operator can transfer the biological material, such as stepped, as cells of cleavage?

ANSWER - You look so detailed it is foreseen in case ...

QUESTION - Is it possible?

ANSWER - I do not think you can answer. It is theoretically possible that a plaster falls while I do an inspection? You may like to do excluding it!Theoretically it is still possible.

QUESTION - That is, it is possible that trampling ...

ANSWER - The operator shall take all precautions to avoid it, then theoretically, if there is a theoretical hypothesis and verification. .

QUESTION - You can drag the material trampling?

ANSWER - I can only give certain answers, not to make assumptions that I do not compete and I would not give it because they are misleading and subjective, repeat only the objectivity, we did not find traces from different locations.

QUESTION - No, I'm asking you the results, the I'm wondering if you can drag trampling of biological material from one room to another.

ANSWER - It is not possible if there is a careful where you put your feet.Because I am convinced that it was made sure that

I do not think they have trampled anything.

QUESTION - But you can.

ANSWER - If one steps on a trail of blood and then the door into the other room, but you have to prove that he has trampled on, I am convinced that my I did not!

QUESTION - I just needed to know if it was possible.

PRESIDENT - I'm sorry, we understood. If you asked an evaluation, so it is itself in question also request an assessment to which the witness has complied.

DEFENCE - AW. ROCCHI - You have said several times that there is pollution, so to speak, physiological. The confirmation of this?

ANSWER - Yes.

QUESTION - That is, there is always a certain amount of pollution that can not be eliminated in each visit?

ANSWER - Yes, but that does not tell you, is in reality.

QUESTION - Is it true that this contamination, this fee may increase depending on the number of inspections that are performed in a certain place?

ANSWER - It is obvious that if there is more movement of people we can be more moving, yes.

QUESTION - After the first operation of the science shows that there have been several visits by the squad?

ANSWER - You look to me is a search and access, but not something that I've decided, you gain access to a targeted items, clothes washing machine.

QUESTION - So the results of subsequent interventions, however.

ANSWER - Yes, but due to a search warrant after a killing to be done!

QUESTION - So these accesses have increased the risk of pollution?

ANSWER - Yes, are questions that I can answer anyone.

QUESTION - The results when the agents of the Squadra Mobile have followed the exact same precautions performed by your team?

ANSWER - I think so, I was not there, but I think so.

QUESTION - For the interpretation of mixed DNA profiles your operators follow the recommendations of the International Society of Forensic Genetics?

PRESIDENT - Perhaps if you answer that deals with this aspect otherwise we let the application is ...

ANSWER - I do not know, that I may ask ...

DEFENCE - AVV. ROCCHI - Okay.

ANSWER - I am confident that use international standards in procedures and interpretations of data.

PRESIDENT - I'm sorry Lawyer, also applies to the other, are questions that will be better placed ...

DEFENCE - AVV. ROCCHI - Just to see if they have knowledge President Your genetics laboratories are accredited according to ISO 17025?

ANSWER - I Look first in Italy we are acquiring a month, I am not aware that there are genetic forensic laboratories in Italy to have this ...

QUESTION - No, no, I'm asking if your ...

ANSWER - I'm saying that we are acquiring, in June we will acquire the ISO 9001 is the first standard, 17025 by the end of the year and we would be the first forensic laboratory in Italy.

QUESTION - So you do not even ISO 9001?

ANSWER - No, we have certification in June, we completed the procedures and we will.

QUESTION - We can explain what's involved in this accreditation ISO 9001?

ANSWER - Certification Watch is a mere formal, legally non-inf

ICIA Italy 's' results, there is the law on the DNA database that is being passed to weeks and expects it seems to me in terms of two years, then even enactment of the law, I think by 2010 adaptation of genetic laboratories to ISO 17025. The rules say it's a correction that we have proposed because the original text said ISO 2001 and ourselves of the Scientific Police, in amendments to the law, we suggested to the legislature to clarify that 17025 is the international standard to which we must adapt. Why are you saying this? Because the bank colloquierà date for the treaty. .) With the European databases and so we should have it. The law does provide for it when it is issued by 2010.

QUESTION - So anyway at the time of the inspection and these laboratories were not accredited?

ANSWER - No, no, I've said.

QUESTION - Thank you.

**DEFENCE - AVV. Ghirga**

QUESTION - I need to make a clarification, has explained the operating procedures that intersected with the provincial scientific and says that at most, says: "We were lucky because the present case we could take advantage of the full potential" and appoints a biologist . It is Dr. Stefanoni?

ANSWER - The survey ...

QUESTION - He says: 'we could work together to have three graduates. "

ANSWER - Yes, the biologist ... of all visits to the doctor intervened Stefanoni as a biologist.

QUESTION - Since I have a text list, when he speaks of the biologist speaks of Dr. Stefanoni?

ANSWER - Dr. Patrizia Stefanoni, exactly.

QUESTION - When he talks about the chemical engineer Rinaldi?

ANSWER - No, I speak of Dr. Agatino Board that is one of the texts this morning.

QUESTION - When he talks about the physicist Dr. Camana?.

ANSWER - Yes, I speak of Dr. Camana. And the engineer who did not participate, because they have participated in site visits ...

QUESTION - I asked a question I said that when he speaks of the biologist who, when speaking of the chemist I knew I had another person, when he speaks of the physical, now there's an engineer?

ANSWER - I have spoken of those who participated in the surveys.

QUESTION - Three people. As indicated in the lists are texts we know who ...

ANSWER - No, I wanted to clarify since you asked for it because I've indicated before the engineer Rinaldi, because I was speaking of the three experiments graduates who participated in survey. The engineer has not participated in the survey Rinaldi, has participated in activities in the laboratory comparisons of fingerprints, so let's say, if I understand correctly, graduates in the disciplines of chemistry, physics and biology, to inspections, only these three mentioned.

QUESTION - I have asked him why lists are in the texts. Also for clarification, when he speaks of an impression that's why I thought of Rinaldi and Bohemia, she uses expressions to exclude and to give, would be those formulas useful comparisons positive, useful for comparisons or negative is another's ...

ANSWER - On a technical level.

QUESTION - It is a clarification regarding a story that you make

the prints. When he says to give it or to exclude them, I borrowed and read advice of the Public Ministry expression: "positive fingerprint comparisons that are useful to give useful comparisons that are not ruling out negative." That was what she was injured when he talked about fingerprints?

ANSWER - Look I do not remember when I talked about what I said fingerprints on a technical level the conditions are these. The imprint is first evaluated whether it is useful for comparisons, why? Because if the mark is a recognized frammetto where there are only 5 points I already know that a comparison would be useless because the case involves 15 to 16 points, then I say: 'it is useless for confrontin. Where, however, and the work he does Agatino Board notes, enhances the prints are not visible, the footprint is large, clear, clear to be useful then goes to dattiloscopista that compares only the useful and gives a positive or negative.

QUESTION - Was that. I must return to inspections and the application of this system Sferon, the inspections are two officers, one of 2 to 3 November and one on Dec. 18.

ANSWER - Yes

QUESTION - He asked her, stealing quotes the question, if she is aware of other surveys more or less formally recorded between November 5th, the day that the apartment is sealed, and December 18, the day we back all of She said yes but she is aware of other ...

ANSWER - Watch survey, if I understand correctly, even in the case is the assessment activities in place that makes the lab and we have only made two, and the 2 to 3 November and 18 December continuously say, do not have other visits been made.

QUESTION - But you mentioned a date, November 4, why mention it?

ANSWER - I do not remember.

QUESTION - You do not remember, but if I say November 4th ...

ANSWER - I have just said, I can not remember if I said, but it is not certain that the squad would have two accesses, and accesses it on purpose because I say no inspections, are two entrances to the purposes of search, a generic .. . Perhaps here I said I wanted to say after 4, he's right, I said maybe 4 but I do not know if it is correct as the date immediately after the visit of 2 to 3 did a generic search. Then it was the evening of 3 or 4 am I wrong I, however, after the first inspection. I understand you have done a much more active character than search and seizure of a targeted and clothes from the washer, that's what I know, but in technical visits have been made only two, not others.

QUESTION - Then the fellow Dalla Vedova will see part of the inspection or something from the lab of 2 to 3 November, but in relation to those few images of the system Sferon we saw something very lunar, there are people, aseptic places, then it Today we take note of this system and that's fine. I have given this question to ask at the beginning of the hearing: those practical effects in this case for investigation are derived from her study and observation system Sferon. She refers to one, the traces of the hand on the wall in the room of the crime, there's another one that observing this system, these places ...

PRESIDENT - Excuse Attorney, on the track of the hand the witness has talked to highlight the opportunity to return.

DEFENCE - AVV. Ghirga - C 'is the visit of 2 to 3 November, you have them examined with this system Sferon, which is well above that, also to prevent further access, etc, because the

additional access. etc., and anyway there are still served to ask, for, to ask that the official visit of December 18 of which you also referred in his letter of December 13, 2007. Then the observation, the study of places in a different way from what is the movie which we have practical effects for you as well as the forensic investigation, because you have four divisions, and the trace of the hand on the wall to which referred, such as investigating other ideas that would require access where did you care to observe the standards of the adversarial, Article 360, etc. ..

ANSWER - I understand very well. the one I remembered well, however, is not that I was the owner or handler of the investigation for two reasons: One because the investigation the office is investigating, that the Flying Squad and the Public Ministry, while the lab makes a work of support, not to conduct investigation and evaluation, the less I have yet official and a director of PG I could do and I spent some 'years of investigation, I like, but among the various commitments that could not. Then I saw the movie, but I have not directed this work of analysis because I was competing, so now I do not remember, the evaluations made her the Flying Squad and the Public Ministry, I looked at her. Here I remember that we spoke with Dr. Stefanoni of this, now I came to mind and I showed the example.

QUESTION - Now I make an application dry, unless it is otherwise admissible am referring, who moved the leaves, the pillow and the mattress of the chamber of the crime or the forensic investigation?

ANSWER - I do not know, I do not know if you have been moved as far as that ...

PRESIDENT - I do not know. Please, go on then.

DEFENCE - AVV. Ghirga - On November 2 to 3 is the movie etc.. etc., let alone access, intermediate, December 18 we are all there.

ANSWER - Yes

QUESTION - When you start, because I was there, the shooting of 18, around noon because he was a bit 'late to connect the wires, we immediately notice the cupboard in the kitchen or near the kitchen. These anomalies, but I say I'm sorry President, the mattress of the bed of Meredith's room in the kitchen leaning against a wall and the pillow that was under the buttocks of the dead girl, you know this?

ANSWER - Yes, the pictures I've seen.

QUESTION - Well know for the sake of office, was under the buttocks, where there was a handheld ...

ANSWER - Yes, yes.

QUESTION - Inside the cabinet, which was without doors that had been resting somewhere, were detected at the beginning of the access pattern formed on December 18 and ... when I say those who have moved, but it is quite responsive to protocols, guidelines, case by case basis so significantly alter the place or the scene of the crime?

ANSWER - Yes, it is normal to move.

QUESTION - You said it before, says ...

ANSWER - I'm sorry if I have a pillow under the victim's body to analyze the pillow I have to move your body, you may not think that the science is moving and not touch anything and everything remains as it is, it's normal! If I had seen it all as it was I said to my, 'but that you did?! Nothing? ', Ie if I have a pillow under one body and I to 'see and photograph the pillow and the impression then was also decisive, remember, to identify one of those who attended

the house, I have to move the body. That is, if you have to see if the coroner has a wound on the body turns, the same if there is one thing to photograph the better the normal displacement.

QUESTION - Then answer protocols, guidelines, experience, case by case so profoundly change the room of the crime ...

CIVIL PARTY - There's opposition!

PRESIDENT - Sorry, sorry Lawyer!

ANSWER - Can I respond?

PRESIDENT - No, no, it has already responded.

DEFENCE - AVV. Ghirga - He has already answered, then I will require: moved the mattress of the bed of Meredith, on the network of the bed of Meredith put clothes from other rooms, you know this? ANSWER - And what does it change?! (Not possible to understand overlapping voices

PROSECUTOR - DR COMODI - not true!

DEFENCE - AVV. Ghirga - Watch movie!

PRESIDENT - Lawyer! Sorry! Lawyer avoid these dialogues between legal is not the case. There were the questions asked the witness has already given an answer, said that even if he had found the objects would move a memo to his staff.

DEFENCE - AVV. Ghirga - But I do not know who did these things move.

PRESIDENT - I do not know who has moved, we have acquired these items.

DEFENCE - AVV. Ghirga - In this process does not know anything!

PRESIDENT - I'm sorry Lawyer, however, we avoid the comments, there will be time for them.

DEFENCE - AVV. Ghirga - No, we do not know who burned the four computers President, I must apologize, if the postal police or investigators ...

PRESIDENT - Lawyer! Let us avoid this, there will be time to

expose these considerations, however, we are now examining the witness who is here present, if there are any specific questions you want at the same place we did and we did believe in abundance, while also taking account of the special the heads. Please Lawyer.

DEFENCE - AVV. Ghirga - Excuse me for intemperance ...

PRESIDENT - NO, for comments.

DEFENCE - AVV. Ghirga - I apologize, that was a comment ...

PRESIDENT - No, maybe the comments will be time to make.

DEFENCE - AVV. Ghirga - We will make them again but at the Scientific Director of the State Police to ask if he knew I felt ...

PRESIDENT - Indeed, but was asked.

DEFENCE - AVV. Ghirga - I apologize, as we would be hearing a whole as to the fate of the President computers, sorry.

PRESIDENT - The point is to avoid comments that are not relevant at the time of the case.

DEFENCE - AW.Ghirga - The withdrawal and I SORRY.

PRESIDENT - Okay, please Lawyer.

**DEFENCE - AVV. DALLA VEDOVA**

QUESTION - I wanted to go a bit 'on the general discourse of control protocols, check list of directives that exist at the international level and at European level. In particular, when she reported that there are actually specific protocols at the international level, especially in the U.S., I seem to remember, for what concerns the investigation of a crime scene on access and repertazione.

ANSWER - In part, I said there is a culture more than our own, but in this field either American or Anglo-Saxon experience there is a finding of strict protocols that are suited to an activity that depends on actually changing ,

so it is impossible to predict.

QUESTION - But she confirms that there are more stringent protocols than Italian or otherwise of the procedures?

ANSWER - I do not know them.

QUESTION - You said at the opening.

ANSWER - I can tell you that we adhere to all'ENFI, as I have said, which is the network of European forensic science institutes, the rules that are exchanged by experts, who are divided into subgroups, there are explosives experts, experts from fingerprints, experts from biology, the rules they are exchanged used by everyone, this is a bit 'our house reference in the technical - scientific.

QUESTION - In fact the question that I ask is if she was aware if there are protocols or check lists, as she had reported at the European level?

ANSWER - But in a detailed, rigid, codified no, I know.

QUESTION - This forensic science institute that she reported to the directives?

ANSWER - No, not directives, emphysema would Europe Network Forensic Institute, ie the network of European forensic institutes. Since participating persons who are experts in each topic criminalistics, and in each subgroup, everyone says its so maybe my biological often give their contributions in Europe to German or French or English, then it may happen that a Dane gives its experience, however, is not laying down rules in the sense that those who do not use this to touch the small pizza comes out of the circuit, there is no such thing.

QUESTION - But especially for what concerns the activities of her laboratory examination showed that in Europe there are certain protocols?

ANSWER - Yes, I said that. I said that in the laboratory we follow

European standards, there are standards so much so that when we, for example, with biology, to unify. our database, the DNA databases must have the same standards, but this is a historic speech. So I have already said this, I meant then, when I went on in his speech to the survey, which is mutable. In fact, I said, if I remember correctly, that since the laboratory gives a track, the extraction of the profile follows a procedure that is more or less the same, like a chemical examination, then I'm no expert and I say terms a bit 'so, of a substance is always a process. Those standards are unique which is a uniform and if you do not follow the standard is coming out probably by a valid result. But this is what I know from my staff who tell me, I in a lab in my office have never entered except to greet the staff, so I do not know, talking about standards do not even know what ...

QUESTION - Also connected to this she talked about the importance of databases, we reported the database for fingerprints, we reported the new, but still important for palmprint database and we also reported the important DNA database. The question is this: this database exists in Italy today?

ANSWER - What, the DNA?

QUESTION - Yes

ANSWER - No, no.

QUESTION - Is there a 'European level in some countries of common Ta?

ANSWER - Look at me, only Italy and Greece do not seem to have the DNA database, in Europe everyone has one, even the countries that joined recently, including Romania and Ukraine, the DNA database.

QUESTION - The database comes from the European community, is a directive coming from the community?

ANSWER - No, no. In Europe that is emerging from an agreement that the agreement (Proum), there is the connection between the databases, nobody in Europe can force us to have, to establish a DNA bank so much that did not make 'we have and we are not excluded.

QUESTION - The origin is the international agreement between states.

ANSWER - But when we we'll have, and I hope soon, because we are also adhering to the same law to the treaty (Proum), adhere to the connection of databases.

QUESTION - So I can confirm that there is an international treaty between states on the subject that establishing this bank, and of course European banks ...

ANSWER - No, not a European bank, the agreement (Proum) says: "Who has the DNA databases can be connected in a network", ie, no single database that you do, watch out, because they are sensitive data, each holding his own, not only the Germans but when for example, when we are then connected, we will send a profile to say "this profile is in your database?", we could only say: 'c' is, "rogatory then you are going to identify that profile. So instead of writing a letter, as is done now, and send a profile via Interpol to the headlights States asking those who have it in their base will be automatically given an answer to the question that there is no identification.

QUESTION - But of all the country that are part of the European community she said that Italy and Greece do not have this database today.

ANSWER - About Italy I'm sure, I do not know about Greece ...

QUESTION - Can we therefore say that we are lagging behind the procedure?

ANSWER - Yes! Unfortunately, yes.

CIVIL PARTY - President ...

PRESIDENT - We acquire these items.

ANSWER - It's interesting.

DEFENCE - AVV. DALLA VEDOVA - It is interesting also because it will be a topic of future valuation that is very important in this process.

PRESIDENT - We carry.

DEFENCE - AW.DALLA VEDOVA - So again I ask you as an expert and director of an important office as it believes it is important to have a DNA database?

ANSWER - Yeah, for investigative purposes ...

QUESTION - Why?

ANSWER - I'm saying, for investigative purposes and fundamental, ie where the perpetrator of a crime has no connection with the victim, and is an author of a crime of passage, whether a murder Or a rape, I speak of crimes where there is a release of biological traces and then the investigator does not have a connection, or data vittimologici then driving to get to the suspects and make a comparison, the database gives me an identification of a person who committed a murder Rome to Bologna or even disappears even when we are abroad connected. So has a huge investigative value does not affect the level of laboratory testing procedures, nothing to do, is not a tool for the operator of the police but for the scientific investigator. So will have a space greater than suspected, that in addition to the suspects ...

PRESIDENT - All right.

DEFENCE - AVV. DALLA VEDOVA - The fact that there is no database has an influence on today with an analysis of the results of an investigation?

ANSWER - No, I said that the database does not have any

significant technical activity - scientific extraction profiles, the only difference I repeat, is investigative.

PRESIDENT - I'm sorry, I beg, however, does not extend there too, and we wait for the answer you need.

DEFENCE - AVV. DALLA VEDOVA - is the office manager and I wanted to take advantage ...

PRESIDENT - Well, but is not that we can tell the office manager and knows all the concepts, only those that are relevant to the subject of the process. Please Lawyer.

DEFENCE - AVV. DALLA VEDOVA - But the reasonableness of a search of DNA, not talking about the procedures, it is clear that even if today we had the database in Italy the reliability of a result about the determination of DNA would better in your opinion?

ANSWER - Absolutely not. Look in the field of forensic genetics to the Italian Scientific Police and Carabinieri Racis, I put them together because we work with a lot of harmony, is unrivaled in the world, not in Europe, sorry. In the field of genetics ...

QUESTION - No, no, I did a different question.

ANSWER - No, you're telling me the lab procedures.

PRESIDENT - I'm sorry, the witness has answered the question by saying that the absence does not affect the reliability of the result of the database and then did a. Further addition we heard: Please Lawyer.

DEFENCE - AVV. DALLA VEDOVA - but for what it concerns, she said arciordinamento with the Police Forensic Science Laboratory of Perugia, I wanted to understand the exact relationship and because all items have been sent repertati Rome. That is the question I ask is because specialist equipment was not available?

ANSWER - I Look I can tell you that the equipment to amplify, the

cost to extract DNA from 5 to 600 thousand euros and we have three branches.

QUESTION - I did not ask the cost, were available?

ANSWER - No, I'm saying that we have three locations in Italy, maybe we could have it anywhere.

QUESTION - So the answer is "yes, there were no facilities in Perugia and was sent ..".

ANSWER - No, not that Perugia is a home neglected and not have it, I'm explaining the structure.

QUESTION - I have not told me ...

PRESIDENT - I'm sorry, where are these three important sites that have this equipment?

ANSWER - Biology Of Rome - Naples and Palermo, but also in other areas there is anywhere.

PRESIDENT - I pray.

DEFENCE - AW.DALLA VEDOVA - But she also told of the existence of dates based on the staff performing the investigation. You choose the dates you have this base?

ANSWER - No, because we do not have the database, however, we have, because he said the basic dates and I answer correctly with respect to your question, because we do not have the DNA database does not have the dates elimination bank.

QUESTION - Even for fingerprints? ANSWER - No. fingerprints yes.

CIVIL PARTY - Let's end the President answer, or else ...

PRESIDENT - Yes, it was ending.

ANSWER - Our operators, as I said before, have issued a voluntary course, in the interest of promptness of laboratory activities, fingerprints and biological traces but the dates are not based because we have not given a base.

DEFENCE - AVV. DALLA VEDOVA - I demand, then you have a base date of the fingerprints of persons involved in this particular

...

ANSWER - We have no dates based'm saying, we have a given base is the AFIS fingerprint of persons who may be identified according to the law.Operators in the margins, to avoid, when *there is* a risk, one that has touched aweduto, assessors do not need the basic dates ...

QUESTION - And then there is a basis of the dates ...

ANSWER - It is a given base because I can have labels.By comparison to the exclusion dattiloscopisti, which have seen millions, put them side by side and say if there is discrepancy already, then just a card, a sheet of paper where there are my impressions, the operator will, Bohemian type who is 35 years of fingerprint puts a mark next to and say that is not mine, it says right then to do a job well done .. .

PRESIDENT - Well, we heard in this profile.

ANSWER - There is a basic dates though.

DEFENCE - AVV. DALLA VEDOVA - I'll give you this question because in the report especially on fingerprints appear to be a number of fingerprints that is not allocated, you remember?

ANSWER - Yeah, I remember.Rinaldi will be more precise, already say ...

PRESIDENT - Well, so the Question?

DEFENCE - AVV. DALLA VEDOVA - I ask you kindly if you have not allocated these 14 checks made with the officials who were present at the crime scene?

ANSWER - First Look at 14 because I have seen no reference to how exactly we had stressed the distinguished lawyer and first impressions of undistributed profits.When a mark is not helpful to say that is a good piece but did not, as I said, the minimum points necessary to make a comparison and

there are several unattributed.

PRESIDENT - But Excuse footprints in the category so we have not been allocated within the footprints do not even useful?

ANSWER - Yes, on this 14 does not know .. .I will be more accurate, however, is the engineer Rinaldi who did this to me are only three useful fingerprint unvested, two are on a calendar that should be top of who sold this calendar, and another is on the outside the door of the room that could be, perhaps This is the only case, could be a key player on the forensics, are excluded, an operator that can be addressed to those who stepped in sooner or later when they took away the body which is outside of the door or could probably be when it was broken.

PRESIDENT - So these three tracks on the calendar are two and a there?

ANSWER - And there, I remember this but the engineer Rinaldi on this will be technically more accurate.

PRESIDENT - Well, I pray Lawyer.

DEFENCE - AVV. DALLA VEDOVA - But I just wanted to have a confirmation, you can not rule out that the fingerprints of the control of operators has been performed?

ANSWER - No, how can I exclude?!

QUESTION - You just said that one of these prints could be (...) means that it has not been done.

PROSECUTOR - DR COMODI - not the lab said.

ANSWER - I can not do. for practitioners in the State Police or the forensic or mortuary, I say to those of the Scientific Police intervened have left a fingerprint, and excluded one hundred percent.

DEFENCE - AVV. DALLA VEDOVA - This is not information that should normally be in the official report and then on all the

tracks?

ANSWER - No, because the answer ...

QUESTION - Why is there no mention of this.

ANSWER - The answer to the questions is whether an imprint on the scene of a crime is attributable to a subject useful to the investigation. If the operator mistakenly left an excluded those for ... as they say in ten fingerprints if there are three of the inhabitants of room, the room, you give only the positive or negative unallocated.

QUESTION - But the doctor's report, on page 5 of your report on the impressions made by the central management of crime where we talk about number 14 unidentified fragments useful, including the one who mentioned her on the calendar, and also remember the relief, for example B "palmprint probably impressed with the substance blood on the pillow," and I assume that the cushion was there near the victim, she would ask that these be excluded. ..

ANSWER - I'm sorry, I when it is this relationship? He tells me the date, this seems to me at an earlier stage, not final because if I talk about the blood plantar ...

QUESTION - The report was submitted on November 17 with a note ..

ANSWER - But that is partial excuse, is not the final one, which is why the 14 .. there is still that of blood is identified. Rinaldi restores it to him, but are not 3 and 14, is a phase, it is not completed.

PRESIDENT - So this is the report of November 17 Lawyer?

ANSWER - Is this interlocutoria.

DEFENCE - AVV. DALLA VEDOVA - Yes, it is November 17.

PRESIDENT - And then there interlocutory highlights the well heads which states that this issue was examined by Rinaldi.

ANSWER - Yes, yes.

PROSECUTOR - DR COMODI - Maybe it would be useful to point out that the survey also covered the apartment below.

PRESIDENT - Yes, yes, then maybe we will put questions to those who are interested in this aspect.

DEFENCE - AVV. DALLA VEDOVA - I'm sorry about this comment I have to show it then that the final document as the witness to see if he recognizes, at least the page that interests me because I can show it to him the report entirely, but it is quite detailed and we have no time, fragments identified are useful not indicated on page 5 .

ANSWER - Who signed the report, please?

PRESIDENT - Yes, maybe we can show heads who can ... We can take the report and show it to the witness, the other parties know the same.

DEFENCE - AW.DALLA VEDOVA - Cesarino Iaquitto, Anthony Andreozzi, Primitera Joseph, Peter, Bohemia, the director of Lorenzo Rinaldi, director of Maternal, 16 November 2007, conclusions, so it's a report with conclusions.

ANSWER - Can I see.

PRESIDENT - Yes.

DEFENCE - AVVD.A ALL WIDOW - What interested me was on page 5, which now heads to the monster.

PROSECUTOR - DR COMODI - No, if you show it to him the whole way President also realizes the overall object.

PRESIDENT - It is then brought to the attention of heads report particularly with regard to page 5. With reference to this page 5 asked Attorney?

DEFENCE - AVV. DALLA VEDOVA - Was wondering if when it comes to unidentified fragments were tested in these 14 operators who were present.

ANSWER - I think so because I was told that no none of ours, but

this I have not signed and I can not say anything about this.

QUESTION - The photo with the Sferon we have seen, in fact we saw one ...

ANSWER - A room, yes.

QUESTION - The image of the room reminds you that are now been made? There is a report?

ANSWER - I do not remember.

PRESIDENT - This Sferon when it was made?

ANSWER - What I know at first, beyond the first speech that there was documentary in the early invasive interventions, amending, which were then made.

QUESTION - On what date?

ANSWER - On November 2, since 2, definitely since the afternoon or evening of the second.

QUESTION - Thank you.

#### **Prosecutor-DR COMODI**

QUESTION - Doctor to return to international databases of DNA, beyond the fact that Italy does not have a database of their own, that the doctor has questioned Stefanoni international databases which are inserted DNA, this is or ask him to Stefanoni?

ANSWER - Can you be more precise but I honestly do not think, that you wonder if there is a track that is not identified.

PRESIDENT - If the results. ANSWER - No, I am not.

PROSECUTOR - DR COMODI - And I've questioned the databases of the Y chromosome?

ANSWER - Probably yes, now this is not ...

PRESIDENT - Probably yes, she is not that is for sure.

PROSECUTOR - DR COMODI - Exactly Stefanoni to ask this, these are

all questions that I should not do to her, however I do to force them to him. Do you remember if the floor of the house are the remains attributable to biological urine, that then can then be transferred to you dragging? ANSWER - NO.

QUESTION - On the hook because this is the concept?

ANSWER - No, the biological traces of the profiles are identified in the reports and those attributed to Sollecito are those in relationships. Now I do not know in detail, but I know that have been found in other parts of the house.

QUESTION - No?

ANSWER - No, no, absolutely.

QUESTION - Do you know we were on the drying rack, drying rack where apparently rely on the cabinet doors do not know for how long, but that in fact there there was support on the drying rack clothes or biological traces attributed to Raffaele Sollecito?

ANSWER - I do not know, but I was told it would have been covered in-depth analysis, so we do not think we were hanging their clothes, they would, been subject to.

QUESTION - If there were no traces on the drying rack biological, and ask where it is due, or dirty clothing obviously Raffaele Sollecito, the doors may have transferred the DNA of Raffaele Sollecito on the hook?

ANSWER - No, except that if there was a biological trace of a person obviously can not be transferred elsewhere, but even if it were necessary to see that biological trace is and what kind of contact is. And in any case if there is, for example, a pavement which leads to an obvious consistency biological trace around a person would find not one but more than one short because there is a diffuse transport of this track.

QUESTION - Between 3 November and 18 December, that his men were

so with his hands in hands waiting for further directions or have engaged in activities that have also led to the decision to December 18 seconds back to visit?

ANSWER - The directives often, as you know, are stimulated because the technician obviously unconditionally to us, I put myself there beyond the court, investigators have inputs so there is a task delegated takes place, even an activity of the initiative suggests that those who should authorize it, or is carried out and then there is surely also an assessment for the work done, as I said when they reviewed the survey that those who are thinking then intervened to perform other activities that have decided to do, then surely there was this initiative.

QUESTION - No question.

**CIVIL PARTY - MR. MARESCA**

QUESTION - It is to his knowledge of the activities that were carried out between November 4, date of expiry of the first operators' access to the lab to her direct and 18, that we can relate these days about what you are dedicated and if have made other visits to other homes, if you remember, laboratory findings, examinations etc..?

ANSWER - Yes

QUESTION - If it is aware.

ANSWER - Yes, yes, now in detail the number and dates not, however, immediately after the visit of 2 to 3 nell'awio of investigations have been done next to investigate activities of the Judicial Police in the strict sense of inspection activities also in various situations, the home of Rudy Guede was identified when, in the home, if I remember correctly, even in the pub at the time of Mr. Lumumba was investigated, the home of Sollecito, in short,

were made in the access activities investigative side-preventive activities of inspection and better science.

QUESTION - With use of Luminol also so very complex?

ANSWER - Yes, yes, with so many possibilities that we have to find some traces are not evident, as unfortunately we are not visible to experience often.

QUESTION - Thank you.

PRESIDENT - There are no other questions, you may go. It is recognized that the documentation has been filed on the survey.

THE COURT suspends the process.

THE COURT resumes the process.

PRESIDENT - At 12.40 pm the sitting resumed.

PROSECUTOR - DR COMODI - So President I would have a request, even if a request is not astringent, say a proposal rather than a request. Since the next two texts are the two policemen of scientific laboratory in Perugia who spoke for the first time-and they did the first time together, sharing tasks and working simultaneously, but because their testimony is essentially descriptive and will be accompanied, at this point I I think it is absolutely necessary to avoid further confusion to the screening of the movie that is long perb, the movie that was created by the arrival of the Science of Perugia to the hills all the time and I wondered whether I should ask the Court to hear the same time, maybe leaving each of them commenting on the pictures or descriptions of activities that each of them has activities that are completed but such a different filming and the other pointed out, something like that. But I repeat, I say at the proposal and if they agree

the defenders because otherwise there is no problem to hear them separately.

PRESIDENT - The two texts would be?

PROSECUTOR - DR COMODI - would Brocci and Cantagalli.

PRESIDENT - On this request is no opposition?

DEFENCE - Let's Go as.

PRESIDENT - So there is no opposition, and we can hear them jointly.

PROSECUTOR - DR COMODI - Although partially relate different circumstances because, I repeat, their operations have been different but at the same time so not much time to earn but how much to offer even more comprehensive picture of the movie to comment.

PRESIDENT - Well, if there is consent of the parties to this mode of examination of the two operators.

DEFENCE - AVV. MAORI - There 'ènessun problem, though I'd just like to point out that at the last hearing we asked the same thing in relation to Dr. Liviero and Professor Malchionni and the prosecutor has not given consent, but for us there is no problem.

PROSECUTOR - DR COMODI - Because the situations were different.

PRESIDENT - I do not remember this detail, but every time we evaluate not that what you do in a case should be ...

PROSECUTOR - DR COMODI - But I repeat that it is a proposal.

PRESIDENT - Or if the first heads out across the range of possible questions we will be waiving the second.

PROSECUTOR - DR COMODI - so why not detect a trace and the other films, so if there is consent or else ...

DEFENCE - AVV. MAORI - Perhaps it is better to proceed as normally required by code.

PROSECUTOR - DR COMODI - So call first Cantagalli.

**Deposition OF WITNESS - CANTAGALLI CLAUDIO**

THE WITNESS, a warning under ART. 497 CODE OF CRIMINAL PROCEDURE,  
THE LAW OF RITUAL FORMULA.

GENERAL: Cantagalli Claudio, Chief Inspector of Scientific  
Perugia, born July 4, 1959 in Cagliari.

PRESIDENT - Remains of Understanding indicating shown for the  
first mode of proceeding in open court or behind closed  
doors to view the images that the prosecution wants. Please  
prosecutor.

**PROSECUTOR - DR COMODI**

QUESTION - Inspector I anticipated the Court that I think it's  
time to see the movie relativu to visit, but if you want  
to describe to the Court preliminarily when he was warned,  
those who have felt, more or less what time, when came the  
first place, with who he was, he was dressed, the apparel  
- scientific, I do not care as he was dressed.

ANSWER - On November 2, clearly speak of 2007, around 13.30, the  
trading desk contacts me by phone and informs me that  
there was the discovery a corpse. At the moment I am asking  
for information we did not know if it was a homicide,  
suicide or other type of death, were I in the office, the  
Assistant and the Assistant Palmieri Mountain, and with  
them the equipment that we normally come supplied with the  
machine in place, then leave around 13:40 to  
13:45. Meanwhile I finished the chores of the day meeting  
with a quarter to two, at most ten to two Assistant Brocci  
asking me, as did the afternoon, I asked if there was any  
news, I explain the fact, and she says' okay , finish what  
you have to do while I'm Mountain and feel for a moment

what the situation and then decide what to do. "After five minutes I go back to the office, informs me that he had actually spoken with one of the assistants who were there and that was murder. So we prepare the rest of the equipment, and other suits, equipment to support short and we go there. I think we went on site with a colleague of Mobile, but now I do not remember exactly why our car was clearly already in place with other colleagues, we arrived there at 14.30, between 14:25 and 14.30, now just clear I can not be. Once there we saw that they had already identified the area briefing, in the sense that it is an area outside the crime scene where we arrange the equipment that is neither too far nor too close, but a good place where you can easily move the equipment between a person and another but that does not go to be too close, ie, that there is no danger of pollution. Inform us of the situation, then we dress both I and the fellow Brocci for early access to observe the situation as it was, in fact our survey consists of three things, then basically, observation, setting all that there 'is and the documentation, with both verbal that with the photos, movies etc.. etc.., anything that competes. So we got dressed I said, we entered the first entry, just after the door ...

QUESTION - Excuse me for interrupting the area inspector briefings, as the Court has made the site visit, where you located?

ANSWER - The briefing area had been identified there under the arbor, right under the pergola, about six feet from the door of the house, so there where they have laid all the equipment and where there was a bag of rubbish where were tearing the old overalls, gloves etc. etc.., and then a

zone specially arranged for the various ...

QUESTION - before she and the Assistant Brocci strayed the other two what had they done?

ANSWER - Yes the equipment that had already provided was clearly placed there in the area, they were already dressed so they were already equipped with overalls etc. etc., overalls, than ours, white suits, had already placed the equipment that was intended, then the various series of letters etc. etc., and had made a first reconnaissance of the area, clearly identifying the places, because we use a methodology to do these things, in the sense that you look to see if I have a theory of blood on a hallway clearly small enough to go identify a place where I can move without making a mess, quotation marks, without risking the very least to cover his tracks. So we have shown that there was just the entrance, just past the entrance, so the theory of small drops of blood that were near the kitchen, we all agreed on a passage where you can always move from right to left, walking around and trying not or at least as little as possible to retrace our steps and checking all rooms in the apartment before deciding how to proceed with the establishment of the tracks. So we checked everything, of course we did before the bathroom because ...

QUESTION - The big bathroom?

ANSWER - The large bathroom.

QUESTION - What did the words?

ANSWER - That stool, the bathroom near the bedroom of Mezzetti in a nutshell.

QUESTION - Yes

ANSWER - Mezzetti Then the chamber, the kitchen area at the time that we have found in the order and so we only observed at the time, so we went full circle and we went into the

chamber of Romanelli and we have seen from outside, we controlled, then clearly we continued down the corridor, near the clothes line and etc. etc., we got to the room of Miss Knox, of the victim's bedroom and the bathroom small. We made a point of the situation, we have returned to the area just after the entrance, so we decided to set up the scene of the crime we as a crime scene should be secured as soon as possible because it is clearly in a survey just open the door and is a What is clear, already the ambient temperature changes, can also be indicative some situations. So as soon as possible you should try to secure the crime scene, so we decided to do so, which I quoted ...

QUESTION - Prepare meaning?

ANSWER - Set up means all tracks, the less obvious ones *and* those considered important for the continuation of the investigation at least first and mark them with the letters we use, because then the Marking of these letters we then have to go after taking minutes which is descriptive. Should be measured, so they are spatially identified and then measured and clearly if there is (rinferimento) metric with a letter, then the situation is not ... Given the complexity of the crime scene after myself clearly suggested by the manager of the Rome I felt my situation.

QUESTION - What would it be?

ANSWER - It was Dr. D'Errico, the manager because we depend dell'anticrimine dall'anticrimine. So agree with you ... I decided after I went out with others from the crime scene, so I was there in the briefing area where we had the equipment and stayed there, I was in contact with the manager, I contacted Rome, I explained the situation

clearly, and they confirmed , spoke with the head of the DCA and we decided that we would set up the crime scene after the two teams would be added unto ERT, so fingerprints and biology, for the following sampling and repertazione all that concerned then each of them, their specifications .So then I have remained there until 15:20 to 15:30 off as needed big letters, small letters and then I passed without the equipment they succeed every time, because otherwise you would have to change. At about 15:30 I got to the camera in the apartment and went downstairs to a first input, we checked the first entry and then also there, given the situation, when there were no visible traces, I also asked the Board Rome, and even there they told me: "there too close, and we do what we come tomorrow", then we say that there I did more or less half an hour of shooting, twenty minutes, we checked roughly every room, we closed and we postponed the visit until the next day.

QUESTION - In the apartment below?

ANSWER - In the apartment below.

QUESTION - Some boys.

ANSWER - Yes, yes, let's say we talk about the basement. Up to a quarter to five, 16.45, I continued to act as an intermediary to handle the situation, to move the equipment to see if they need something. Around the 17 came the first team that ERT was that of Dr. Giunta fingerprint. I put them aware of the situation although they entered, so I explained the issue that there were biological samples etc.. etc., so our survey provides that where there are both biological findings that latent prints, clearly one thing clear, because powders are used, materials are used as chemical fingerprints, where there

are also biological samples must be done first biology and then the prints because otherwise we risk voiding.

QUESTION - that is, hidden latent impressions?

ANSWER - Footprints unseen, latent in the sense that they are on a surface that are enhanced or vehicles, such as the magnetic powder or magnetic means or by its chemical - physical as foreign cyanoacrylate, one of two types. So I explained the situation, then 'they are dressed, they checked the kitchen, the bathroom and bedroom of Mezzetti and have decided that without invalidating anything could start working in the chamber of Mezzetti and area of the kitchen, the sink, but this clearly can report on their best. With them I have clearly re-equipped, I went and I gave the change in Raffaele and I started shooting I do.

QUESTION - Raffaele Mountain?

ANSWER - Yes, the Assistant Mountain.

QUESTION - So to a certain Mountain filmed?

ANSWER - The shots we say they are up to 16 ... I can not remember exactly why it is that recovery continues, of course.

QUESTION - But there's so much time on camera?

ANSWER - Yes's about time it should be clear to the camera, unfortunately for our forgetfulness, being that it was close to the time change, the camera is one hour ahead.

QUESTION - So there's daylight savings time?

ANSWER - C 'is still summer time, unfortunately, by October 31 there were no inspections occurred and fortunately we did not change the time, was an oversight then the camera will show the entrance to the house, the first entry made by Palmieri Mountain and at 15.10 when in fact it is 14.10.

QUESTION - All right.

ANSWER - We then continued with the various operations, so the

description, so I was filming, maybe I would stop for a moment, helping Brocci links in the description because it is a fairly complex, said that it seems simple, but describing a room, any one, with all that is, describe it with a pen is a thing long enough.

QUESTION - The describevate orally in the sense that the voice was recorded on camera or you wrote ...

ANSWER - No, it usually is the operator that takes notes, we call them notes, however, notes in a case like this is something almost complete in the sense that we keep a desk, a door, a window, what and must be adequately described with words. It can happen that sometimes maybe the operator has problems on a term and consult on the other, or maybe I listen to what he says and if I see, I say: "But is not that better?", we do try to describe the best and then never to return because otherwise you have to start then after all the photos and check them one by one, check the description in the drafting of the report and therefore should always take detailed notes in the first place, so after the job is a little ...

QUESTION - The movie was shot simultaneously with the photos, ie photos and video footage is being made simultaneously by two different operators?

ANSWER - Yes, the photos made them almost exclusively and only the Assistant Chief Palmieri is why we say the most experienced of photos, because clearly we do things ... for example, in that case I am not expert because it was not even a year that I was the Scientific and therefore also for what I decided to make the first visit to them, not a matter of degree or powers, but at least the Experience.

QUESTION - Given that we have not even mentioned to tighten a

little 'list texts that would be redundant.

ANSWER - So say we were all present.

QUESTION - Precisely, we will see in the movie, but she has a notion of what had already been done by Palmieri and Mountain? They had already started the construction of the crime scene or just ...

ANSWER - Before they arrived we ...

QUESTION - Or just shooting.

ANSWER - No, because it works like this: the first shot is made clear with the crime scene is not staged because it must be checked even if the actual state set up the crime scene does not mean change it, that just about put us where he references After we measure, to photograph, because the finding may be photographed and filmed before and clearly I speak only of digital media, can be photographed and filmed before the acquisition of letters, whatever, of the arrows to indicate them, and even after clearly, so you can see the original photos, quotes, one that looks really *and* then when that is the letter of reference metric, then also to get feedback that is actually the one.

QUESTION - You said that you show all the letters with clear traces, meaning clear evidence ...

ANSWER - Those who see themselves.

QUESTION - Traces of blood, footprints, fingerprints, these things here.

ANSWER - Yes, everything is clear, what you see.

QUESTION - And then he said all the other important things.

ANSWER - Yes, the other important things.

QUESTION - So also objects?

ANSWER - We put the case that we had seen a knife in the hallway or some other object ...

QUESTION - Dirty blood maybe ...

ANSWER - But not dirty but not put in place appropriate to its use, if those we have observed, say, in the kitchen were washed in the sink so they can be important but maybe a lot less stuck in the door of a door. The location is just one thing for us is much more evident.

QUESTION - So *the* spot assessment of the significance from the standpoint of scientific investigation and who does it?

ANSWER - We do it all, clearly all those who are on the scene of the crime.

QUESTION - All players on the scene of the crime?

ANSWER - All operators, of course.

QUESTION - What then is an assessment that is binding those that come after, for example to the ERT?

ANSWER - No, absolutely not, that is, in the sense that ...

QUESTION - Neither positive nor negative I guess.

ANSWER - No, neither positive nor negative of course, because if we repertiamo, I think we've done a hundred ... I do not remember how many, however, a large number of finds, if then the ERT believes that there is some other interesting finding that they are not bound by our crime scene.

QUESTION - Or conversely, if it considers useless ...

ANSWER - Or conversely, if something is not useful to us, however, we document it is not taken, it is normal practice.

QUESTION - You tell me if what else to say from the point of view, otherwise I would say you start to see the introductory movie. Her face the operator also in this case.

ANSWER - Only I did not bring a copy of the movie.

QUESTION - I have it.

PRESIDENT - I'm sorry this movie is also the victim's body?

ANSWER - If the movie is so full.

PRESIDENT - Perhaps the first to show, that is, until it is one

where the victim's body is covered by the blanket and sees only the foot we boast. When there be a picture showing the victim's body uncovered and naked as in other images we have seen maybe he does this so you have to proceed in camera.

ANSWER - All right.

DEFENCE - AVV. DALLA VEDOVA - Is this the video of 18, however, that the President has pictures of the victim.

ANSWER - No, I'm sorry to interrupt ...

DEFENCE - Can not be 18.

DEFENCE - AW.DALLA VEDOVA - Excuse me, yes, I'm sorry because there's 2 and 3, is the late evening of 3, you're right, sorry.

ANSWER - A moment because there is some transmission problems.

PRESIDENT - If there are problems we can do here for the suspension and see you in half an hour.

ANSWER - There he is, I think they found it.

PRESIDENT - We?

ANSWER - P has some problems I was president of transmission ...  
Yes, that's what.

DEFENCE - AVV. DALLA VEDOVA - President I've got here, if we want to ...

PRESIDENT - Yes, as long as you can see it and have the availability. It is recognized that we proceed to the vision of the classroom video made by the operators of the Scientific Police.

PROSECUTOR - DR COMODI - This is the video that made Mountain right?

ANSWER - Yes, exactly, this is the video that he shot the Assistant Chief Mountain.

QUESTION - Comments as well.

PRESIDENT - So we also see him again, recording the comment

operator in the time of shooting.

ANSWER: So this clearly at the entrance 14.

PRESIDENT - I'm sorry, the date ... 15.10 ANSWER - The time is one hour ahead and then is 14.10.

PRESIDENT - As pointed out earlier.

ANSWER - Yes, exactly. This is the area I mentioned that just past the entrance, the area where we gathered to take after consultation controlled environments, this area here, that we see here. This is the kitchen, the kitchen and living area on the right is the chamber Mezzetti and here behind the first big bathroom. This is the first bathroom where they were found then the feces.

PRESIDENT - bathroom or kitchen you see?

ANSWER - No, there is an anteroom and a bathroom, a dressing room where there is a mirror, sink and washing machine at the time when we walked in, then you can also see from the shooting was on, the light was still on function. This is always the interior of the chamber of the Mezzetti, is not yet released the operator. This is the room instead of Romanelli, the room dell'effrazione in short, where the glass is broken. Down there you can see the stone, at almost under the chair and the various disorders which then was in the chamber. Clearly the shutters and windows are in a situation in which they were first observed.

PROSECUTOR - DR COMODI - The stone is under the chair? ANSWER - It's all in hand, partly under the chair and is partly inside .. . a small part is within a mouth of an envelope that is on the floor and in part is under the chair, then, however, can be clearly seen possibly ... not much because the movie should be stopped, magnified, however, we see from the photos and possibly by Sferon.

QUESTION - This is the smallest bath?

ANSWER - This is the smallest bath near the room of Meredith. This is the room of Knox in the situation ..

QUESTION - This is the streak of blood.

ANSWER - Yes, the first. So this is clearly not the area still up, so no letters and no references, but as it appears at first glance. The footprints clearly still not talking ... this is the operator who made the movie, it's Mountain.

QUESTION - coroner was already there?

ANSWER - Well hearing the voice, yes, I was there when I arrived, however, was not inside, but the movie around ... do so, I speak there on time video so we always bearing in mind that we all understand clearly that is one hour ahead. Let's say the first checked that the coroner has given to the victim is around 15.20, then a few minutes, but they were clearly the 14.20, I want to remember. This is talking about is that Dr Lalli, the fingerprints are saying, not to ...

QUESTION - This is the strip on the wall first mentioned by Dr. Intini?

ANSWER - Yes, the keyboard on top of the bed. Are 15.20 and then 14.20.

QUESTION - This is Dr. Lalli.

ANSWER - Yes, that is controlling body. So it was not changed absolutely nothing, not even Dr. Lalli, that I want to specify it, it was only checked ... Here there was a phrase on which an operator, then there would also be reported speech.

QUESTION - I stop for a moment if it feels.

ANSWER - Yes, the phrase that the operator says, because the operator was speaking, I do not remember whether in the executive cabinet, do not know exactly, then maybe he can possibly rifcrirc, I heard that we seem to have said "We washed the sink," absolutely negative! The operator feels

good and I'll do if you suffer, says, "have - third person singular and first person plural - a hypothetical person who has washed ...", has expressed some 'evil,' a ' hypothetical person who has washed the sink, of course we did not visually see the tracks but with Luminol yes ", this is the clarification I wanted to do.QUESTION - All right. You can not go back?ANSWER - For the phrase doctor?

QUESTION - No, stop a moment. instruction on the mat.

ANSWER - Yes.

PRESIDENT - Always on the bath mat we talking about?

PROSECUTOR - DR COMODI - Yes, the small bathroom.

ANSWER - This is the small bathroom.If you want to know anything in particular ...

QUESTION - No, if you want to report something, you can already see from the very first movie ...

ANSWER - Yes, yes, of course here we see clearly and we seemed to us immediately footprints, then we expect that other experts confirmed this, but seeing as well, taking into account the type of carpet in the bathroom, seeing the shape of the impression of blood on the mat to me and to others it seemed clear that they are the footprints left by a foot impression.

QUESTION - Then you know this print, what kind of analysis of this imprint was made?In the sense has been made both the analysis that the analysis of biological imprint?

ANSWER - Yes, look I can not report to one hundred percent safe ...

QUESTION - clearly not on the conclusions of course.

ANSWER - I know that have been made both biological analysis of the sign of an impression made by dattiloscopisti then cho then compared the fingerprints and have superimposed on the drawing.

QUESTION - With those of Raffaele Sollecito.

ANSWER - Clearly I can not report on because I did the investigation and therefore absolutely.

QUESTION - All right, let's move on. Also on tap is a trace of blood?

ANSWER - Yes

QUESTION - But perhaps we see it ...

ANSWER - Well it looks better on photos.

QUESTION - you also repeat not?

ANSWER - Exactly, that is the repetition from the photos, then staged the crime scene. This is the room Meredith always, splashes of blood ... Now here is the video is stopped, the first part of video, and this is also what I did, of course, always remember to 15:28, which is the first entry in the apartment below.

QUESTION - This could also bypass it if the Court and the defense agree, given that the apartment below does not detect.

ANSWER - You tell me.

DEFENCE - AVV. MAORI - Go ahead.

PRESIDENT - The part of the apartment occupied by the boys.

ANSWER - It's flat as President.

PRESIDENT - We can also watch it.

PROSECUTOR - DR COMODI - The panoramic yes, but maybe not in apartment eventually.

DEFENCE - AVV. MAORI - (Unintelligible - overlapping voices).

PRESIDENT - I pray.

ANSWER - This is always the apartment below, the basement apartment.

DEFENCE - AVV. MAORI - We are also planting marijuana below.

ANSWER - I do not understand, sorry.

DEFENCE - AVV. MAORI - If we go on like this we see.

ANSWER - A moment that I find ...

PROSECUTOR - DR COMODI - Still behind, however.

ANSWER - Yes, the program is not very fast. Let's say a minute ago, starts from here, and this shot I made it, we say together into the first team ERT in the apartment, when I dealt with the Romanelli's room and kitchen. For here we are in fact at around 17.30.

QUESTION - But those who have put those letters?

ANSWER - These letters while I had gone under, along with colleagues from the squad for the input In the apartment below Palmieri, Mountain and Brocci clearly decided they were setting up the crime scene and there was already partially set up, then the traces were marked for us evident, then all traces of the (...). This was always a big bathroom.

PRESIDENT - Perhaps we stop before entering the room where Meredith's body and then we will proceed behind closed doors, the deck was removed.

ANSWER - Yes, the blanket was taken around midnight and forty.

PRESIDENT - So we can go on with this.

ANSWER - Yes, it is clearly not full video because otherwise it would be 12 hours of recovery.

PRESIDENT - I pray.

ANSWER - We say it is handling the corpse began around midnight and winds of the coroners.

PRESIDENT - Okay, before you get to that point ...

ANSWER - Yes, of course. This clearly is the second movie and it was done with more detail, so now I do not know if ... tell me if I should go ahead.

PRESIDENT - The letters you have to put even when the corpse was covered by the blanket?

ANSWER - Yes, certainly, but now it shows. Clearly the scene of the

crime, taking into account the President who is prepared to preserve it as the moment of observation. This is the room of stone, here we see that it is partially below.

PROSECUTOR - DR COMODI - That's the envelope?

ANSWER - Here it is seen that as the stone is partially under the seat of the chair and say it is the mouth of the bag to a piece included in the envelope. These letters clearly corresponded to the circular impressions of blood attributed to shoes, these letters we see in the hallway.

QUESTION - The numbers?

ANSWER - Yes, sorry, the numbers. Unfortunately, this camera has trouble focusing quickly, especially in environments enlightened few, and occasionally goes out of focus image.

QUESTION - I asked her the first ones were traces of blood?

ANSWER - Yes, yes. Doctor does not make a video that well because unfortunately the car we own has limits, with little light has its limits just focus and then tracks a bit 'weak, but the photo you can see very well.

QUESTION - As we see, by chance you know, because Dr. Intini of course he could not know, when it was placed Sferon?

ANSWER - The Sferon was clearly placed before the manipulation of the corpse, before handling the crime scene, then 'what you see in Sferon is the crime scene intact.

QUESTION - So before even the stand, then the position of the letters?

ANSWER - No, after affixing the letters. QUESTION - Who put the lab?

ANSWER - Yes, the operator of Science in Rome, those are tools that only they have provided, it seems to me that the operator was such Guidotti.

QUESTION - This explains the difference between the big numbers and small letters?

ANSWER - Yes, the big numbers usually . . . say and there's a precise protocol because then clearly depends from scene to scene, because a crime scene can be completely different from another, put the case in the midst of a campaign is very different than in a house. In this case, the letters identify large areas, small letters of the objects that are within the area identified the large letter, because clearly the finds are many and we have lots and lots of letters otherwise.

QUESTION - So different areas within the letters can be repeated?

ANSWER - Here we have tried not to repeat them or at least repeat them away from each other, though some can be repeated in different areas. For example would be "finding D1, D-2, D-3, or From".

QUESTION - The N refers to the strip or something on the nightstand?

ANSWER - It should be ... I framed the letter N and then immediately after the stain is probably referring to the streak of blood. This and that first impressions are the two that seemed of a knife resting.

QUESTION - This is the handle ...

ANSWER - The inside handle of Meredith's room.

QUESTION - Of the traces of blood?

ANSWER - Yes, traces of blood near the handle mechanism. Then there's the other that if I understand correctly that should start with repertazione I've always done. Here are the eleven five clear of 2.

QUESTION - That is at 23.05?

ANSWER - 23.05 exactly, it says here, but 3 is still on day 2. This is the biologist, the doctor who is going to repertazione; what you see is a light. . . , A machine that has the particular lights of different wavelengths and frequencies

of each type of wave frequency detects a certain type of biological specimen, such as semen, blood, saliva etc. etc. ..Clearly the movie while I was there photographing people

QUESTION - Who is this woman's voice?

ANSWER - The female voice is Dr. Stefanoni, the man is my colleague Chief Inspector (Sabatolli) again from the ERT team of biology.

QUESTION - What material are they made ...

ANSWER - tissue paper, paper towels, sterile tissue paper. Now about ten minutes they begin to discover the corpse, then maybe here ...

PRESIDENT - We can also ...

ANSWER - We say that in principle, since it is clearly sequential, I do not remember if it starts now ...

PRESIDENT - Then proceed at this point, since it can be shown that holds the image protection ...

ANSWER - No, I made mistake with the time because now I am here looking like normal time, no, there is still time.

PRESIDENT - Okay.

ANSWER - It is always an hour behind.

PRESIDENT - So it goes again ...

ANSWER - Yes, still proceed with the repertazione.

PROSECUTOR - DR COMODI - were hair?

ANSWER - Yes, there were formations hair.

PRESIDENT - Here we are always on the room ...

ANSWER - No, here we are near the victim's clothes in front of the room.

PRESIDENT - So the corridor

ANSWER - In the room of the victim and the Chamber of Knox, in the space in front of the hall.

PRESIDENT - near the drying rack?

ANSWER - Yes, these are the feet of the drying rack, then almost before we say.

PRESIDENT - This activity of said hair repertazione training?

ANSWER - Yes, then formations hair hair hair Hair, everything related. This of course, tend to be spelled out can be put together, there is no contamination in the hair, cutting it when the bulb is so even though they are put together, because you see them get together in the same envelope, which is not mixes with the hair or fur.

PROSECUTOR - DR COMODI - That does not mix the DNA from one hair to another?

ANSWER - No, absolutely not. Each hair has its own DNA, can also be linked together that there are no problems. That noise you hear is the cooling fan of the car that I was saying.

QUESTION - The first photographs of the fingerprints of biological surveys had already been made?

ANSWER - Yes, of course, say were made almost immediately, before and after the preparation of the crime scene but immediately say. Now from here onwards ...

PRESIDENT - Yes, then proceed behind closed doors on the basis of the case and hear about the parties relating to the need, already demonstrated in previous ordinance on how to conduct the hearing. Intervention of the pieces off the microphone.

DEFENCE - AVV. Ghirga - There was also the last time.

PRESIDENT - Yes, the last time you had this waived with the consent of the other parts which I think remains. So people are not held for reasons of its own motion or service they are leaving the classroom. It is recognized that from this point forward the vision of the movie takes place behind closed doors.

PRESIDENT - I pray, we can go.

ANSWER - clearly we still lack a bit 'but to avoid getting ...

PRESIDENT - No, no, okay.

PROSECUTOR - DR COMODI - It's always you who films?

ANSWER - Yes, here, yes, yes again, but very soon after I take the light and should another film Mountain Once while Brocci describes the corpse. Now I cannot tell the precise moment but maybe Mountain has already started, do not remember exactly ... behold, now definitely resumed Mountain.

PRESIDENT - You can also turn off other lights.

ANSWER - Here the doctor asked the lamp, as I said before, the . . , With the various lights for both the reliefs that other biological evidence on the body of the victim. So then here we have used . . . this is the ultraviolet light. These are the different frequencies of light, of course, to different tracks ...

PROSECUTOR - DR COMODI - The blue what it finds?

ANSWER - Ultraviolet highlights any biological traces, blood, semen, saliva.

QUESTION - Those with the gloves of another color is the coroner?

ANSWER - Yes, Dr. Lalli, gloves, medical examiner, has thicker gloves, are different. The other coroner, there was another medical examiner, Dr. Ceccarelli.

QUESTION - The assistant of Dr. Lalli?

ANSWER - Yes, yes. Are proceeding with a first vaginal swab and then to the morgue and clearly also the anal swab.

QUESTION - That is the foam lung was talking about Dr. Lalli?

ANSWER - A (..) foam.

QUESTION - Excuse me, what was quell'asciugamani Inspector?

ANSWER - Please Excuse?

QUESTION - This one steeped in blood where he remembers it?

ANSWER - This was not because he was dead beneath the olive-

green, was near the left side, however, we can see the pictures because I do not remember exactly, however, there was a bed on the floor and a towel.

QUESTION - This is the inside of the cabinet?

ANSWER - Yes, it is the inside of the cabinet. This is under the the victim's bed. This is the area just after the removal of the corpse.

QUESTION - The hook then, this is the first time it is put highlights?

ANSWER - Yes

QUESTION - Why?

ANSWER - Because he was under the pillow, which in turn was under the corpse.

DEFENCE - AVV. MAORI - We rievidenziare the image of the hook?

PRESIDENT - Yes, we can go, you hear otherwise under the heading that says "under".

DEFENCE - AVV. MAORI - If you can also comment it to the operator.

PRESIDENT - Yes ANSWER - If you want to stop then the image.

PROSECUTOR - DR COMODI - Yes

ANSWER - I think the minutes are also measures the distance from the wall of the hook, if I understand correctly. Here is the cushion that is not read what you see on the left, now here is a bit 'dark here but maybe it's clearer ...

QUESTION - It is very dark indeed. "Under my pillow," he says.

ANSWER - Here you can clearly see just the pillow with blood stains, there are not seen well off but I'm pointing with the pointer.

QUESTION - This was above the bed sheet?

ANSWER - Yes, but this is day 3, we are already at day 3.

DEFENCE - AVV. Ghirga - At noon and forty.

ANSWER - At eleven o'clock we started at noon and forty in the

video course. This sheet is always the victim's bed, a mattress cover that is not the sheet, such as consistency as a sheet or more less. This course continues the repertazione that has been going well on Day 3.

PRESIDENT - You had the correct time? ANSWER - No, unfortunately we did not ...

PRESIDENT - Did you continue with the same ...

ANSWER - It was our fault, I admit it quietly.

PRESIDENT - Excuse me additional letters when you placed? Discovered, removed the corpse is that when you put the other ...

ANSWER - The speech is here this day, I was not at the crime scene because this is something I did (...), but the bathroom did Brocci with the Mountain, so here I go I can conjecture.

PROSECUTOR - DR COMODI - I mean from here on so there's her?

ANSWER - No, I'm not there from here.

QUESTION - Then we can also stop and continue the vision with Brocci, as the Court considers.

PRESIDENT - Yes, we can also stop. The prosecutor has more questions to the witness?

PROSECUTOR - DR COMODI - NO, not the state.

PRESIDENT - So we can also pause since they are 14.15 and saw that the other parties should conduct cross-examination, that you suspend the hearing and will continue to 14.45 with cross-examination by other parties of the witness, who is then asked to recur at 14.45, the same invitation applies to all other parties present.

THE COURT suspends the process.

THE COURT resumes the process.

PRESIDENT - Then we resume, there are defendants, the defenders,

the Public Ministry, the Civil Parties are These operators also invite you to allow the resumption of the hearing. It continues with the cross examination of witnesses Cantagalli not know if the cross-examination questions of the parties need to be viewed still photos for which you are willing to proceed in camera, so if we can not resume the hearing in open court. Is that ok? Then resumed in open court acknowledged in cross examination that the parties do not feel that they must require viewing of photos that request ...

DEFENCE - AVV. MAORI - Or at least the photos do not depict the corpse of the victim.

PRESIDENT - Yes, however the photos do not portray the victim in a position to ask precisely how it is arranged, after hearing all parties, that we proceed in camera. Then he resumed the hearing in open court and the parties are invited .. . Civil Parties Please if there are any questions.

CIVIL PARTY - MR. MARESCA

QUESTION - A clarification, we then also the projection of photos of the visit?

PRESIDENT - If you think so.

CIVIL PARTY - MR. MARESCA - You have a disk of photos?

ANSWER - The pictures I have it on your computer but on this, so I have to ... hoping that ...

QUESTION - Since she repeatedly said that some ...

ANSWER - Yes, I have all our photos, our original ones.

QUESTION - What few details were more apparent in the photos is perhaps appropriate to pass those details on the photos I would say.

ANSWER - Yes. I burned just like the record and we do ...

PRESIDENT - It has the picture with him?

ANSWER - I have pictures.

PRESIDENT - Well, then we can take photos.

CIVIL PARTY - MR. MARESCA - So I avanzerei this request the President of the exhibition of photos, maybe quickly on what we believe is not important, then we will dwell on some details.

ANSWER - I have a few words in a file that is equal equal to the minutes.

PRESIDENT - So you can see it?

ANSWER - Hoping that the (..) help us.

PRESIDENT - Well.

ANSWER - So I'm ready, this is the file that is congruent, equal to the file of survey from which we printed.

PROSECUTOR - DR COMODI - I think the Court has already provided these pictures, right?

PRESIDENT - I think I recognize the pictures that are projected for the ones we have got to ...

CIVIL PARTY - MR. MARESCA - The Court has the volume with the collection of pictures, right?

PRESIDENT - Yes, yes.

CIVIL PARTY - MR. MARESCA - So I have no pictures on the other questions because so much is already at your disposal, only a question relative to the sheet that covered the bed. If we can specify whether it was a mattress or a blanket.

ANSWER - A mattress with the consistency ...

QUESTION - Or a sheet with four corners with rubber bands, if you remember, because the mattress is fully closed.

ANSWER - Yes

QUESTION - As the sheet ...

ANSWER - Let's see if ...

PRESIDENT - I'm sorry to ask this question, the need of scissors

was determined?

ANSWER - Yes

PRESIDENT - Because the deck was enveloped in that case were rather ...

ANSWER - Yes, that's right, because that's where the blood stains, however, may then ask about the biologist, however, there has been determined that the bloodstains were just confined to two small areas.

QUESTION - But she has no memory of what?

ANSWER - I looked like a mattress.

QUESTION - So close completely?

ANSWER - But now that you asked the question as well ...

PRESIDENT - I'm sorry, maybe we can get.T sheets have you found?The sheet of the bed separate from the mattress as she shows?

ANSWER - No, I think its not, it seems to me that it was just the one above it .. perhaps a sheet with the corners to use mattress covers.

PRESIDENT - But on that mattress was then ... the mattress, then there was under a sheet?

ANSWER - What I remember I did not.

PRESIDENT - Another sheet is not it?So there was only one ...

ANSWER - Although,. Repertazioni I repeat I have not done so I could say things are not exact.

PRESIDENT - We avoid even the images of the victim.

ANSWER - There he is, here you can clearly see.

PROSECUTOR - DR COMODI - The corners are not seen but ...

ANSWER - But you see that .. perhaps just below the elastic is well defined because the parallelepiped shape with the bed.

PROSECUTOR - DR COMODI - However the bed was so?ANSWER - Just like that This is the scene untouched.

PRESIDENT - What is indicated by the number 8?

ANSWER - Yes, the area yes, exactly.

CIVIL PARTY - MR. MARESCA - No further questions

DEFENCE - AVV. ROCCHI

QUESTION - I refer to the minutes of inspection to its signature of November 2, I wanted to ask why the record that is dated November 2 and was completed on December 28?

ANSWER - Completed?

QUESTION - Yes because it is the last page of the report.

ANSWER - I CAN?

PRESIDENT - Yes, we can show the heads . . .

ANSWER - You tell me at the end?

DEFENCE - AVV. ROCCHI - Yes

DEFENCE - AVV. Ghirga - Page 17.

ANSWER - That's right. This is the formula that we put more and as the minutes of inspection is made clear, it says: "given the need to link all the tests that were done" in this case the file, the first we did not is on computer, but with printed photos. Then there was the need, but it's a normal thing is normal practice, as long as it is recognized when it starts and when it ends.

QUESTION - Then when he was physically prepared?

ANSWER - Materially was prepared in the following days, however, to conclude ... that is written is written in about a week, maybe even less, to conclude, that the minutes for me is concluded as an operator from the lab when I have the verbal description, photos, any record of the seizure of exhibits etc. etc., when I joined everything I close the minutes.

QUESTION - But then is written in pieces, not everything is written in the same ...

ANSWER - A part that the record is traced from the notes that we

take on the spot, as I explained before, so say good or bad is put into a fair copy of what later was the site visit, the notes that were taken there. So then, taking into account all the needs that gradually occur during the compilation of the report just because you have to double check some photos, some details, maybe one with writing .. . one with the writing, it happens, for example, I write very badly as calligraphy and then sometimes I go to check to see if maybe a photo actually ...

QUESTION - So there have been several versions of this report?

ANSWER - NO!

PRESIDENT - No longer versions of what we are ...

ANSWER - No, no versions, absolutely, this is the minutes.

PRESIDENT - More moments of writing.

ANSWER - More moments of writing the minutes and then provides a report of inspection that provides technical assessments indicate where and when it starts - where and when it ends.

DEFENCE - AVV. ROCCHI - You have stated in some written note that the time the movie had not been updated?

ANSWER - No, unfortunately, as I said, I admit that it was my lack of responsibility, being a horse these days with the time change did not c'abbiamo case because we did not have other visits from 31 to the first.

QUESTION - No, I was wondering if you had not thought about reporting it with a written note.

ANSWER - Unfortunately not.

QUESTION - You spoke earlier about the briefing that you had an area set up.

ANSWER - Yes

QUESTION - Where were you exactly?

ANSWER - The briefing area was right outside under the pergola of

the house, about a meter and a half - two from the entrance of the house.

DEFENCE - AVV. Ghirga - (...) means the arbor?

ANSWER - Yes, exactly. The pergola I mean ...

PRESIDENT - The entrance of the above?

ANSWER - If you look at this picture, there you do not see much, but back here we see one of our case.

PRESIDENT - In front of the entrance.

ANSWER - Yes, in front of the entrance there is a small area covered by a roof with tile ...

PRESIDENT - the apartment occupied by the four girls.

ANSWER - Exactly, the apartment upstairs.

DEFENCE - AVV. ROCCHI - Before he was asked the question but then did not respond, we can describe the clothing?

ANSWER - The clothing is our disposable coverall that is in a white suit .. . Now I do not know what material it is, however, is a full suit with shoes. hood that you can pull up or take down, depending on needs and pui p l then the needs of the area of crime, can also be used to suit other overshoes, but usually are used when the area is very much steeped in blood and substances other biological traces. So there the matter must be evaluated point by point, is not always the same thing in a nutshell.

QUESTION - You also moved from the area briefing inside the house ...

ANSWER - NO, no one has moved from the area inside the house without briefing is certain, for that reason there is a briefing area.

QUESTION - That then took off ...

ANSWER - For up to 15.30 I've spent the equipment to other colleagues who were inside.

QUESTION - You said it first went into the other room, when he

described his early ...

ANSWER - Yes, she talks about the first entry.

QUESTION - Yes, the first entry. So she went in first and then in the other rooms of the crime.

ANSWER - Yes, we follow a clear direction ... inspection by police forensic work, has rules, you follow very specific rules for determining anything and not to do things in a sectoral, as a rule, unless you then .. . I know that such an enclosure which prevents me from going to the right, of course you go to the left. So we go from right to left, etc. etc. ..

QUESTION - And he was always the same shoes?

ANSWER - Yes, yes inside the apartment.

QUESTION - So during operations inside the house has passed in and out from various rooms and passing along the corridor?

ANSWER - So in the various rooms in the first entry we entered, we're just looking out the threshold in order to see the status of places and then decide what to do and when we do, however, is the first entry the first thing we do, which is just expected, is the observation and to see clear traces and try to identify clearly the points of the corridor to spend especially not cover his tracks, because even passing on a track of blood dried, if you do not bag or almost nothing because virtually a track Blood smeared the floor of a few microns, even by walking you remove almost anything, but at least it can be confusing.

QUESTION - But she was transiting the corridor?

ANSWER - Yes, but we had already identified the traces of blood, already knew where they were. As soon as we are arrived, when I arrived there were already two colleagues inside and had made the first observation that we have indicated the tracks to wherever they were.

QUESTION - They come in where, inside the room?

ANSWER - No, when we arrived we waited, I want to call the anti ... the stanzettina just behind the front door, the little detachment of a square meter, a meter and a half.

QUESTION - But of course she passed there?

ANSWER - Yes, certainly.

QUESTION - The other staff also wore the shoes?

ANSWER - Certainly, anyone who has had access to the apartment.

QUESTION - You have also taken up activities repertazione?

ANSWER - Yes

QUESTION - Did you see the staff if changing gloves every manuscript that was ...

ANSWER - No, not finding any, but the gloves were changed very often, when it is considered appropriate.

QUESTION - Each finding is not it?

ANSWER - For each specimen, no, but it serves no purpose at all. Also because in order to have ... I do not know, because no contamination contamination of a specimen is only ... contamination of the crime scene, it should be clear, is when you bring something in from outside, that is when it changes the balance that's inside. For example, opening the door virtually can vary a few degrees and the temperature in the analysis of the corpse can, even if not. counts for nothing, however, can vary the measurement, then we say that you virtually can alter.

QUESTION - But the gloves were always changed?

ANSWER - Always changed ... only when the operator believes.

QUESTION - His activity was confined to that of Video cameras?

ANSWER - No, my activity was confined to the aid of video footage and clear to others, because I was the less experienced there, so I preferred to do things more important to others.

QUESTION - After the 2 she is back in the house?

ANSWER - No, I've only done 2 after the apartment below.

QUESTION - So you saw him the hook just at that moment that was

...

ANSWER - I'm sorry?

QUESTION - The hook of the bra.

ANSWER - The hook so when we ... sure.

QUESTION - At that moment, and then she has not seen?

ANSWER - No, because I had no other access.

QUESTION - Thank you.

### **DEFENCE - AVV. MAORI**

QUESTION - Going back to the last question of connecting the hook of her bra, her report on page 15, the first part, before the description (...) you speak ...

ANSWER - Where?

QUESTION - We are the tenth row.

ANSWER - Yes, exactly.

QUESTION - You describe the finding of this hook.

ANSWER - Yes

QUESTION - We may illustrate it?

ANSWER - Yes, it was also measured as shown by the minutes.

QUESTION - Please tell us if the verbalization.

ANSWER - Maybe it is more clear, what shall I describe?

QUESTION - The law and eventually then ...

ANSWER - From here, from below?

QUESTION - Yes

ANSWER - "Underlying the pillow, 1:41 meters from the right wall," then the right wall is the wall to understand ... us when we enter a room we enter the door, then the right wall, front, left rear door is.

PRESIDENT - Compared to you so that revenue.

ANSWER - Yes, an apartment for an inspection of the Scientific Police observed the threshold unless there are clear . . . thus: 'To 1:45 m from the right wall - and then the wall of the window - and 0.95 meters from the front wall - then do a triangulation - rinveniamo a strip of cloth of the bra that was missing from the same where the hooks are attached to closure. "

DEFENCE - AVV. MAORI - So she has also performed the measurements?

ANSWER - Yes

QUESTION - And saw well that hook?

ANSWER - Yes

QUESTION - You had dirty blood or other impurities?

ANSWER - On the side where I noted I did not.

QUESTION - It was then touched?

ANSWER - For me, no, not me. At least we in the Provincial Cabinet not, because then the repertazione clearly, as I would like to point out, we have not made us and so I can not tell.

QUESTION - So you can not tell if it was or was not taken from someone on that occasion?

ANSWER - No, not at that moment, up to when I was not there.

QUESTION - And the measurements were carried out as a cone?

ANSWER - With a laser level.

QUESTION - How?

ANSWER - We have a laser leveler and then I start over perpendicularly, a few inches clearly, and make the various measurements from wall to wall for triangulation.

QUESTION - Another point, page 8 of his report, say where it says "corridor" in the second part, I am referring to the clothesline.

ANSWER - Yes

QUESTION - You mention that close to the library where there is a clothes drying rack on the aluminum wires are hung four stockings sponge, a glue of black color and a black mesh.

ANSWER - Yes, perfect.

QUESTION - Of course confirms what she has revealed.

ANSWER - Yes

QUESTION - Can you tell us if you have been touched, repertati these?

ANSWER - No, we personally ... I always speak clearly to us of the provincial cabinet, we do not.

QUESTION - There have been attributed to someone?

ANSWER - You talk ...

QUESTION - I'm talking about the clothing over the clothes if they were attributed.

ANSWER - Since we do not, then after then I do not know.

QUESTION - One last point I want to ask is the reference to the relief that she has done in the apartment below, page 25.

ANSWER - But is the other word.

QUESTION - Yes, I would like to ask you a question, she confirmed, as seems to have seen, the existence of several marijuana plants in the apartment below?

ANSWER - Yes

QUESTION - How many were they?

ANSWER - I think five.

QUESTION - Thank you.

**DEFENCE - AVV. Ghirga**

QUESTION - I saw that video on 2.24.40, the night after 2, 3, 3 to 2.24 of the frame the hook and is described, then stops and begins again where we stopped at 12:41 of the 3, that is always 3.

ANSWER - Yes

QUESTION - The question this: why this long break?Have you stopped for an hour, for the time?

ANSWER - Yes, about 2 am visit because we have suspended the day after the team had to take ERT and fingerprints ...

QUESTION - I asked why this long break, from 12 to 02/24/43.

ANSWER - First the video, as I said before, are not continuous so there is that if I say that the video stops at midnight and forty, at twelve forty a.m. precise we closed and we went on, passed another hour or so about the briefing ...

QUESTION - When you are interrupted operations.

ANSWER - The operations around 2 am.

QUESTION - But that other interruption of the explanation which he gave half an hour, an hour when from what they were owed?

ANSWER - Interruptions?

QUESTION - Yes Video While she has also illustrated account briefly say: "here ...".

ANSWER - Yes.

QUESTION - If he wants to say.

ANSWER - The breaks are very normal, in the sense that when I have taken plenty of room and all the details, because otherwise in a survey of 12 hours should do 12 hours of recovery, so it's normal stop shooting, what else do , consider something else, then if a room, reviewing evidence that maybe a first pass of the camera had escaped draws an additional video or switch to other environments.

QUESTION - I wanted to know this.

**DEFENCE - AVV. DALLA VEDOVA**

QUESTION - On this you have said on video that is not a full video but what do you mean that was cut, it was mounted?

ANSWER - Absolutely not, the video we worked and then we can

assure you that the video camera as it comes from. In these cases, if the survey we do not work quite the video that is captured, he was put on the menu and what is the video.

QUESTION - But if the visit lasted 12 hours and the video lasts about 40 minutes ...

PROSECUTOR - DR COMODI - He just explained.

DEFENCE - AVV. DALLA VEDOVA - In fact I'm asking for is a clarification.

ANSWER - Yes

QUESTION - I wanted you to explain to me that in fact you have not taken all the 12 hours, but only 40 minutes.

ANSWER - Yes, of course.

QUESTION - But for the outside of the villa, you have made a visit to the small building that is in the garden and the garden have made an inspection and filming?

ANSWER - Yes, the survey was done with the famous macchiettine of blood which then turned out to be the cat that was injured, then the exterior of the villa, the apartment has been checked thoroughly and is also on the verbal.

QUESTION - Did you also shoot video outside?

ANSWER - There are partial pieces of ... when down, but clearly not with the same accuracy.

QUESTION - Besides what we have seen today, because today we saw some exterior shots.

ANSWER - Yes, those remotes that we do not.

QUESTION - Others do not.

ANSWER - There are more photos on the stairs, just to the spots of blood but there are other ...

PRESIDENT - Excuse me, where they were specks of blood on the outside where?

ANSWER - The blood stains were on the outside and then we saw that ...

PRESIDENT - Outside where?

ANSWER - Outside on the right elevation, where there is a mouse, here on this square, the elevation of the apartment right below it falls down and there is little clay and gravel, and alongside there are concrete steps .On the stairs there was a small concrete. micro dots of blood which then turned out to be the cat that was cut on the glass.

DEFENCE - AVV. DALLA VEDOVA - In contrast, on-site inspections (Bulagaio) has been made?

ANSWER - (Bulagaio) where we will find phones?

QUESTION - No, (Bulagaio) I mean .. . phones were found in a villa, (Bulagaio) mean right next to the villa's garden, that cliff.

ANSWER - No, no there, there, no inspections, no inspections have been monitored but because there was nothing obvious.

QUESTION - But she has also made visits around the villa, for example, on December 18th?

ANSWER - No, I was out on 18 but I did not take part in the operation, I was an observer.

QUESTION - But there is a verbal survey where they were found ...

ANSWER - The knife in the two tissues.

QUESTION - Yes, the fazzoietтини.

ANSWER - Yes, what I did with Dr. Stefanoni and Assistant Palmieri, yes.

QUESTION - Under what criteria it was decided to do this survey in particular the 18? Because, I can also see the pictures, and not really close to.

ANSWER - There has been requested.

QUESTION - There has been requested?

ANSWER - We have indicated that there were these .. . this phantom knife with traces of blood, we have requested it and we did.

QUESTION - With the paper towels?

ANSWER - Exactly.

QUESTION - Going back instead ...

ANSWER - We went to our will, if that's what .. .

QUESTION - No, I thought that during the survey as you decided to do an inspection.

ANSWER - Guardi is an area I do not know if I may say, but frequented by drug addicts etc., Then there every day if she goes there with a bucket at home ... then they send us and we did.

QUESTION - The last circumstance, you have seen knives in the house when you did the shooting? Have you opened the drawers, you have taken?

ANSWER - No, because always in the light of the fact that they had to act then who repertava, though there were some knives but in order to sink, from what I can remember, from the first vision, however, wash, clean, tidy.

QUESTION - But you have not taken or yes because I do not seem to have seen them.

ANSWER - Yes see ... at the time when we got did not even know exactly as had happened murder, then before you can go to details we must first see and understand how the crime took place.

QUESTION - But instead you have photographed these knives in the sink, there is the photograph?

ANSWER - The photograph yes there are, I do not remember if there are details, however I do not think so either.

QUESTION - But you have found in the apartment below, saw blades when you did the inspection?

ANSWER - there was someone in the kitchen, there was a bit 'of dishes a bit' of ... There were different above and below.

QUESTION - Even big, from the kitchen?

ANSWER - Yes, not too big but it seems to me that yes, there was someone. Should I review the photos, now I can think of.

QUESTION - Thank you.

**Prosecutor-DR COMODI**

QUESTION - When you came in, took over the room Romanelli ...

ANSWER - Yes, we speak of the room of the stone?

QUESTION - That's right. He recalls how, or if the taxes were ...

ANSWER - taxes as we see them here directly. I describe seeing it from outside say, the left was slightly more open ...

DEFENCE - AVV. Ghirga - For those looking to the left.

ANSWER - Let's say I can describe here so ...

PRESIDENT - To tax means the blinds?

ANSWER - I mean the taxes imposed external, however, the Persians to understand, seen from outside the left one was slightly at an angle a few degrees higher than the right.

PROSECUTOR - DR. Mignini - one on the left by His ...

ANSWER - From my point of view, from the right course.

PROSECUTOR - DR COMODI - But the one to our left was the same before it was put that letter there?

ANSWER - This one we do when we make the picture clear as we find it.

QUESTION - So was it?

ANSWER - It was so, if it's been tampered with before we arrived that I clearly ...

PRESIDENT - As you see marked with the letter O?

ANSWER - Exactly, we have cataloged the we found it.

PROSECUTOR - DR COMODI - Have you noticed, she has toured outside of the house said?

ANSWER - Absolutely.

QUESTION - Have you noticed any signs of arrampicatura, the

strips, the piedate, fingerprint, something on the wall?

ANSWER - No, you mean here where I'm spending my mouse?

QUESTION - That's right.

ANSWER - No, absolutely not.

QUESTION - Where the thief would have to go short.

ANSWER - No, absolutely not because we describe what we see, if you do not see anything clearly does not describe anything.

QUESTION - Can the arrow to show more or less ... This angle is a bit '...

ANSWER - If you tell me if anything ...

QUESTION - That is the point, obviously the maximum, the point corresponding to the area of the room where he was found inside the stone.

ANSWER - If we look at the window always be here, under the set of the left window, this one here, I do not know if you see the mouse

QUESTION - Yes, yes.

ANSWER - Almost perpendicular say, moved to the right of a few centimeters.

QUESTION - The broken glass is what is touching the arrow?

ANSWER - NO, the other one, this right.

QUESTION - what is covered in glass from the tax?

ANSWER - Always watching the window is covered here.

QUESTION - Thank you.

## **COURT**

QUESTION - Do you remember the blood stains on the bathroom sink small?

ANSWER - The bathroom small talk about what ...

QUESTION - The bathroom near the room?

ANSWER - Yes, yes, there were stains of blood.

QUESTION - You can see them?

ANSWER - Yes, of course.

PROSECUTOR - DR COMODI - The neighbor has repertate heads, sorry  
to interrupt you but ...

PRESIDENT - No, no, okay. Can go

DEFENCE - AVV. MAORI - We demand the acquisition of the minutes.

PRESIDENT - So you buy the record of inspection Lawyer?

DEFENCE - AVV. MAORI - No, the file will run the descriptive  
findings by the Inspector Ignatius Press, the Assistant  
Palmieri, Assistant Mountain and Brocci.

PRESIDENT - The parties know it, there is no opposition, and that  
act is acquired for its usability.

**DESPOSITION OF THE WITNESS - Brocci GIOLA -**

THE WITNESS, a warning under ART. 497 CODE OF CRIMINAL PROCEDURE,  
THE LAW OF RITUAL FORMULA.

GENERAL: Assistant Chief Brocci Gioia, born September 15, 1968 in  
Gubbio.

PROSECUTOR - DR COMODI - When you make preliminary statements we  
recall previous heads to make the change of new computer  
and then continue the movie?

PRESIDENT - Yes, Yes

PROSECUTOR - DR COMODI - Thank you President.

PRESIDENT - So you invite the Inspector Cantagalli operations  
required for viewing. Please, go on then.

**Prosecutor-DR COMODI**

QUESTION - If you want to report to the Court when and how it was  
invested with this office regarding access in Via Della  
Pergola, more or less what time if you remember, with

those who are gone, when you went, who has found.

ANSWER - Yes, 11 days on November 2 svolgevo turn the service from 14 to 20, I arrived at police headquarters at about 13:45, I met Claudio Cantagalli, my boss, who had told me that colleagues who performed morning shift had gone to Via Della Pergola 7 number for a single death, presumably it must have been a murder, but he said: "the limit so we call our colleagues more precise details." He then had to deliver the sheets and went away, I called a colleague who was already in place, which had been already in place, I called him by phone and he confirmed that it was a murder. In the meantime, I found myself with Inspector Ignatius Press, we have prepared additional material to bring to the crime scene and we went out, leaving together with staff of the squad because we ran out of the car because they had taken my colleagues in the morning. We arrived on site I and the Inspector Cantagalli around 14.30, then we met in the doorway of the apartment on Via Della Pergola, one of the two gentlemen, now I can not remember exactly whether it was Palmieri Mountain or who has briefed situation. So we got dressed, I mean put your shoes, gloves and overalls and walked inside the apartment.

QUESTION - Then?

ANSWER - then once you enter inside the apartment ...

QUESTION - Excuse me for interrupting you, or when he says Palmieri Mountain ...

ANSWER - Yes, I do not remember which.

QUESTION - There has briefed that means, what you said?

ANSWER - Practically we just confirmed that it was a murder, which from what I could see how they could see outside the duvet that it was a girl young enough, then we have shown,

however, the scene, one that could see beyond the threshold of the chamber of the deceased and then showed us all the traces of blood already, already visible to the naked eye, thus indicating exactly all the bloody footprints that were seen on the floor, then telling us to be careful, to use a walkway inside the house and from that moment ...

QUESTION - You've defined so this kind of path?

ANSWER - still was not limited in so far they had come to very little, we were overtaken and then they showed us only the beginning visible stains you saw blood on the floor of substance and nothing else. So we decided to start a tour inside the house, following a logical sense, counter-clockwise, this is what happens whenever we do an episode like that just to avoid ricamminarci several times in the usual place, and we began to observe scrupulously all environments. Then, once finished this round of searching, we found ourselves in the hallway of the house and at that moment we decided to divide the tasks to be performed virtually inside the premises and in particular the Inspector Cantagalli Claudio, being the person who at that time had less experience of the Scientific Police because he had just finished the course on its own initiative has decided to stay out and spend all the necessary material for the preparation of the crime scene, while I, together with two colleagues had already overtaken the morning, we started to set up the crime scene.

QUESTION - What does set up the crime scene?

ANSWER - Set up the crime scene means above cataloging the evidence, then the first thing for every room we have observed affixed letters or numbers on all the objects that we considered useful, the most significant in that

context, we did this, the first action to 'inside the house.

QUESTION - We came with the Inspector Cantagalli to repertazione that made Dr. Stefanoni the presence of Dr. Lalli say in the area, the room of the crime to the presence of the corpse. Then we stopped, I think, right after the removal of the corpse, and I think that the subsequent images are for, correct me if I am wrong, refer also to activities that she has personally performed, then we leave quickly? I mean she has played only the business of setting up the crime scene or once the ERT arrived and especially Dr. Stefanoni helped to repertazione?

ANSWER - Well staged the crime scene, then enumerating all objects and traces of blood found me along with three colleagues, we again split the roles, I am ...

QUESTION - Colleagues of Perugia forever?

ANSWER - I am speaking of Perugia, ERT colleagues have not yet arrived in Rome. I have dealt with the description of all rooms in the apartment, intending for a detailed description of each room its own description of the environment that makes up the apartment, including measurements, including . . .

QUESTION - Furniture? ANSWER - Exactly, everything was part of the room. While Fabio Palmieri, the colleague of Perugia always took care to carry out photographic and another colleague, Rafael Mountains, was in charge of doing the tapings.

QUESTION - What then have been made but also by Cantagalli?

ANSWER - Cantagalli had them at a later time, began at 17 o'clock at her, at the beginning made them only the colleague Raffaele Mountain.

QUESTION - When she arrived the ERT did, she left or stayed?

ANSWER - No, the ERT has come about that I think they were the

usual 17 days, also briefed them all there and all the things that we had already shown they have started to carry out their activities because it is different from ours, that is, the colleges of the ERT group latent fingerprints perform exactly that function there, must go and search for all the latent prints found apartment.

QUESTION - So at around 17 Dr. Giunta has arrived?

ANSWER - Exactly, Dr. Giunta executive della latent prints section.

QUESTION - What will hear soon. And then what?

ANSWER - We have continued our activities, we request the continued activities while the ERT group was beginning to make assessments of the nature of the fingerprint in the room Mezzetti, I remember, and we continued with our description of each room, because each environment requires hours of writing in an environment that you list all the furniture, all objects that are present, take action if you find something important to mention and so we continued ... I kept exclusively to describe everything that was inside of the 'apartment.

QUESTION - Once arrived Stefanoni?

ANSWER - Once arrived Stefanoni ...

QUESTION - Then the group of biological fact.

ANSWER - Exactly, the ERT gruppo Biology Section, as they also briefed the other section began to operate autonomously, clearly asking for support to us if they need to physically test tubes, if they needed anything, but we were operating independently and idem, tasks that were clearly separated.

QUESTION - But some repertazione I think that has made her too, right?

ANSWER - The repertazione I made it physically the next day, on

day 3, I have not done before 3 repertazione.

QUESTION - Then the bath was found in it the 3 in substance?

ANSWER - The 3 afternoon, yes.

QUESTION - Then azioniamo the movie, if the Court agrees, from where he stopped her. Maybe she describes everything that is useful to describe, if a room is part ...

PRESIDENT - We can always proceed in open court?

PROSECUTOR - DR COMODI - By now the corpse is no longer President.

PRESIDENT - Okay. It is recognized that the vision of the movie is shot in the classroom.

PRESIDENT - Perhaps the pictures are equally effective for the examination.

PROSECUTOR - DR COMODI - I think so, I close this chapter without return above, but if you can not ...

PRESIDENT - If the movie fails ... heads may submit for examination and cross examination of the photos. Meanwhile, he expects it showed perhaps the need for a further schedule for the next period, when you immediately that you are not able to give this calendar, however, the opportunity to notify the parties if they can make a point while texts that remain to be heard, texts and consultants of the Public Ministry, the Civil Parties and texts because many residues are common, the defenses. In this report we consider that he was also asked to examine the accused Amanda Knox, who does not know whether or not he will undergo, but it is a task which required the tender will try to account, here on the basis of what which is still preliminary investigation, perhaps for the first date that is 1'8 May you try a little 'to identify dates later than those already indicated, the following dates for the month of July and then eventually we will go over.

PROSECUTOR - DR COMODI - More than when?

PRESIDENT - I immediately say that the understanding was that you would want to see if you could run out of the preliminary investigation by July, and then allowed sufficient time to prepare for the discussion. If, however, this program can not be met for preliminary work still to be completed will be evaluated and you will, that's the intention. It seems to me to be an assessment rather approximate, but hopefully close to true ...

DEFENCE - AVV. MAORI - We will indicate the days ...

PRESIDENT - The Public Ministry believe that they remain still 14 texts.

PROSECUTOR - DR COMODI - According to the calendar that we have done, but let's say with a certain dose of optimism, then inserting four or five texts that can be seen as ' Science was started today, however, these texts are less demanding, quotation marks, meaning they are the ones who have described the crime scene and then stimulated to a lesser extent and reduced the discussion to be heard. To which I said that according to a first version we should even end up on May 23, realistically will not make it to May 23 because there are texts that are likely to commit the whole day or almost the whole day and then there will be some postponements, but we go off the rails believe that at the latest by the end of May, because then there is on 28 - May 29 to 30 who have three other hearings already set, then in late May and early June, just wanting to make ugly, and This all depends Defenses, by controesami and contradictory, in the following week, ie during the first week of June where three other hearings are set, 4-5 - 6, we certainly have done with the texts of the Public Ministry.

PRESIDENT - So maybe the request to the other parties ... Now we continue as well, but then so will the other parts required to make the point a bit 'of the texts taken from the common ones remaining to be heard, so when we get even one, we can do it too, but the parts are definitely an advantage in do when we have this path specification to be done it will also give an indication on the calendar next to the dates specified above. Meanwhile, we can resume.

PROSECUTOR - DR COMODI - So here where we are?

ANSWER - There is still running repertazione Dr. Stefanoni and staff who worked together with her, always in the biology section on November 3, inside of Meredith's room this seems to me. Ago of the various samples of blood substance, training hair found below the body of the deceased. Still need to specify that on day 3 in the chamber of the deceased has made only the biology of Rome, the ERT repertazioni. This is the (..) of the slate below.

QUESTION - No, we can one below ...

ANSWER - This is the small bathroom adjacent Kercher's bedroom, the bathroom in this repertazione I've done because the doctor was busy with other tasks and asked me to do it. In this bathroom there were traces of blood and training pilifera, all marked with the letters.

PRESIDENT - Can specify where you found?

ANSWER - Training pilifera is the letter E, just inside the sink, while all other letters refer only blood substances, the presence of blood substance, as the letter on the mat, do not remember now that letter was, in fact pointed to the pad where the carpet soaked with blood where the substance was impressed that a morphological form could look like a foot.

PRESIDENT - Can you give a description of these traces of blood

were streaked, were dripping?

ANSWER - There were drips and the only thing I remember is I had a pinkish color, not red then made to understand that they had been watered down type, that is blood mixed with water, was not the characteristic red substance of blood, was rosy color.

PRESIDENT - Throughout this?

ANSWER - Yes, both the light switch ... except, here, on tap, there was essentially just a blood red color, all others were optimistic. including this one I'm taking now, which is levied at a single tissue paper, paper towels because it had a certain continuity, that is, drop by drop upstream and downstream have the same continuity, there were small drips in the same line, then by color and continuous drip I thought it appropriate pick them up with a single diskette. This is the formation pilifera found inside the sink. The letter F is the carpet. These are present in the small drips of water, the water in the ceramic.

PRESIDENT - Again, these are bright red or red watered down, as said before?

ANSWER - In this part here I do not honestly remember if they were drops of bright red, I do not have the confidence to say if they were mixed with water or they were just blood. Security was here with a pinkish color.

PRESIDENT - Those on the bidet?

ANSWER - Yes, there was always the bidet and drop to the mountain, just on the edge and the same continuity up to the siphon Usually the the bidet in the same line color and say. Then the door, they were not watered down, they were of a bright red color.

PRESIDENT - Always the door of the bath?

ANSWER - The door of the bath, the door to protect the bathroom.

PRESIDENT - It is a sliding door or a door ...

ANSWER - It is a door with the opening in a clockwise direction.

PROSECUTOR - DR COMODI - This is the famous cat.

ANSWER - Exactly. Then we spent the afternoon to highlight all the micro drips with blood and then we came to the conclusion that they were drops of blood of an injured cat who left these footprints.

PRESIDENT - These concrete steps ...

ANSWER - The stairs are stairs leading to the basement of the building, the house. Then from here on out are shots taken in the house basement, in the other house, the other unit.

PROSECUTOR - DR COMODI - The toilet paper smeared with feces in the bathroom was reported by Dr. Stefanoni?

ANSWER - Yes, s i

QUESTION - Why is the point we have not found.

ANSWER - Yes, however, was by Dr. Stefanoni reported but I do not know the day exactly as we had separate tasks

QUESTION - All right, all right. Now do not go back home again?

ANSWER - No.

QUESTION - NO?

ANSWER - No, because that day there the shots were taken in the bath and then later in these steps that lead to the ...

QUESTION - Then we go to the photos if maybe there is something to highlight in particular?

ANSWER - Yes, here all the details of the various blood stains. These are photographic surveys made on the first day of inspection, then we refer to the November 2 from the moment we arrived until we conclude our business that dates back at 2 o'clock at night, so it was already the third. So with all the details of each room that was present inside the apartment and the room clearly more important,

that is the room where the corpse.

PRESIDENT - Perhaps any photos that might show if it is necessary that the corpse discovered you will see are proceeding at that stage but behind closed doors.

ANSWER - All right. This is the living room, the hallway just at the entrance, this is the living room seen from the hallway, so is the front right of the living room where you can see the opening of the chamber Mezzetti. This is always the left front lounge where you can see, just to the left, the opening of the chamber of Romanelli and before the hall which then leads to the room to use Amanda Knox and Kercher and baqnetto.

PROSECUTOR - DR COMODI - Excuse me for interrupting you, the first traces of blood where you found?

ANSWER - The first traces of blood are visible here on the floor before this divan sofa, sofa bed.

PRESIDENT - So in the living room? ANSWER - Yes, in the living room.

PROSECUTOR - DR COMODI - Drops or ...

ANSWER - They were both essentially left to their own blood to ... an imprint of the sole of the shoe look.

QUESTION - We want to see? The description of the house is perhaps unnecessary, as the Court has made the fortune to visit.

ANSWER - I have to go see ...

QUESTION - Wait, back in the kitchen because there was a question of Defense before if you had photographed the dishes and knives in the kitchen.

ANSWER - Yes, there is one thing.

QUESTION - Then let's see.

ANSWER - No, this is still the outside ... this is all outside. The detail is there, I do not know if it is now connected ...

QUESTION - I think it was next.

ANSWER - We look at. Here already we see the stove and sink.

QUESTION - This we have seen.

ANSWER - Here you see the stove, the fires ...

QUESTION - There it is.

ANSWER - The detail of the central part of the kitchen floor and this is the final part dell'acquaio, this is the particular.

QUESTION - What then is perhaps the only area left untouched even those who entered.

ANSWER - Yes, we say that was in order except for a glass placed on the draining dell'acquaio here and found this item all'interno. an ashtray.

QUESTION - What shaped pumpkin ...

ANSWER - Yes, that within the (...).

QUESTION - The Halloween pumpkin?

ANSWER - Yes, used type ashtray and then there was nothing but a mess, all the cutlery was inserted in the appropriate containers, there was nothing out of order.

PRESIDENT - I'm sorry, to complete what he was saying about the shoe print near the sofa in the living room.

ANSWER - Yes

PRESIDENT - You can tell if it was live .. . which direction was it going?

ANSWER - We had noticed that starting from Meredith Kercher's room and going in the direction of the output of these spots were more labile and more scarce, we had noticed this.

PRESIDENT - It is the front of the shoe?

ANSWER - I am not able to say, that there were exactly looking for but I say if they were the front of the shoe does not ...

PROSECUTOR - DR COMODI - We can see anyway?

ANSWER - Yes, yes, however there is the detail of the photograph.

QUESTION - This is the washing machine.

ANSWER - Yes, this is the washing machine ... I flow faster I go to find that picture there.

QUESTION - Yes.

ANSWER - I do not remember what position ...

QUESTION - But the paper file does?

ANSWER - Yes, I have the paper, if you think we can look there first.

QUESTION - Perhaps it sees the page and found it there too.

ANSWER - Yes, I can check?

PRESIDENT - Yes.

ANSWER - I apologize, but I just can not find it! There's definitely because I have seen several times, but I can not ...

PRESIDENT - However it is not possible, wanted to know, identify the direction of those who wore.

ANSWER - Yes, yes, there were still all the details, but I can not locate this, measurements are 160 and is not even easy. Here it is, from 159 .. . Then here we stay where we see the reverse of the four letters, one is under the sofa bed, not seen in this angle, we see in particular and these are after all traces of blood and is done then the detail of each. So the letter G - H is not seen in this photographic survey, but we see later, I, J and Y and F, were then six blood fingerprints. This is where you see the F circles probably left by the sole of the shoe. This is the G and is essentially a streak of blood, this is where I have seen here of swirl marks, and this is the set of three letters, the H had not seen before, the J and Y, this is the particularly contamination of a blood substance

always, the Y and J always a mess. Just not there were other, rather than those of the corridor that led then to the room of the deceased, they were found more traces of their impression of the shoe sole.

PRESIDENT - Are there other questions from the prosecutor?

**PROSECUTOR - DR. Mignini**

QUESTION - Yes, She has carried out further investigations, has returned home after 3 then?

ANSWER - Yes, yes, I went anyway because we were a support to colleagues in Rome, Rome ERT. Our survey was completed in the sense that we had already done photographing, filming and descriptions of all environments, so our competed in Perugia as the Scientific Police was completed, but we still support their colleagues in Rome.

QUESTION - And you were there you remember when?

ANSWER - Well certainly the 3, 4 were carried out activities aimed at looking more like a fingerprint latent papillary and then we support the colleagues of the latent prints section of Rome.

QUESTION - Do you remember if they were made inquiries about knives?

ANSWER - NO.

QUESTION - If you were shown the knives.

ANSWER - Shown knives yes, yes. One night I remember that while we helped colleagues from Rome to pass the material or help them take pictures, I remember one evening having heard voices, came out in the meantime we were in the hallway, the front of the Meredith's room, went out from this corridor and within the living memory that I had entered the staff of the squad along with Mrs. Knox, and the girl had been brought near dell'acquaio, stay in the kitchen.

QUESTION - What do you remember?

ANSWER - I remember a scene a bit, if we say so, in the sense that I remember this girl near the sink stood, clapped her hands to the ears and closing them began almost to tremble, as if he felt ... began to tremble, tremble, and these had hands to his ears, so much so that was taken, was taken away from them and I do not remember if it was always there or taken out of the room, I then left, returned to help colleagues, but I saw this scene and I was impressed this situation.

QUESTION - What were they doing at that moment?

ANSWER - They were close dell'acquaio and were displaying the content inside the cutlery drainer, cutlery those present sull'acquaio, I saw this. Now if he just showed other things I can not remember. but I saw this scene looking out and then I went back into the corridor.

QUESTION - Then they knocked off Amanda?

ANSWER - I do not remember exactly, I saw, however, that the away from there, took it directly below the arm because it seemed almost felt bad because he closed his eyes and began to shake strongly.

QUESTION - And put her hands over her ears?

ANSWER - Yes, his hands to his ears, closed his eyes and began to tremble, made this gesture that I'm imitating. I remember that was taken from under his arm, I honestly do not remember if it was accompanied, or just off the hallway there so much so that I then went back inside the corridor, the corridor of the second and went to help colleagues in tasks.

QUESTION - Who was present at that moment you remember?

ANSWER - I definitely remember that there were colleagues in the squad, I think the Assistant Zugarini surely, the Deputy Commissioner Monica Napoleoni I seem to have seen it,

there was the lady who was in charge of translating.

QUESTION - The Donnino or Colantone?

ANSWER - A brunette woman with long hair, now I do not know the surname, however, often works to the police station, I see the police station.

QUESTION - There was another girl by chance, remember?

ANSWER - I do not remember really, although it is not so important to these people as soon as I looked out I saw this scene ...

QUESTION - But she left because she had heard noises?

ANSWER - I could hear voices, and as we were alone together with colleagues in Rome, I heard voices, and so I went to see who had entered and I saw this scene.

QUESTION - I have no further questions.

CIVIL PARTY - MR. MARESCA

QUESTION - Do you remember if he viewed the outside walls under the windows, close the doors?

ANSWER - Yes, that's practice for us, however, is observed throughout the interior of the house and externally, what we do really well because then we produce photographs of the house from the outside and then bring us inside the house.

QUESTION - Do you remember if he detected traces of climbing or otherwise ...

ANSWER - So ...

QUESTION - On the wall underneath the broken window with broken glass?

ANSWER - Yes, we went specifically because seeing precisely in this window effratta and observing a stone inside the room where the window effratta we went right out to see the situation, what we found at the bottom of this window .We observed both the wall, the wall below the window so that

all the vegetation below the window and noticed that the wall had no traces of anything, had no traces of dirt rather than grass, anything, different strips, had nothing, and even all the vegetation that was below this window was not trampled or nothing, in fact we did the detail of the photograph.

QUESTION - It appeared crushed, bent?

ANSWER - NO.

PROSECUTOR - DR COMODI - Let's see this photograph.

ANSWER - Yes, I seek here again in the file. Here she is 14, this is the part behind ... Then we did the detail of the wall.

CIVIL PARTY - MR. MARESCA - One has to see if you can stop, how that measurement was taken?

ANSWER - This measurement was taken with both meters, with that tape measure with the laser that we have supplied us.

QUESTION - So with the laser pointer?

ANSWER - Yes, with laser sighting and also with tape measure to be sure that the measurement was that.

QUESTION - For the record reads that distance is written?

ANSWER - Yes, it was 3 meters and 78 starting from the outer sill of the window to get to the land that was perpendicular to the window below.

QUESTION - If you want to go boast.

ANSWER - We have a particular view from here was wooden railing and then from there we made. This is all the vegetation below the window where they are clearly visible straight nettles, without any signs of crushing. He is also saying that the ground was still too damp, it was summer and maybe there was dry land, on the wall we just looked to see if we noticed streaks of earth, mud and there was nothing, there was absolutely nothing .

PRESIDENT - The ground was wet Excuse?

ANSWER - Well, it was November 3rd.

PRESIDENT - as he referred to the mud was wet the soil?

ANSWER - Yes, however, was not completely dry land. Now I do not know if that day or the day before there had been raining but I do not remember is that the ground was dry, dusty in summer can be as high temperatures.

CIVIL PARTY - MR. MARESCA - I have no further questions.

**DEFENCE - AVV. MAORI**

QUESTION - (Unintelligible - microphone off)

ANSWER - Yes

QUESTION - (inaudible - microphone off)?

ANSWER - No, I can not say. We have made only the detail of these footprints, these footprints, the particular photo I speak, but they are not able to tell that foot belonged.

QUESTION - (She said she has found in it a palmprint on the bathmat).

ANSWER - I found in it on the bathroom rug.

QUESTION - (It also saw the imprint of course)?

ANSWER - Yes

QUESTION - (Unintelligible - microphone off).

ANSWER - Yes, yes, the letter F.

QUESTION - (Sa say whether right or left)?

ANSWER - It was the right foot.

QUESTION - (Unintelligible - microphone off).

CIVIL PARTY - AW.MARESCA - You do not hear anything, I apologize.

DEFENCE - AVV. MAORI - I do not know if the microphone is not working .. . Yes, now I do. When she answered questions from the Public Ministry and the Civil Part in relation to the external view of the window effratta, has noted the existence of a nail?

ANSWER - In a nail on the outside wall, you say?

QUESTION - Yes

ANSWER - Yes, yes, there was a nail sticking out about 6 inches.

QUESTION - Have not you done in your reference?

ANSWER - No, we have not referenced because there was nothing significant outside the presence of a nail.

QUESTION - Then he spoke of the soil, the soil underneath the window and said it was not dry land, but probably wet, which means wet? It had rained?

ANSWER - No, no, I said that as of November it was precisely that logic is not there has been a dry soil will not allow, if a scale that wall at that height not to leave anything, I said that because There was no further, for example, two violations of seals in this apartment we noticed, in the part where they climbed, we noticed it on the wall traces of grass mixed with soil.

QUESTION - You say logic actually remember if the soil was wet, the ground was wet?

ANSWER - No, I have found.

QUESTION - Or tell us, as said first logic precisely, in the sense that it was November and then logically had to be wet?

ANSWER - Logically, that is ...

QUESTION - Logically or saw? These are two different things.

ANSWER - Logically in the sense that I am coming, coming and going along the outer perimeter of the house, coming up here that I have soiled their shoes, so I want to say a trace is left on the soles of shoes, why not ...

PRESIDENT - Excuse me, when she says: "I dirtied" it is muddy shoes?

ANSWER - Yes, of course, is not that I in zatterata however, is still a remnant because the ground is not dry.

PRESIDENT - So he found on his shoe?

ANSWER - grass, yes grass stuck to the shoes I've noticed in other words.

DEFENCE - AVV. MAORI - But he found on that point O moving around the perimeter of the house?

ANSWER - I have gone around the perimeter of the house.

QUESTION - Well, when she answered the question President who had inzatterata that has happened going around the perimeter of the house or on that point?

ANSWER - So there is to point out that there was a sidewalk around the house and ended only in the vicinity, precisely in this window effratta, up to a meter before this image here is a concrete sidewalk.

QUESTION - Yes, yes we know.

PRESIDENT - The picture is this vegetation that is under the window with the nail ...

ANSWER - Just after the end of the platform forward and then perpendicular to the window.

DEFENCE - AVV. MAORI - And when this photo was taken?

ANSWER - How?

QUESTION - This picture was taken when temporally?

ANSWER - The 3 on 3 .. .Sorry for the second, Nov. 2, the first day of the intervention.

QUESTION - On the evening or afternoon? He remembers the time?

ANSWER - No sooner arrived because we deal with the outside first and then go inside.

QUESTION - He has made it her?

ANSWER - No, this has made the colleague who works in the office with me.

QUESTION - You were present at the inspection of December 18?

ANSWER - NO.

QUESTION - Thank you.

PRESIDENT - Please Lawyer.

**DEFENCE - AVV. ROCCHI**

QUESTION - Look, you reported that you have first viewed the house just ...

ANSWER - Yes soon arrived.

QUESTION - And then he began to catalog the evidence, she said, putting letters and numbers on the findings.

ANSWER - Yes

QUESTION - It has always followed, even in this activity, the anti-clockwise?

ANSWER - Well, we follow exactly that, a .. . we give a logical sense to our walkway to avoid passing over the same point, just for not going to invalidate or remove tracks that are already present. So, in this case we started dall'antibagno, the bathroom, that overlooks the living room and then go inside the Mezzetti, we made the stay and then we went into the room of Romanelli. Without this first round, then we are led into the hall and then we have redone all the rooms, and Amanda Knox, Kercher and bath.

QUESTION - Listen, then she moved into the various rooms on the corridor.

ANSWER - Yes

QUESTION - She always wore the same shoes?

ANSWER - But, when ... Yes, yes inside the house.

QUESTION - Well! And we can spell out exactly how your clothing?

ANSWER - Our clothing is made from a disposable overalls, white, and gloves.

QUESTION - And the suit ...

ANSWER - other times we put boots on the disposable coverall that is already provided, however, of the shoes.

QUESTION - It is already provided with shoes.

ANSWER - Yes Yes Yes

QUESTION - The headset?

ANSWER - The headphones if we should do, when there is always included in the suit, in short, is also including a hood, but when we think we do need, in short, not always.

QUESTION - And the gloves?

ANSWER - No, the gloves forever.

QUESTION - 'Gloves ever. "

ANSWER - Gloves and overalls with boots Always, always.

QUESTION - Look, why have you asked her to perform repertazione in the bathroom because there was the Biology Section of ERT?

ANSWER - Why were ffet tuando and other things, more and more inquiries about, clearly, repertazioni biological and even a little 'say speeding up, since I had not finished the other operations useful to us, we thought well, in short, to lend a hand.

QUESTION - Do you have any expertise in this regard?

ANSWER - Yes, I'm a video-photo-detector, I attended a course where we are taught even at repertare biological substance.

QUESTION - And in making the repertazione has changed the gloves he used?

ANSWER - When thought necessary to do so, sometimes not, not always because you do not need.

QUESTION - How many times has changed?

ANSWER - I do not remember exactly, just that if I noticed that the glove was, by chance, it was stained with blood provvedevo clearly substance to change it, if I had taken a training pilifera with tweezers clearly I have not changed because there was need.

QUESTION - So if they are stained?

ANSWER - If you stained and if maybe I was entry into rubbing contact with the blood, even if not macchiavo ... that is, if the glove was not stained.

QUESTION - All right, I have no further questions.Thanks.

PRESIDENT - I pray.

**DEFENCE - AVV. Ghirga**

QUESTION - I am referring to the episode that told of the November 4 at the request of Dr. Mignini.

ANSWER - Yes

QUESTION - Do you know remember. remember now, how many people, who was there?Meanwhile, first verse that has now carried this episode?

ANSWER - It was dark, no night was dark, I'm sure of this.

QUESTION - 18, 19 or so before.

ANSWER - Watch the time I would not say one thing for another, I remember it was dark because there were still lights on, because ...

QUESTION - Yes, it was dark.

ANSWER - Yes

QUESTION - Do you know remember, Dr. Mignini went?

ANSWER - I do not remember the Dr. Mignini, honestly I have spoken to the people there ...

QUESTION - To us it ...

ANSWER - I honestly do not remember.

QUESTION - La.Scientifica of Rome went?

ANSWER - The Science of Rome there was, however, was making other ...

QUESTION - I asked her how many people remember, I specifically asked if there was ...

ANSWER - It can not answer because I do not remember exactly.

QUESTION - Then make the remembrance.Dr.Mignini went?

ANSWER - I do not remember.

PRESIDENT - He has already said no.

DEFENCE - AVV. Ghirga - But it's not the holder of the investigation ... President, it's not a ...

PRESIDENT - All right we are to what the witness answers the questions. Please, go on then.

DEFENCE - AVV. Ghirga - Okay, you do not remember.

PRESIDENT - I do not remember.

DEFENCE - AVV. Ghirga - Do not you remember, right. The Science of Rome went?

ANSWER - The Science of Rome .. there is:

QUESTION - 'Yes'. The Science of Perugia went? y

ANSWER - So where is talking in the living room or speaker in the house?

QUESTION - No, no I think you look to be very clear in the questions and quiet, the episode of the four we have placed in late November 4, 2007, we have placed in the late afternoon 'was dark, "she said, and this Having said this, he said, a few minutes ago at the request of the PM, I ask you to remember who we were as people, as roles, such as ... And we said, the PM, Dr. Mignini, owner of ... do not remember, Rome was the forensic, you are the Cabinet .. .The Science of Perugia, so to speak.

ANSWER - Exactly.

QUESTION - She was there, so were there. Some dell'investigativa, Homicide of Police of Perugia were there?

ANSWER - Yes, I have already said, was the Assistant Deputy Commissioner, and probably the Zugarini Monica Napoleoni, along with an interpreter who works at police headquarters, a lady brunette with long hair, which sconosco his surname, and Mrs. Amanda Knox.

QUESTION - Yes, we have asked ...

ANSWER - I do not remember others.

QUESTION - ... but can not remember if there was another roommate.

ANSWER - I do not remember.

QUESTION - But because it responds well, I do not know but ...

ANSWER - I'm sorry, I do not remember.

QUESTION - We show that there were appropriate for his knowledge, people she does not remember there were, he understood. Then I try to invoke its Memory is a fact that you have proposed.

PRESIDENT - We are the answers the witness gives.

DEFENCE - AVV. Ghirga - So how many people? Ten? Eight? Few people?

PRESIDENT - It can roughly quantify.

DEFENCE - AVV. Ghirga - So, in short, the house was well ...

PRESIDENT - Yes, Please Lawyer. Please Lawyer.

ANSWER - It must have been six people, I do not remember, that's me ...

PRESIDENT - "you people" around.

ANSWER - Yes

PRESIDENT - Please Lawyer.

DEFENCE - AVV. Ghirga - I wanted to know this, and that's it.

PRESIDENT - There are other questions. Please, go on then.

**DEFENCE - AVV. DALLA VEDOVA**

QUESTION - I just wanted alcuni' chiarimenti on tests that you did in the bath.

ANSWER - Yes

QUESTION - I saw the video she has made some observations on the sink.

ANSWER - Yes

QUESTION - On the bidet.

ANSWER - Yes

QUESTION - On the water.

ANSWER - Yes

QUESTION - switch light.

ANSWER - Yes

QUESTION - And on the door.

ANSWER - Yes

QUESTION - And the cottonfiok.

ANSWER - Yes

QUESTION - On the box of cottonfiok.

ANSWER - Exactly.

QUESTION - Well, when she made these observations, I speak  
atecnica so, excuse me but with this pad, with this ...

ANSWER - tissue paper, paper towel is.

QUESTION - Paper towels, she obviously changed each time?

ANSWER - Yes, again, not only would change in the moment in which  
I found a drop, say, a drop upstream and downstream in the  
same, of course, within the sink, for example, there was,  
there was a drop on the edge of sink and continuity was a  
drop that would end towards the trap of the sink and had a  
continuity that was not right, one left, one here, one  
there was just a continuity I have seen fit use the same  
disk of absorbent paper, as they were equal in color pink,  
I repeat, those within the basin, had this managerial  
continuity, I decided, that I preferred not considered  
appropriate to use the same tissue paper.

QUESTION - But the material on sight, she found, was pink?

ANSWER - So it was a blood washed, we say in slang, meaning they  
do not have the characteristic red color of blood ...

QUESTION - This was where exactly?He's talking about the sink?

ANSWER - I'm talking about ...

QUESTION - Of the sink?

ANSWER - The bathroom sink, and the same color I have also found

inside the bidet.

QUESTION - Well, to bidet I noticed that she has made an initial determination on the edge of the bidet with this paper towel.

ANSWER - blotting paper.

QUESTION - And did it also ...

ANSWER - In the trap.

QUESTION - In the trap especially around the ring.

ANSWER - Yes Yes In the border.

QUESTION - Even in that case ...

ANSWER - Yes

QUESTION - In your opinion was the same .. .

ANSWER - Yes, yes, yes there are even photographs.

PRESIDENT - The same color?

ANSWER - The same color and the same direction

PRESIDENT - Pink?

ANSWER - Yes

DEFENCE - AVV. DALLA VEDOVA - So you interpreted it as a drop of water ...

ANSWER - No water, water and blood, however, from a particular place by gravity, say, it ends ...

QUESTION - And that she has detected visually, you could see this band?

ANSWER - Yes, you saw more dots in the same, with the same continuity.

QUESTION - But the more dots or stripe?

ANSWER - No one strip, I have not spoken to strip I spoke of a continuity between an upstream drop, say, and the relative drop that was going to stop the siphon ... is the sink, near the sink siphon trap that the the bidet.

PRESIDENT - I'm sorry, but there was between these two drops ..

ANSWER - There was some other ...

PRESIDENT - A strip?

ANSWER - No drips strip.

PRESIDENT - There were other drops that ...

ANSWER - drips.

PRESIDENT - That ravvicinavano.

ANSWER - Yes, that gave this continuity, we say

PRESIDENT - And the color was still ...

ANSWER - Always that.

PRESIDENT - Homogeneous?

ANSWER - Yes, yes we are all rosy.

PRESIDENT - "Rosea".

ANSWER - not red.

DEFENCE - AVV. DALLA VEDOVA - She has interpreted these different points or drops, as she defined it, a whole, however, because he used a single buffer, a single paper towel?

ANSWER - Yes yes yes yes exactly.

QUESTION - Do not have thought it could be several tracks and, therefore, was necessary to take various buffers?

ANSWER - No, I thought they were different tracks because there was a continuity between these two drops.

QUESTION - I HAVE understood. Look, here's something else that seems relevant is the handle of the door of Meredith, the inside handle, she has participated in the survey on that ...

ANSWER - No, I ...

QUESTION - Can you tell us anything about that? Because there were clear traces ...

ANSWER - I can say that we have observed, has been a particular photo, video shots of the object but not .. . the repertazione I have conducted other than in the tub, inside the room of Meredith Kercher I have not quite done.

QUESTION - And in particular, the handle has been the subject of

your consideration, as it was anyway ...

ANSWER - Yes, it was done a detail. We focus also means when we go to do ... the photographing means to the particular, that is, we do the whole leaf of the door but we do the detail of the handle smeared with blood.

QUESTION - Even there were no other marks on the door ...

ANSWER - Yes, yes, there were also on the plate ...

QUESTION - blood.

ANSWER - ... the brass which closes the lock we say, yes we were all photographed other drips.

QUESTION - And there, who did the investigation on the handle, you remember?

ANSWER - It says the repertazioni speaks?

QUESTION - yeah Repertazione material.

ANSWER - Always ... yes yes always ERT, Biology Section of Rome.

QUESTION - Look, instead returning to the kitchen, she remembers the circumstance of the glass on the sink?

ANSWER - Yes, there was a glass of clear glass on the sink drainer.

QUESTION - And you were present when it was found in it?

ANSWER - NO.

QUESTION - Do you know if it was found in it?

ANSWER - So .. No, no no no no. No I can not say because I do not know if you have found in it, as they found in it I can not say.

QUESTION - I understood. I ended up with.

PRESIDENT - Please prosecutor.

**PUBLIC 'MINISTRY - Dr. COMODI**

QUESTION - Just one question: she was in the room of the murder when the corpse was removed and found the hook?

ANSWER - Yes, yes yes yes. I was present for, behold, our survey

was not finished yet materially, that is, our visit ends at the moment there is no over the corpse, we continue to observe the scene and then after removal of the corpse, rhymes ... ie details of redoing all the details that we find.

QUESTION - Do you remember where you were at that ...

ANSWER - Yes, yes.

QUESTION - Precisely.

ANSWER - The hook was found ...

QUESTION - No where was she and where was the hook, then, yes.

ANSWER - How was the corpse? Sorry I did not understand.

QUESTION - No, where she was, where he was at what point.

ANSWER - Oh, where I was physically ... I was within the room. Ali'interno the room because I had to take notes right ...

QUESTION - Together with Dr. Stefanoni?

ANSWER - Together with Dr. Stefanoni and I was there because I had to take notes, how he had seen the corpse once lifted the duvet. I put the time in which the corpse was physically carried out of the room, so I was there, just to continue my work descriptive of the condition of the premises.

QUESTION - So you removed the corpse.

ANSWER - Exactly.

QUESTION - Then?

ANSWER - You removed the corpse and then we started to observe all things that we found under the corpse, that is a pillow. A pillow and ... okay, apart from the huge patches of blood substances, ammicche to training and hair and, indeed, lifting cushion that we realized that there was a fragment of a bra that we had not found attached to the remaining bra at the foot of the corpse.

QUESTION - And then the letter when it was on purpose?

ANSWER - No, she was not given the letter.

QUESTION - There has been . . .

ANSWER - Because we already had, however, put the letter on the bra that had already been discovered before removal of the corpse, being the hook, forming an integral part of the bra to keep from falling, maybe, just wrong, to show that maybe could be a thing outside or new we have not thought about numbering it, because they are already numbered was a letter, I do not remember, was given to the bra, that was the missing part of the bra, so we proceeded to do, however, the detail, because it was noteworthy, indeed, for us.

QUESTION - That is particularly so with the ...

ANSWER - Special photo speak.

QUESTION - Photo yes.

ANSWER - In the hook position and, therefore, we just do not put other letters in order not to fall into error, maybe once when we were going to review the pictures and everything, we knew, however, that what I described was the missing part bra, just.

QUESTION - I understood. Okay no more questions.

PRESIDENT - The party has asked, who heads the town, there are other questions to run out the examination.

### COURT

PRESIDENT - I'm sorry I just wanted to ask about the blue bath mat, you said that there was an imprint of the foot.

ANSWER - Yes

PRESIDENT - Foot bare or shod foot?

ANSWER - bare foot.

PRESIDENT - 'bare foot. "

ANSWER - Because you just saw the big toe. The shape hallux of the

foot.

PRESIDENT - Are you able to see the extent of this foot, which could wear the shoe?

ANSWER - No, no no.

PRESIDENT - You did not ...

ANSWER - Although it was not ...

PRESIDENT - There was one piece?

ANSWER - Yes, exactly.

PROSECUTOR - Dr. COMODI - a study on the footprint is all over, which then will be to report on.

ANSWER - Yes, indeed.

PRESIDENT - In the big bathroom were found traces of blood?

ANSWER - I do not understand, sorry.

PRESIDENT - In the big bathroom, traces of blood have been ...

ANSWER - No, absolutely not.

PRESIDENT - I'm not. ..

ANSWER - Solo, was defecating in the water, and nothing else.

PRESIDENT - There were no other tracks.

ANSWER - No, there were traces of substances ...

PRESIDENT - You Romanelli's ever seen, you know her? Can not say ...

ANSWER - Yes, probably I saw confused me but perhaps also with the other, with the Mezzetti.

PRESIDENT - And then I think I have heard that before you said that these traces left by the shoe print is attenuated hand they were leaving the room occupied by Meredith, is it?

ANSWER - Yes, say the most obvious can be seen inside the room, Kercher, and we also have the details. Then in the hallway, we see already that are slightly more labile, are ...

PRESIDENT - And I also wanted to ask, perhaps connecting the various points at which these traces were left, the line

that comes out where it was directed towards ...

ANSWER - towards the exit.

PRESIDENT - 'Towards the exit "and I also wanted to ask on the pillow, we accepted that there was a trace handheld.

ANSWER - Yes

PRESIDENT - Does this handheld track where he was on the right side, left . . .

ANSWER - No, I can not say the effect has been observed by colleagues after typing ... latent fingerprint ERT. I remember that there were bloody footprints of substance, yes, though.

PRESIDENT - Well.If there are other questions the witness is dismissed.Can we come next ...

DEFENCE - AVV. DALLA VEDOVA - Only one request, President.

PRESIDENT - Please Lawyer.

DEFENCE - AVV. DALLA VEDOVA - The photographic documentation was already submitted in previous hearings.

PRESIDENT - We have it, we've already in the file.

DEFENCE - AVV. DALLA VEDOVA - Can I ask you to be able to have a format on CD, because I see that maybe for our consultation, because I still had a copy of a copy, then color, however, so maybe if it's possible to get a trademark.

PRESIDENT - A copy of the CD.

DEFENCE - AVV. DALLA VEDOVA - A copy on CD so that. We too ...

PRESIDENT - Yes, I think ... You you have it? INTERVENTION - Outside microphone.

PRESIDENT - Maybe the prosecutor is responsible to provide copies of the CD that bears pictures to which reference has been made and that are already on record.Well. We can be the next head.

INTERVENTION - Outside microphone.

PRESIDENT - Let's take a small break.

THE PROCEDURE IS TEMPORARILY SUSPENDED

THE CASE AGAIN

**DEPOSITION OF THE WITNESS - GIUNTA AGATINO -**

THE WITNESS, a warning under ART. 497 CODE OF CRIMINAL PROCEDURE,  
THE LAW OF RITUAL FORMULA.

GENERAL ': dr. Giunta Agatino Board, employed by the Police  
Service of Scientific, papillary Latent Fingerprint Section  
Chief. Born in Caltagirone in the province of Catania,  
February 17 '58

PRESIDENT - The prosecutor can examine.

**PROSECUTOR - Dr. COMODI**

QUESTION - Dr. Giunta, wants to report to the Court when it was,  
say, invested the investigations which he did and that  
will describe what kind of investigations made, specifying  
what is his responsibility, specific, and when it arrived,  
with those arrived.

ANSWER - All right.

QUESTION - And what he did when he did.

ANSWER - November 2, 2007 So the day I was called upon to perform  
certain activities, from here in Perugia via della Pergola  
in the home, and I arrived here at this house at,  
approximately, 17. And the same day, at 17, I arrived with a  
team together with the expert ERT Francaviglia, I got  
together with Mark Pearl and photographed together with  
... sorry photographed Maximum Mainieri and dattiloscopista  
Mark Pearl. On day 2, therefore, these activities have

started and we started getting into the technical assessment of housing, with the bedroom, I think it was the lady, Miss Mezzetti. We started using the powders of silver black, magnetic powders, as the mobile ... the furnishings were white.

QUESTION - Excuse me for interrupting you, in general, not only in the particular case but in general your intervention, given that also involves the use of powders, chemicals and anything else in short, is before or after surgery to Section biological.

ANSWER - No, so in this case we have coordinated with the biological section.

QUESTION - Here, in fact, that I meant that.

ANSWER - And so we started in the bedroom of Miss Mezzetti, because inside, when we got inside of this house was still there the corpse of the victim. So we thought, since it had not yet arrived, Dr. Stefanoni to start our activity, so our finding with colleagues in the Laboratory of Scientific Police of Perugia, searching, verifying initially clear if they were present in the chamber of traces of blood, and having seen the open door and a drawer, a top drawer of a cabinet slightly open, we decided to begin the task using our systems, in this case esaltatrici dust on it, inside this room. Therefore, the activities began with the photographic documentation so initially, we had ini ... and coordinated the photographs had already been made by colleagues of the Cabinet of Perugia but we However, we rerun the photographic documentation of the room and then after that documentation activities color photo of the room, we started the business using surveying techniques, in fact, dust esaltatrici. This order type of investigation led us

to highlight, in this room, 22 fragments of footprints that we have marked, and we have begun to highlight, to emphasize with numbers, with some relief. This is day 2. The activities were, say, on this day, complete with that, let's say with this work using survey technique, in fact, only the dust and arrived at a certain time we finished and we left it. We then left this property, because Dr. Stefanoni in the contemporary with the coroner, should have done some further testing biological samples or biological in the room, in fact, of the corpse. So much for the day 2. On day 3, the next day, initially ...

QUESTION - So the room on day 2 Mezzetti?

ANSWER - Yes, Mezzetti room, with this ... only marking and numbering the fingerprint data. On day 3, day following we made the request to Dr. Mignini to perform an investigation using specific technical communication with (inc.) (acrylic?), For the 15 days of the date, in fact, the day 3, on the room, where We found ... where the victim was found in the room adjoining the bathroom and the room where there was a large boulder. But initially, in the morning, we did an activity, even in this case, not having yet had permission, precisely because the business assessment techniques, communication would be initiated to three nell'antibagno and large bathroom, where we noticed that there was a stool in the bathroom, the toilet, so we stopped in some way, especially nell'antibagno and somewhere in the bathroom. And, then, this part of the morning of day 3, so we did this activity, we found fragments nell'antibagno 7 and we ...

QUESTION - But we have no photos of these fragments?

ANSWER - Watch Dr. I can not open this file ... on this computer.

QUESTION - Prior to closing that was open, I think. The close ...

Outside microphone.

ANSWER - I can not find ... okay, okay. Yes yes this is, is this okay, okay, sorry doctor. This is the activity of day 2, day 3 here.

QUESTION - But I say the picture is not so much the representation, we say that the screen of the report .. .Or the photos of the prints or ...

ANSWER - No, I see the pictures yes doctor, but this is the problem that have been made of the same file more ...

QUESTION - Then it closes it.

ANSWER - It does. I apologize.

QUESTION - There they are, these are the pictures I have.

ANSWER - No, here we are at the footprints, I apologize, unfortunately three files are quite large.

QUESTION - No, this is the first. Then the first.

ANSWER - No from page 101, this is another. So... No, we go ... I apologize. We need to go here ... Just a second.

QUESTION - All right, if not to describe.

ANSWER - We are coming, Doctor, we need not go so if I do not know where they are. I had to use my computer. Here they

QUESTION - There it is.

ANSWER - Well, so we started, I repeat, with the documentation outside of the building. here it is, here is the part, say the plane down. It is very slow I do not know because. Here we begin to be ... INTERVENTION - Outside microphone.

ANSWER - The report, the report was made at the time of first surgery he did, in fact, my Section, joined me in the building of ... INTERVENTION - Outside microphone.

ANSWER - Yes, yes.

PRESIDENT - Yes, I think we have it in the file with all photos.

ANSWER - Yes, the date it to him if he wants to tell you.

INTERVENTION - Outside microphone.

ANSWER - It is January 31, 2008. INTERVENTION - Outside microphone.

ANSWER - I'm sorry, but unfortunately ...

PROSECUTOR - Dr. COMODI - This is already in the Court's file, right?

PRESIDENT - Yes.

ANSWER - Well, here in fact is not easy ... we should rotate Here we see already in short, short. Here, this is the entrance, once inside, inside here, this should be the living, here is short, this is the activity which, I repeat, we arrived at 3 days and still we are the first of 15, so we did a technical activities with specific reagents until now we pause, in fact, all'antibagno and large bathroom where we had the relief of powders esaltatrici, ie clear ones, all those systems that are normally used for the inspection activities. Inside, instead of bedroom, where in fact the body had been found, at 15, started the business itself - this is the day 3 - and 46 fragments of impressions we get there, we marked ...

PRESIDENT - 46 fragments?

ANSWER - 46 fragments of fingerprints, President.

PRESIDENT - Yes, Please.

ANSWER - Day 4, the day being over 15 because it was winter, so the light was, it was almost up to a certain time there, we could not photographically documenting the natural light we decided to photograph fingerprints taken, the fingerprints are highlighted and marked The next morning, on day 4.

PRESIDENT - November 4?

ANSWER - November 4, yes, and we have documented everything that had been obtained from (fumigation) in the room, in fact, the victim. Later that day 4, we treated the bathroom

adjoining the bedroom, now, was in fact found the corpse, the bathroom was tiny, to distinguish it from that great ... where it was, indeed, present defecation, except that in this, in this activity in the large bathroom we did not find any fragments of imprint. We continued activities in the bedroom next to that, indeed, the victims and we started ...

PROSECUTOR - Dr. COMODI - namely that of Amanda Knox?

ANSWER - The Amanda Knox's bedroom and found fragments of 9 footprint. Afterwards, we went into the living room, where in fact there was, indeed, the kitchenette. We have treated, we had only the authorization for three rooms, so the bathroom, baby, the room of the victim and that of the rock, to treat with (fumigation) so we missed the last room. Then, the other rooms we have treated using the classical systems of exaltation of the fingerprint with the use of powders esaltatrici. And in this case, therefore, in the kitchenette on the ground floor we have found 3 more pieces of print.

QUESTION - "The ground floor" means that the ground floor?

ANSWER - The plan, we have treated only a plan, I apologize, I apologize, the plan basically where, precisely ...

QUESTION - The house of the crime say.

ANSWER - Yes, yes yes indeed, I apologize. On day 5, then the 'last day, we found the fingerprints also using, in this last room, the third. .. No, we have also dealt with apologies - the hallway, kitchen and bedroom in adjacent areas where the corpse was found, and the ground floor, I apologize, yes esaltatrici by spraying dust, that is all part toward the living room and Part of the entrance. In the first case we found fragments of 5 fingerprints, we found another 7 and then ...

QUESTION - Well, I would ...

ANSWER - ... We arrived at the entrance.

QUESTION - Yes

ANSWER - Finally, we treated the bedroom where, precisely, was found the stone, the stone with the (inc.) using acrylics and then to contrast the dust and in this case we have found 5 pieces of print. As a final activity, or rather as an asset on the back we picked up the pillow, or rather the pillow of the victim's room and we have taken that material will be printed and then, If you want we can also say the whole paper because it was not possible to treat it on site, because it was necessary to treat at the Scientific Police Service with suitable and appropriate (inc). chemical.

QUESTION - Then, sheets, notebooks in this sense?

ANSWER - That's right all those (inc.), which are attached and that now we will see, we have documented photographically ... It is very slow.

QUESTION - And yes, it is very slow, but I would ask you, Dr. Giunta, of ...

ANSWER - This is the room of Mezzetti, this precisely the dressing room, the bathroom.

QUESTION - Yes, however, describe the points in which the footprints were found, which of these footprints have been found useful for comparison purposes, which are not considered useful.

ANSWER - Yes

QUESTION - So that each room, please.

ANSWER - Yes, yes.

QUESTION - Even if it says, in short, though.

ANSWER - Yes, I wanted to just see ... if we can see them too. Here, these findings are those taken.

QUESTION - That is in print.

ANSWER - Those paper.

QUESTION - Of which spoke first.

ANSWER - That's right. Excuse me but I can not, my computer is obviously slightly different, I can not ... This is precisely the room, the door. Here, this is the room where the corpse had been found. This is the pillow I mentioned before. Here, these are the remains of the corpse and a room, front and back, the camera body, here are all these paper finds that required a finding particular technical with using (inc.) the anidrina in this case.

QUESTION - Then the results of the investigation, are others who relate to it right?

ANSWER - Please?

QUESTION - I say on the results, sull'attribuibilità or not ...

ANSWER - So that's a business, if you like, I can somehow give you some more specific information, but we say ...

QUESTION - But has not she done?

ANSWER - No, we have only enhanced the fingerprints.

QUESTION - That's right.

ANSWER - The activity then utility and award comes from another office, another division that is against the office, then, Dr. Rinaldi et cetera.

QUESTION - All right.

ANSWER - Anyway, I wanted her to see the footprints, if we can. Here, this is one of the first footprints found, marked with the letter 'A', the pillow, the pillow.

QUESTION - What footprint?

ANSWER - So this, if I am not mistaken, is the mark that has been attributed to Guede, here it is.

QUESTION - I say palmprint?

ANSWER - It is a palmprint, palmprint is a.

PRESIDENT - Where was this imprint, said the pillow?

ANSWER - On the pillow. We found 4 traces on pillow case marked with the letter 'A', 'B', 'C' and 'D'.

PROSECUTOR - Dr. COMODI - ECCO, describing them all.

ANSWER - In fact, the 'B', we have already seen, the 'C' is this one.

QUESTION - "The 'C' is this here" I do not see.

ANSWER - Wait a second, Doctor, because this I am not very computer. Here it is.

QUESTION - And this would be?

ANSWER - It seems to be a footprint left traces of blood on the pillow. And this is the D ', here, this is the last impression as papillary.

QUESTION - yeah.

ANSWER - Is it okay?

QUESTION - Yes

ANSWER - We have, however, I believe, photographed - I do not know if it is present in this report - even the shoe prints.

QUESTION - Indeed.

ANSWER - It should be this one. But here goes too far, I do not know why. Here, this is the second. This is the second and this, Doctor, is the first.

PRESIDENT - Excuse me, where is that these prints were?

PROSECUTOR - Dr. COMODI - on the pillow.

ANSWER - On the pillow, President.

PRESIDENT - Even these.

ANSWER - Yes, they were 4 and 2 papillary fragments of footprints shoe prints.

PROSECUTOR - Dr. COMODI - you remember if these prints, then, subject of course to investigate more deeply with the doctor Rinaldi, et cetera, do you remember if that shoe

print were large or small, that is, if it was measured, in other words.

ANSWER - I remember, I remember a shoe impression, to say the truth, petite, and a rather larger. I remember this, but then again it is an activity that is beyond a little 'out of my expertise.

QUESTION - All right, all right.

ANSWER - Here, however these are the marks a bit 'better, you see much better, it seems almost a negative, because we were able to photograph better, and here they are. This time.

QUESTION - It is always that of the pillowcase?

ANSWER - Yes, they are seen as virtually the negative the 'A' has become dark, the 'A' has become clear that it was dark and so in this case we can better see the papillary heads. It is only, say, a ... a change ...

QUESTION - I mean those signs ... Excuse.

ANSWER - A change of color, please.

QUESTION - Excuse me doctor, to show up better because otherwise ...

ANSWER - There it is, this is, is this one, the 'A' is this one. But I can easily ... says.

QUESTION - So say those signs, those lines, those white strips inside those black spots, darker, darker are the lines of the hand? So to speak.

ANSWER - No, the furrows of the hand, should be ...

QUESTION - And are the furrows of the palm of your hand?

ANSWER - They are the grooves, the ridges are black, the palm of your hand. If you see, is a palm of the hand made ... I repeat, I'll tell you but you should tell someone else, put it upside down in this way.

QUESTION - Just like that

ANSWER - Is it okay?

QUESTION - Yes

ANSWER - We reversed the color from white became black than before to better see the footprints, and that if I am not mistaken is attributed. This is the 'B', and see if you see a lot better than it was before.

QUESTION - Well, yes yes.

ANSWER - It is much improved, the 'D' and 'C' here they are.

QUESTION - All right. But the finger belongs to the same palm above? No.

ANSWER - One moment, the palm is a type of work we do and although we distinguish papillary ridges of the papillary ridges in two categories: capillary ridges digital - because they come from your fingertips - and fingerprints papillary handhelds because they are the impressions that come from the , say, middle of the hand. The impression given was a handheld, not a handheld camera. Okay?

QUESTION - I understood.

ANSWER - And then there are, here, highlighted fragments November 2, 2007 in the bedroom. Here they are, he runs too much and do not understand why.

QUESTION - "Input Port", which means door though?

ANSWER - It is the first .. . The bedroom, on day 2, if you remember was the doctor's Mezzetti. Day 2 began, we, with that of Mezzetti.

QUESTION - Then try to go in order, though, because otherwise we are confused.

ANSWER - Yes, in fact, day 2, day 2 I'm saying.

QUESTION: - Perfect, then back to day 2, this is the door of the room Mezzetti.

ANSWER - Yes, perfect. Is that ok?

QUESTION - All right. And what you found there?

ANSWER - Well, again, as part of Mezzetti we found fragments of

fingerprints 7. The number 1) marked with the number 23, the external upright left of the entrance door dell'antibagno. No, I'm sorry doctor, I'm sorry. Then 22 marks, not watching the numbers 9-3-1 in reality is the documentation, the number 9 ... characterized 1-9 outside the input port and, therefore, should be this. The outer part.

QUESTION - Yes, that are darker than those highlighted words.

ANSWER - Here they are.

QUESTION - Yes

ANSWER - Look, when we talk about fingerprint fragments note that photography can also contain fingerprints, so they are then actually reliefs. Is that ok?

QUESTION - Yes

ANSWER - So they can also contain fingerprints.

QUESTION - Yes.

ANSWER - Okay, this one here. Here, you see they are all footprints that we have highlighted. We have tried to see, in this way, where they were placed. Here they are, in more detail: the 1, 2, 3 ...

QUESTION - Do you remember if they were awarded to someone? Always subject then ask specifically ... If you remember otherwise it does not matter.

ANSWER - No, we check it. Look, the important 1, 2 relief, relief ... 3 I apologize. Relief 1), Relief 3), Relief, 4), 6), 8), 9), 10), 13), 15), 18), 19), 20), 21) and 27) 15 fragments of imprint are been attributed to Laura Mezzetti, who was born in Viterbo on 9/5/1980.

QUESTION - Yes. INTERVENTION - Outside microphone.

ANSWER - Please? INTERVENTION - Outside microphone.

ANSWER - 15 fragments of imprint. But, I repeat, is an activity that I am giving, but do not tell me this is an activity,

an activity is always comparing the office of the Second Division, so I can also say things are not completely correct.

PROSECUTOR - Dr. COMODI - We continue with the list of surveys.

ANSWER - Here, we have 10 to 12 always the door, in this case, the inside of the door of Mezzetti and, us, then after having made them see in general, we show in detail.

QUESTION - Yes

ANSWER - Always stop the fact that if I can easily ...Here they are, or goes too fast to be 0 too slow. These are the top 3, 121 ...Photo 121, 10), 11) and 12) is fine?

QUESTION - Yes

ANSWER - This is the last perfect. Here, this is the fragment number 13), 124 and 125 this is the number of photos. I can not ... Here, this is in general ...

QUESTION - This is always the door Mezzetti?

ANSWER - Yes, this time they are more ... 11 fragment with the number 14, in more detail, and we showed earlier, if you managed to see him, with much difficulty, I think, the door and this is the real detail.

QUESTION - All right.

ANSWER - This is 15, where he was found and then more usual footprint real, more detailed, here it is.

QUESTION - I mean, so it's on board?

ANSWER - On the edge, so the edge on the edge, but ... If you want to see it, here is this one, here it is. If you can see, in short.

QUESTION - All right.

ANSWER - I apologize, I said nonsense, we are here on the desk top. Sorry but I find myself with this. These are 16 and 17, this time are 16 and 17 are on the edge this time.

QUESTION - Of the door?

ANSWER - Yes, the drawer I apologize.

QUESTION - Here.

ANSWER - In the chest.

QUESTION - The fingerprints on the edge of the door I remember them however.

ANSWER - Here are some 'seeing ...

QUESTION - All right, but we also go forward.

ANSWER - And yes, Dr. agrees it here otherwise we do not stop with this ... more

QUESTION - No, go ahead, go on to describe.

ANSWER - Yes, however if you want to see can see it in more detail why I take issue with.

QUESTION - But I was interested so much in fact that the Court saw in other words, even if the photo is not available, which are enhanced.

ANSWER - However, in other words, we have found virtually 108 Dr ... from 108 measurements of footprints, 56 useful, non-profits, we are talking about surveys, 52 as regards profits and this time the fragments of footprints have been identified 47 fragments of unidentified footprints 13, 17 fragments were assigned to the Kercher; 5 to Sollecito, at the Knox, but I think that of the glass, then maybe we see more detail, fragment 1 to Guede, 15 pieces - as I said before - to 5 Mezzetti and other fragments Romanelli and 4 at some of these silences , say, at, say, General.Okay?

QUESTION - All right.And indeed, especially since we see what are the impressions that have been attributed to today's defendants and where were they?

ANSWER - Well, I can always give him repeat this with the data that I report the fingerprint against fellow office.I begin the ...I think we have said Kercher, right?

QUESTION - Yes

ANSWER - We can repeat, are 17 - we have said such remarks are -  
5 fragments Raffaele Sollecito are the important 12), we  
can also say the ring and left little finger, was found  
...

QUESTION - I know but not so much the number that I ... Here,  
where it was found this stamp?

ANSWER - Inside the door of the bedroom behind the living room  
with kitchenette downstairs.

PRESIDENT - In the bedroom ...

ANSWER - The ground floor is the only plan that we did because  
...

PRESIDENT - Excuse me, what the bedroom?

PROSECUTOR - Dr. COMODI - So, in short, the famous board room  
Mezzetti, of Mezzetti door of the room, right?

ANSWER - The 12) should be that of Mezzetti. Then the 68), the left  
palm, outer side of the door of the bedroom of the victim.

QUESTION - Do outside?

ANSWER - Make outside, then at the outer face.

QUESTION - Yes

ANSWER - The relief 70) left thumb, the outer face of the door of  
the bedroom of the victim and 1'86, surveying 86) the left  
palm to the refrigerator door.

QUESTION - All right, these are the ones that were, by his  
colleagues, attributed to Sollecito?

ANSWER - Yes, 5 fragments etcetera, etcetera. 1 fragment was  
attributed to Knox, and is the major 103) found on the  
right index glass kitchen sink.

QUESTION - Yes

ANSWER - 15 fragments, okay, we've already said, it's useless ...  
Oh no, excuse me, 17 is the major fragments at Kercher 31)  
left index finger, hair dryer in the room of the

victim.Survey 33) a and b, left middle index of the glass window, right side. Survey 34) left palm, right side window glass.Survey 3 6) right index finger, the heater higher.Survey 37) left palm, sliding door closet, but clearly we are talking about victim's room, I mean.

QUESTION - Yes, just fact.Here in the cabinet doors, we want to talk for a moment the doors of the cabinet as you have found the fingerprints of the cabinet doors.

ANSWER - After running the business of fumigation using (inc.) anacrílico, the (inc.) anacrílico is a substance that must be asked, must be heated inside, inside the room by appropriately heating plates because This spraying liquid into froth and binds to the lipid components of sweat to form a white polymer.If she sees, in fact, even the doors, in this case, the room of the victim were white, it was necessary then, somehow, try to create the right contrast and so we used black and silver dust, and dust Magnets always black, this gives precisely the possibility expert photographer, documenting the power and then photographing footprints marked with, say, the same ... the same system that you use with the fotoseñalamiento with black ridges on a white background, ie, because the polymer that is white in reality these systems becomes dark, and thus makes the ridges dark on a light background.

QUESTION - To do what was necessary to disassemble these doors?

ANSWER - As the doors were opened and placed on the track, when we sprinkled, then, this, this substance, exalting this powder was necessary to document them.To be able to document a system we use, a lighthouse, a Crain-scope, a light system, besides the natural light, because there was the window that allowed us to have a certain brightness, but when this brightness, unfortunately, is lacking we

have seen that need to be able, in fact, is not a simple task, as is the case in surveys, namely the acquisition of the impression using the adhesive, thus taking away the impression it was necessary, because this substance, this reagent acts directly as a glue object implies virtually document it photographically. When we document photographically we document in black and white, that's why it was useful for us to use these powders esaltatrici black on white. That pretty much put us in the same condition as when you do the so-called fotosegnalamento. To be able to do this, however, Doctor, it is clear that the photographer could not get in the condition of discomfort in the photograph, because the time of photography prints are very long, so it is necessary, but we do a little 'to all objects You must pick up items, place them under certain conditions, including light, grazing, or where an accident or even under spotlights, and consequently to photography in the documentation that we obtain the same result you get to look directly on the object, then, we have find all the ...

QUESTION - And where you have physically put these doors?

ANSWER - These doors we have, therefore, raise, bring up, and we tried to make, putting them under conditions that we kept us in some way that the photographer could record them one by one.

QUESTION - So the two kept.

ANSWER - Two people we kept them, yes, or ...

QUESTION - And one photographed?

ANSWER - Yes, maybe leaned on the few chairs, I can not remember perfectly, still leaned in the way that they could be in some way horizontal power in some way to document, for each one, here, I mean that each footprint was documented.

QUESTION - And where you have held? Inside the room, you've photographed?

ANSWER - No, we ...

QUESTION - O out of the room?

ANSWER - After doing this .. .Keep in mind that when we use these systems, we document before us the room, already photographed, as I said before, that is what makes my photographer? To crystallize the situation, as they are, as they are, you are ... we find them in the survey, the first of our, of our assessment activities are always documented, so much so that we did, if he sees, also used photographs of colleagues in the Cabinet of Scientific Police of Perugia, the As we learned in our room and was still present in body, in this case, and we have repeated.

QUESTION - Yes

ANSWER - But we still do not stop there, however we continue to do our work of photographic documentation, can also occur because of different things, I repeat, from the moment perhaps came the coroner, now for example, and then the first to the technical assessment we document our activities. Once this is done we start to do the real technical assessment, in this case using the (inc.) anacrilico. Then, close the room, seal it, somehow we keep closed, and we allow this to be fumigated. After this fumigation ...

QUESTION - This?

ANSWER - Fumigation of esters, ie that foreign ...

QUESTION - So, I say, you were in the room when ...

ANSWER - No, we were out, because we close.

QUESTION - Outside the room, then out to where?

ANSWER - We leave the room, we put ourselves out of the systems we have, I repeat, heaters, we give some time to warm up

to the plate and spraying takes place. So, clearly, we leave for a time 15/20 minutes to heat the plates, the current split off after 15 minutes and then expect that this reaction awenga. That this ester, it is sprayed directly on the turn from lipid components of the exudate, and we stop there, we stop for a while. When we return, one, maximum two persons, of course, opens the door, if you can even open the window to make this go away and sprayed immediately after floor plan with us if we do not hear clearly the smells of this ester and then after we get to make the so-called documentation, in this case ...

QUESTION - Why are toxic.

ANSWER - ... we have not done at all, because sometimes you can see the mark as it is, also white, white with this polymer. When it is necessary - again - the contrast in this case we use the powders esaltatrici and, therefore, we color, pigmentiamo, we make these dark papillary ridges, this is the end.

QUESTION - But when, my question was different, maybe I expressed badly. When you have covered with this substance, which I understand, you have waited for this reaction and toxic chemical or other substance that ...

ANSWER - Yes, it is a certain chemical reaction.

QUESTION - Well, this substance act you've already removed the doors?

ANSWER - No no no no we have the doors removed later, we still had not ...

QUESTION - And when you photographed, where you ... Where were you when tenevate?

ANSWER - So after you spray ...

QUESTION - Do you understand?

ANSWER - I understand your question. After you spray when we left

so we could see the contrast, as was the impression, when it was not possible to do so we used the dust esaltatrici. Without this, the sides, we have taken these doors, we have placed, we kept us because the photographer was, in fact, document them using, maybe I do not know if there was a chair, now I can not say, using ... and the photographer with the lights, because someone needed to be able to also provide lights documenting those footprints that otherwise was hard to do, because in low light becomes difficult to get a mark that has the same characteristics of what we see, then virtually all the print that we have documented the documented and we placed these two doors, when we finished, we're talking about this in the end of the activity, we rested on the front door of the room the victim, poggiandole the door.

QUESTION - On the entrance door.

ANSWER - Yes, the front door.

QUESTION - What was open or closed?

ANSWER - It was open, was opened.

QUESTION - So the door wide open to the wall, anyway?

ANSWER - Yes, perfect.

QUESTION - You, you know that these doors were also analyzed by someone else of his colleagues at different ends?

ANSWER - You look at the doors as I say, maybe you see from the photograph, I believe, had traces of blood, it may be that they also did, surely they will also have the fact, however, we repeat this activity we have not made, we have only done the activity that was related to the establishment of latent prints, then, probably will have it done so, of substances from blood spray I remember me, maybe you can see here.

QUESTION - Doctor, excuse me, when you spoke, I think 13 or 14

unattributed fingerprints, can not remember ...

ANSWER - No, there were 13, then at least the date of this report, there were 13.

QUESTION - Here, refers to the entire apartment or the scene of the crime?

ANSWER - No, I mean the whole apartment.

QUESTION - Inside apartment?

ANSWER - Yes, of course.

QUESTION - Do you remember how many impressions were not allocated, how many fingerprints are not found in the assigned room, instead of murder? If you do not remember it does not matter.

ANSWER - No, no I do not remember, but no, I'm remembering right now, no. I repeat, is more like a business colleague or colleagues, we just provide the photographs and fingerprints do not even know whether they are useful. We brought a dattiloscopista because it often happened that certain tracks were even excluded from the photograph, because they did not in itself the power of these tracks at least have the minimum of some fragment, then went to look at those who could, in some way, perhaps be useful. We maybe believed useful fingerprints photographed and then maybe we will not have been more.

QUESTION - Look, you also .. . you who use the Luminol?

ANSWER - NO.

QUESTION - "NO" who?

ANSWER - I think Luminol is a substance, at least what I know, need to go in search of substances such as blood, blood substances.

QUESTION: - Perfect.

ANSWER - It is an activity of fingerprints.

QUESTION - But footprints along the corridor have been found?

ANSWER - Well, the fingerprints of the corridor, though she refers to as 'fingerprints corridor yes, you are also found in ... However, papillary impressions, right doctor?

QUESTION - Yes

ANSWER - Yes, I suppose, something I think I said yes.

QUESTION - So maybe I have not heard I'm sorry.

ANSWER - No, no, do not worry. Here, in the area, running from the kitchen to the living room, I found 7, and ... So the entry, living room, kitchenette, no this no. Not enough, I find 7. 7 and the entrance to the living room, kitchenette ... I am, yes I 7, I find myself 7.

QUESTION - Where?

ANSWER - Then with a marked number 93) on ... Excuse me ... on the TV left side in the kitchen. One marked with 94) on the switch plate light point, place ...

QUESTION - No, but I say we say of the corridor area night, so to speak, after the gate that divides, but rather two rooms have a bedroom in the living room actually, because even that of Romanelli's in the living room, but I say in the hallway from the living room separated by a door, then the corridor leading to the rooms of Knox and Kercher.

ANSWER - No, 7 ... No, wait!

QUESTION - They were not made there or surveys?

ANSWER - No, no, no surveys we have done throughout the apartment.

QUESTION - All right. President considering that then there is already available to you the report for me, for now, no question.

PRESIDENT - Yes, yes it already acts in this regard.

ANSWER - No, excuse me, I think they are 25) but ... no this is the bedroom, no, no no ... look

PRESIDENT - No, this corridor, the prosecutor asked her ...

PROSECUTOR - Dr. COMODI - But that's OK, that's great.

ANSWER - No, I have found. INTERVENTION - Outside microphone.

ANSWER - NO.

PRESIDENT - The Civil Party?

CIVIL PARTY - no questions.

ANSWER - In the living room ... but I've found

PRESIDENT - Yes, yes, okay, then maybe we might come back. The defense of the accused if there are any questions.

DEFENCE - AVV. MAORI - Yes

PRESIDENT - So the head is common, I think, Knox defense only. Please Lawyer.

**DEFENCE - AVV. MAORI**

QUESTION - You first, Doctor, you spoke - at the request of the prosecutor - the palm of the hand of Rudy Guede who was found on the bedspread.

ANSWER - Yes

PRESIDENT - On the pillow lawyer, right?

DEFENCE - AVV. MAORI - on the pillow, the pillow and apologize also spoke of a finger, the impression of a finger.

ANSWER - NO.

QUESTION: - so I've heard.

PRESIDENT - The question, however we do here and if the witness is clear.

DEFENCE - AVV. MAORI - I seem to have even heard of a fingerprint of a finger, if the confirmation or otherwise.

ANSWER - NO.

QUESTION - Then I must have misunderstood me. I seemed to have understood ...

PRESIDENT - So only the imprint?

DEFENCE - AVV. MAORI - PDA and not a finger.

PRESIDENT - On the pillow.

DEFENCE - AW.MAORI - on the pillow.

ANSWER - There were other footprints, I'm sorry, but I know I do not seem to have been granted and nor even that they are so useful.

QUESTION - So I heard, I've probably misunderstood, however, she only confirms palmprint attributed to Rudy Guede and not that of a finger. You have come before or after the geneticists?

ANSWER - We will intervene after the geneticists in the room ... victim's room and this is due to the fact that when we do this, it is now established practice in the investigations that we do, we are picking activities that are performed on a biological level, now by protocol, by their colleagues in biology, after activity, which specifically collection of their tracks, then we come in and do the technical assessment, which specifically mark.

QUESTION - So in other words it can happen under certain circumstances that the tracks are completely absorbed by the sampling done by geneticists, and so in other words ...

ANSWER - We are talking about what tracks, Excuse Lawyer?

QUESTION - Let the blood traces.

ANSWER - But I do not ...

QUESTION - Let's make an example, the handle of Meredith's room.

ANSWER - Yes.

QUESTION - You have made of the findings? Have you found, you have exalted the tracks, footprints?

ANSWER - And no there, there we did ... So the investigation was done on the entire room.

QUESTION - Yes, I'm talking about ...

ANSWER - But there was not found, or rather we have highlighted footprints.

QUESTION - We know, from the movie we saw that this handle was ... She was also the view will be soaked with blood.

ANSWER - Yes, Yes

QUESTION - So that the blood was, so to speak, and found in it taken by geneticists?

ANSWER - I think so.

QUESTION - And so consequently it was not possible for you to enhance any kind of impression?

ANSWER - Yes, I agree, however, must .. .Lawyer must understand something very important, when my fellow does this type of activity, this activity should be done (with grunu salt), that is, see if there are footprints in the blood substance, if there are clearly sampling does not.

QUESTION - But the prints are ...

ANSWER - Meanwhile stops, is clearly documented photographically and then also the imprint is taking, this is the practice.

PRESIDENT - But, excuse me, the lawyer asks the imprint is visible?

ANSWER - Yes, blood is visible.

DEFENCE - AVV. MAORI - Always Visible?

ANSWER - It is a footprint, a footprint in the blood is visible, as if she is ...

QUESTION - And if there had been a first impression?

PRESIDENT - I'm sorry that you mean before?

DEFENCE - AVV. MAORI - So if there was an imprint on the handle and then later a second impression with blood, also the first impression that is not visible because it was not ...

ANSWER - I'm sorry, as I noted above I have the impression if the blood, that I would not have even been able to detect it.

QUESTION - The question is this: if the geneticist has

intervened, of course, has taken the whole substance and has been impossible for you to find and highlight the existence of any impression.

PRESIDENT - I'm sorry but there's a Lawyer passage, that the blood that is left of this handle, under the handle if there was an impression, not of blood, the blood left to us clear that imprint on the original?

ANSWER - The covers do not know if the clear, but certainly covers it.

PRESIDENT - You can go back to that ... more

ANSWER - It would not be possible for anyone.

PRESIDENT - It would not be possible. Please Lawyer.

DEFENCE - AVV. MAORI - can not be reinstated question of the President, because it has already been removed in the withdrawal?

ANSWER - It would not be possible because she covers it with blood, it's like ...Excuse me, I take this mark we put blood or paint, you do not find anything. It's the same thing.

QUESTION - The same thing can be said in the bathroom, that any fingerprints ...

ANSWER - Lawyer ...

REQUEST - Finger prints on ...

ANSWER - The fotosegnalamento you ...

PRESIDENT - Excuse me a moment, and then we end up. Please, go on then.

DEFENCE - AVV. MAORI - The same thing, I mean what you said before, it may be reported to the bathroom, if you push the switch, then switching on the course is left an impression, which may be bloody, if there is of blood, or

an imprint normal and therefore not visible if it is not

...

ANSWER - The I was trying to say this, if I was dirty hands.

QUESTION - Excuse me.

ANSWER - I pray.

QUESTION - If she spoke before the geneticist and took the sample on the switch of course you could not jump the tracks. Yes or no?

ANSWER - If you say yes or no ...

PRESIDENT - No, no answer, she is not responding ...

DEFENCE - AW.MAORI - I must say yes or no, then explain later.

PRESIDENT - I pray.

ANSWER - All right, we do see when I visit I've made a lot before ... As I said the Mezzetti, because we've covered before the arrival Dr. Stefanoni? Because we realized, in the activity that we have done with the survey we did that there was no blood substances, there was no activity, we saw no biological traces and then we did the activity, the finding of footprints .I think the same way Dr. Stefanoni if he had seen a track, because we speak clear if she is dirty ...

PRESIDENT - Doctor Dr Stefanoni is the geneticist?

ANSWER - It is the geneticist, of course.

PRESIDENT - Just to recollect the diction first used. Please, go on then.

ANSWER - I mean, we arrived at 17 in Via della Pergola, she arrived later, but she did before finding biological activity, or rather a collection of biological activity because this is, is not a finding she ago, and we then make withdrawals performs the inspections. If you .. . If I was covered in blood and dirt I paint my papillary ridges which have acceded in itself, have acquired the blood or

paint, if I touch an object leave the impression with the blood, or the paint on the object , so if he saw the footprint would not subsequently withdrawn.

DEFENCE - AVV. MAORI - And if he has not seen the mark and had been taken?No talking is because of ...

ANSWER - if he had not seen if there is, if there is an impression taken it seems logical.

QUESTION - Are you certain that was the only doctor Stefanoni to perform these types of withdrawals?

ANSWER - Yes s ì she made them, made them her ...

QUESTION - Even in the bathroom?

ANSWER - Look, she made them in the bathroom, in the handle, because we too were present.So, I do this already I've seen, so did she. As for picking a few, I think the removal of Mark Sabatelli I did it, what was perhaps the only, and another I think he did Ms. Gioia, I think the Cabinet Scientific Police of Perugia.The. other blood samples seems to me that all she has done.Addition of these ...

PRESIDENT - All right.

DEFENCE - AVV. MAORI - You mentioned also questions of the prosecutor, as the doors. The doors of which have been removed to make these pictures and then put back on the spot.These ...

ANSWER - No, I did not put back on the spot.

QUESTION - Do you not remittances?

ANSWER - I have rested, we have rested on the door that was open in the room of the victim. DOMA NDA - and were supported in part, so to speak ...

ANSWER - So the door ...

QUESTION - Inside or outside of the door?

ANSWER - The door was open, so open in this way, leaning on the door that was open.

QUESTION - And so it means, because I did not understand ...

ANSWER - On the outside of the door.

QUESTION - "The outside of the door."

ANSWER - The outer part.

QUESTION: - Perfect. One last thing, you knew that you would have to make a second visit on December 18?

ANSWER - Yes, yes.

QUESTION - And you know why?

ANSWER - Please?

QUESTION - Do you know why? Why was prompted this second visit? You know who has requested it?

ANSWER - I think they were colleagues in biological investigations, but further repertazioni do, do well ...

PRESIDENT - I'm sorry, she has participated in this second ...

ANSWER - No no no.

PRESIDENT - did not participate.

ANSWER - He said if they know, and I said, I have not participated.

DEFENCE - AVV. MAORI - He's right, Mr. President, I asked if he knew, and then after it has participated.

ANSWER - I have not participated.

QUESTION - He said he told in advance who was not involved but I'd like to know if he was aware of the reasons for which should have been done ...

ANSWER - I think the repertazione and more activities, more research.

PRESIDENT - Yes, here, if you know for sure, not with deductions?

ANSWER - Yes, yes it is my deduction if not ...

PRESIDENT - With deduction they can say.

ANSWER - ... would make sense to do an inspection.

PRESIDENT - As his assessment, but not sure how ...

DEFENCE - AVV. MAORI - Are you aware of the letter that was sent to the doctor Intini the Prosecutor on 13 December 2007?

ANSWER - NO.

QUESTION - Thank you.

PRESIDENT - Please Lawyer.

DEFENCE - AVV. ROCCHI

QUESTION - Look, just a question of highlighting the activities of fragments of papillary impressions you have held within the scene of the crime in 3 days?

ANSWER - Yes

QUESTION - So it is.

ANSWER - On 3, you look with fumigation at 15, I give their time.

QUESTION - How many of you were in the room?

ANSWER - Look, we like, like ERT, ERT group were 4, our survey began with 4. In fact, the first phase was that of the photographer to crystallize the situation as it was with his photographic documentation, the experts highlight fingerprint me and the expert Francaviglia, and especially the two of us. The dattiloscopista, at this stage, it is not addressed, because the dattiloscopista intervenes only at the end to see which should be photographed fingerprint or not. so actually 2 most 3.

QUESTION - Excuse me, photographs of which you are talking about ... The photographs you mentioned are immediatamenteprema of this ...

ANSWER - Yes, those colors. I'm trying to describe this: the activities of crystallization in the survey, in this case - she said - specifically, in the room of the victim, before you photographically documenting everything that

you can take photographs, so you have a clear picture of the situation crystallized with color, then take action, you run the technical assessment, of which I have spoken with the fumigation, then you make a black and white photograph taken of the imprint.

QUESTION - I understood. Listen, and when she did this determination has seen, within the room, the floor a piece of cloth with hooks bra?

ANSWER - Maybe, I do not know, yes I remember the bra, but I do not know.

PRESIDENT - The bra has seen it says?

ANSWER - Yes, I saw the bra.

PRESIDENT - Ask the Lawyer a hook, a piece, he noticed that?

INTERVENTION - Outside microphone.

ANSWER - There was so much stuff, President, sincerely .. .Perhaps, too, that there was, surely, surely there was indeed, but surely there.

PRESIDENT - Excuse me, when ... just to ... When the victim's body was moved she was in the room?

ANSWER - NO.

PRESIDENT - It was not present.

ANSWER - NO.

DEFENCE - AVV. ROCCHI - It's the next day.

PRESIDENT - Yes, it was the next day.

ANSWER - Is precisely the next day.

PRESIDENT - It was 3 when he intervened.

DEFENCE - AVV. ROCCHI - But she does not remember seeing him.

ANSWER - NO not honestly see, my activity is to go look for fingerprints, then go see if there is a key or 50 cents honestly.

PRESIDENT - Yes, yes we have heard.

DEFENCE - AVV. ROCCHI - then reentered the room after this analysis? Other times in this room?

ANSWER - We remained in the apartment up to 5 days.

QUESTION - And just then did not come back?

ANSWER - After not been back since.

QUESTION - Thank you.

PRESIDENT - Please Lawyer.

DEFENCE - AVV. Ghirga

QUESTION - I make a call to his memory on the day of the November 4, 2007, she was in Perugia said that he did the last operation on the corridor.

ANSWER - Yes, if you want.

QUESTION - If he wants to repeat.

ANSWER - Yes ì s.

QUESTION - Where did it come November 4? At 3 he started 15 of the chamber of the crime, can not remember the 4 I think ...

ANSWER - On November 4, we have documented photographically 25 fragments, highlighted the day before in the bedroom where the body had been found and I can tell you what, at the level of photographic documentation. Let me explain why that is. When unfortunately there is no light, we also need a natural light to make ...

QUESTION - No, I understand very well, maybe I'm not helping.

ANSWER - No, I'm sorry.

QUESTION - I wanted to know from you that transactions made on day 4, the reliefs are not things, that room looked and I thought ...

ANSWER - I'll I'm saying, then we have ...

QUESTION - No, he said.

ANSWER - We have documented 25 fragments of footprints in the

bedroom where the body was found.

QUESTION: - Perfect, day 4.

ANSWER - So we went to run the photographic documentation of the footprints in the room where the corpse was found, initially.

QUESTION: - Perfect, if I speak of the late afternoon of November 4 and wonder: she was in the house on Via della Pergola, is roughly.

ANSWER - Yes

QUESTION - Do you remember if there was the holder of the survey, Dr. Mignini, for example?

ANSWER - I think so, I think so and there was maybe ...

QUESTION - Dr. Mignini was, if there was someone in the Flying Squad in Perugia Section homicides, if recalled.

ANSWER - NO.

QUESTION - Why do we have ...You ERT were also '4 Nov. 4?

ANSWER - In total as a group we had 4 impressions.

QUESTION - Yes, I ask if you were also on November 4 in 4 say?

ANSWER - Yes

QUESTION - "Yes, and if by chance he saw Amanda Knox was present at the apartment?

ANSWER - I think so, I think.

QUESTION - Do you remember if another roommate, who does not care what the name, however, Filomena Romanelli was present?Do you remember?

ANSWER - No, maybe I look with great memories ... A performer as well as Amanda Knox.

QUESTION - an interpreter, so roughly, to question, I close this brief explanation, how many people were in the afternoon.

ANSWER - NO.

QUESTION - In what ... Just you ...

ANSWER - I do not know 6.

QUESTION - "6" and remember Amanda Knox?

ANSWER - If I am correct, yes.

PRESIDENT - There are other questions, please Lawyer.

DEFENCE - AVV. DALLA VEDOVA

QUESTION - Look, returning to one of your relationships, particularly this technical report, fingerprint checks, 33 pages, I do not know how it was repertata from you, in short, in that your report, I wanted some clarification. She said they had made some remarks and listed activities, ie photographing, then you have found fragments useful for comparisons, the fragments that you have found it useful identified and unidentified fragments useful to the state. You remember this? If you need to do to see the document.

ANSWER - No, look I've got this, is not it .. .Again, however, is an activity which I reply, but this is not my business, I would draw attention to fingerprints, if you want me .. .I am convinced because, I mean, I have here before us, if we also want to see them together if I can help.

PRESIDENT - Yes, but being that questions were asked.

ANSWER - But, I repeat, are questions that should be given to those who are more competent than me, I'm not a dattiloscopista, here, this is the speech, if he wants to have these ...

PRESIDENT - Yes, yes we have heard.

ANSWER - But I just wanted to say a thing, mind you, does not mean photographing fragments of imprint.

DEFENCE - AVV. DALLA VEDOVA - Sure.

ANSWER - Okay?

QUESTION - Of course. ?

ANSWER - It is important, at least let's agree on this.

QUESTION - But in fact, for example on page 2 of this document.

ANSWER - Yes

QUESTION - You state: "photographing 108".

ANSWER - That's right but I am not, repeat ...

QUESTION - Of this 108 ... how?

ANSWER - I do not say 10.

PRESIDENT - That is, she did this activity?

ANSWER - I did not, in fact.

DEFENCE - AVV. DALLA VEDOVA - But she still is the director of  
this office?

ANSWER - NO.

QUESTION - Then I may well explain its jurisdiction 'in relation  
...

ANSWER - So we do, we perform investigations ...

QUESTION - Perhaps I missed President, excuse me but ...

PRESIDENT - We are here to ...

ANSWER - We perform tests using non-repeatable reactive specific  
technicians, chemists, to highlight and detect latent  
fingerprints that are otherwise, and I will  
photographically document. This is the activity from a  
chemist I do at the Department of Scientific Police.

QUESTION - Here are the results of its operations, is then  
transmitted to whom and how and with what skills?

ANSWER - It is transmitted to the Office Comparison of the Second  
Division, I am the Third Division of the Department of  
Scientific Police.

QUESTION - Also in Rome?

ANSWER - Also in Rome.

QUESTION - A Tuscolana?

ANSWER - Yes

QUESTION - I understood. Since, however, has been addressed, I  
always just wanted a clarification on page 5, where they  
are listed ...

PROSECUTOR - Dr. COMODI - But it's a relationship that did not write him anyway. That is, we insist on a report that has not prepared him.

DEFENCE - AVV. DALLA VEDOVA - The Public Ministry has analyzed, so I'm in cross-examination ...

PROSECUTOR - Dr. COMODI - NO, I have not analyzed the ...

PRESIDENT - All right, we ask the question and then we feel that the witness can tell.

DEFENCE - AVV. DALLA VEDOVA - The question is this ...

PROSECUTOR - Dr. COMODI - NO, I have analyzed that of Doctor Administration, that this is much more substantial.

PRESIDENT - Yes in fact is the most ...

PROSECUTOR - Dr. COMODI - not one that has drawn Dr. Giunta.

DEFENCE - AW, DALLA VEDOVA - But there was a question on the subject of the Public Ministry on unidentified fragments useful.

PRESIDENT - We hear the question, then maybe if the witness can not answer.

DEFENCE - AVV. DALLA VEDOVA - You said that there were 13, 14 is written in this report?

ANSWER - Because this is prior to award.

QUESTION - And then?

ANSWER - This report is the previous allocation, so much so that the relevant 'B', I mentioned, I actually think it was the piece that was later attributed to Rudy Guede.

PRESIDENT - Yes, so we bought this clarification. Well.

DEFENCE - AVV. DALLA VEDOVA - But the footprints on the pad were more than one, she is sure that the fragment 'B' has been attributed to Guede?

ANSWER - Look, I'm sure you know why? Why were 4 fragments, the 3 and 1 was useful not useful, then.

QUESTION - Yes, but that was the 'B' to help?

ANSWER - It was the 'B' to help, of course. there was the 'B' useful.

QUESTION - So this here .. .

ANSWER - the only useful one was the 'B' since it was first awarded then ascribed, is the only one, alas!

QUESTION - Look, and then .. .On the knives, you have done analysis on knives to search fingerprints?

ANSWER - We've covered everything in the determination of inspection that was present in the house, using the reagents that I was right. Then again, if we took every single object, if there were fingerprints fotografavamo us the impression that the object was present.

QUESTION - So you have seen, in this context, given the manner of the murder, the knives in the house?

ANSWER - Yes

QUESTION - Did you notice any footprints?

ANSWER - No, I do not remember that.

QUESTION - On all the knives, the knives you remember where you found it, what?

ANSWER - Look at us we've covered the entire kitchen. That is not that I went to watch every single knife, then, then - at some point - when we found the footprints we took them one by one, if there was no footprint fotografavamo otherwise.

PRESIDENT - I'm sorry, there were still calls i'Avvocato knives were out on the sink, in this kitchen?

ANSWER - Yes, yes we have them checked.

PRESIDENT - On those leads ...

ANSWER - Yes, yes we have checked, I repeat: we have them both checked and both of those we took pictures.

PRESIDENT - In the drawer maybe there were other knives, behold, if you ...

ANSWER - We, of course we tried to see everything that was

possible to see if there are no footprints in this report and tell her about knives for me ...

PRESIDENT - You have discovered footprints. Please, go on then.

DEFENCE - AVV. DALLA VEDOVA - feel, but when she says: "we have them inspected and nothing found" did the same activities it has conducted on the doors of the cabinet with the chemical effect of which said first or ...

ANSWER - So in ...

QUESTION - ... or made a different business?

ANSWER - Yes, I'm trying to say, so the activity is different in that we used powders esaltatrici in the kitchenette in the room and the kitchen. Again, we had permission of Dr. Mignini, to make technical assessments using reactive on only three rooms are the bathroom, the room and the room where the victim was present in the rock. Therefore, we used the chemical reagents to obtain fingerprints. In other cases, in all .. . All the rest, in the remaining rooms of the house we used powders esaltatrici.

PRESIDENT - Did you use please?

ANSWER - Powder esaltatrici. That is hygroscopic powders, dusts ade ... That gives the opportunity to show finger marks in a direct, very simplistically using brushes. Those ... analysis of those systems now established classics that are used in normal surveys.

DEFENCE - AVV. DALLA VEDOVA - Listen, always on the knife, she remembers when there were more than the kitchen knives in the other rooms in the house?

ANSWER - No.

QUESTION - You've never seen?

ANSWER - No, I do not remember.

QUESTION - You do not remember.

ANSWER - I do not remember.

QUESTION - If I say that there were knives in Knox's room in a suitcase, she does not remember?

ANSWER - NO.

QUESTION - Look instead for what concerns the work done in Rome, in part because I've also attended, so I got to see your professionalism, your skills and your laboratories, only if you can remember the exact protocols and procedures for storage and transmission of various findings, by those who take them to the office of its jurisdiction, or otherwise Tuscolana, in various departments, because ...

ANSWER - The findings we have captured us and we photographed them too. We've even photographed front and back, I seem to have made them see, if you want to see you even now.

QUESTION - Here, the transmission of the finds from Perugia to Rome ...

ANSWER - We acquire these findings by placing them in bags of security, which we carry with us. We have a certain supplied by latex gloves, disposable coveralls, tweezers, brushes, dust esaltatrici of various colors, in short, we have a set in a briefcase, just to be clear, we call the case of inspections a little 'different from, say , which is generally used in the normal visits because it is targeted to also use, for example, fluorescent powders, just to be clear. And, among other things, we also have a range of safety equipment bags, where we write what we put in and what comes out of security envelopes all the findings that we believe ...

QUESTION - These envelopes ...

ANSWER - ... suitable for laboratory investigations.

QUESTION - These envelopes are then sent as?

ANSWER - We've brought us.

QUESTION - Yes, but how? Inside the boxes? A box? A suitcase?

ANSWER - Inside ... The security envelopes are sealed inside the scatoli inside. of the briefcases inspections and then we bring them directly in the laboratory.

QUESTION - "In the lab" when they arrive in the lab come with these boxes?

ANSWER - They come with these boxes.

QUESTION - Can you explain how is the box? It is a box or briefcase?

ANSWER - That depends, depends on the size, the volumes that we have.

QUESTION - President confirms wondering why ...

ANSWER - Please?

QUESTION - I have been there, so actually I'm doing a question that I know the answer, but I wanted it to be brought to the attention of the Court, this information is relevant in part on discourse.

PRESIDENT - I pray. So, then in such containers have been put these envelopes.

ANSWER - If containers are containers of small volume, small weight, small size put them inside the case and if they are objects of higher dimensions we put them in a cardboard box, some thing for them then lead, in short, that's all.

DEFENCE - AVV. DALLA VEDOVA - But she remembers having received the boxes of at least 1 foot / 1 meter cardboard boxes with a set of objects inside, to be examined? Finds that they were all placed in cardboard boxes?

ANSWER - But were our, sorry Lawyer? Our fingerprint?

QUESTION - They were in boxes that were on your office Tuscolana, remember him?

ANSWER - I mean those of which ...

PROSECUTOR - Dr. COMODI - These are all on Tuscolana.

ANSWER - ... We're talking about now?

DEFENCE - AVV. DALLA VEDOVA - yes.

ANSWER - Those who are here?

QUESTION - I do not know if they were, was a series of .. .He recalls, for example, the examination of the guitar or gray sweatshirt, the stripes?

ANSWER - No.

QUESTION - You do not remember. Do you remember how these two elements were preserved, these two findings?

ANSWER - I'm sorry, I do not treat clothing to show finger marks so I do not know.

PRESIDENT - objects that are not within its assessment activities.

ANSWER - I do not remember this.

DEFENCE - AVV. DALLA VEDOVA - Yes, but you are responsible for compliance with the protocols and procedures for the conservation of the features repertazione?

ANSWER - That depends on what elements and keeps them, though she speaks of the elements of artifacts and objects that I need for my business I can say I have a room we use as a warehouse for the findings before treatments, a room we use as a warehouse after the treatments, just to diversify the activities of analysis.

PRESIDENT - Okay, if there are other questions on another topic.

DEFENCE - AVV. BY WIDOW - For example, in reference to the artifact 103, which is a glass found on the washbasin in the kitchen, where there is an imprint of Knox.

ANSWER - Yes

QUESTION - Do you remember this finding?

ANSWER - Yes

QUESTION - Do you remember how it was analyzed ...

PRESIDENT - Treaty?

DEFENCE - AVV. DALLA VEDOVA -. .. That day, at the ITS office?The mode?

PROSECUTOR - Dr. COMODI - It has not examined him, said until now that he is not analyzes.

PRESIDENT - I'm sorry, sorry.This glass if she remembers him?

ANSWER - Yes I remember it.

PRESIDENT - You work it has done the same?

ANSWER - The search for fingerprints.

PRESIDENT - He then fingerprinted and then the finding has wrapped, as he said, and forwarded it?

ANSWER - But it seems strange that I had packed, I ...

PRESIDENT - And what did he do?Say it.

ANSWER - No, because it is a finding that no envelopes, I mean.

PRESIDENT - And then what did?

ANSWER - If anything we put in a box, in a rigid container to avoid ...

PRESIDENT - I'm sorry, this glass of that activity?

ANSWER - So we on this glass, if I remember correctly, we have highlighted the footprints, right?Correct if I'm wrong, because ...

DEFENCE - AVV. DALLA VEDOVA - Yes, I was there.

ANSWER - This is, in fact.

QUESTION - But the question I do it to him. She confirms that the glass we have examined that same day, was contained in that thing in an envelope or box?If you remember.

ANSWER - I remember a box, maybe I'm wrong, I do not know.

QUESTION - Do you remember that day when other findings were examined in the same room?

ANSWER - I do not remember, look.

QUESTION - You do not remember.

ANSWER - If it helps me maybe ...

PRESIDENT - Okay.

DEFENCE - AVV. DALLA VEDOVA - You mean that in the same room, same day can be examined more specimens? INTERVENTION - Outside microphone.

DEFENCE - AVV. DALLA VEDOVA - NO.

PROSECUTOR - Dr. COMODI - But President ...

PRESIDENT - I'm sorry, sorry ... Interventions overlap between the parties.

PRESIDENT - Excuse me, please, if maybe we can clarify the question. When she says: "in the same room," ie in the laboratory or ...

DEFENCE - AVV. DALLA VEDOVA - Watch President, maybe I'm missing a passage. When the findings were sent to Rome, were initially viewed and, therefore, there was an opening ...

ANSWER - Excuse me, can I ask you ... Lawyer

QUESTION - I pray.

ANSWER - But what remains is talking about the pillow?

QUESTION - I am speaking for example of glass.

ANSWER - The glass is fine, so right now I sowiene, still okay.

QUESTION - He arrived in Rome into a container.

ANSWER - That's right.

QUESTION - I first lab ...

ANSWER - I'm sorry it was a hard case? It was a little box?

QUESTION - You do not remember?

ANSWER - I watch for me is a little box, because we do not bring in'altra manner.

QUESTION - President I want to point out the procedure, so I'm trying to explain.

PRESIDENT - I pray.

DEFENCE - AVV. DALLA VEDOVA - You first examination in the lab, do a visual inspection and photography?

ANSWER - Yes it's true.

QUESTION - The visual examination and photography is where? In which room?

ANSWER - In the room to the right when you enter in my lab, where you run the photographic documentation.

QUESTION - And this room is different from the laboratory?

ANSWER - Yes, it is different from the laboratory.

QUESTION - Here. The question, then returning to the first, in the same room when you viewed and photographed elements may simultaneously on the table, because I remember there was a table, there were more factors to consider?

ANSWER - I'm sorry, closed and sealed, or put items in bulk? I have not figured this out.

QUESTION - Both possibilities.

ANSWER - so I closed and sealed, placed in bulk, no, I do not think.

QUESTION - Do not believe or ...

ANSWER - No, I say no.

QUESTION - All right. Listen, then later visual examination and photography, then following your assessments are then carried out surveys in the laboratory?

ANSWER - The laboratory findings that are, in fact, technical assessments with specific reagents.

QUESTION - For instance, always returning to the example of the glass, since ... She remembers what it was then found on the glass? And if it was felt necessary to do the examination in the laboratory?

ANSWER - Look, we first do any activity, repeat it before the technical investigation, forensic use of lights needed to ascertain if there are traces in clear. Thus, traces, we're talking about fingerprints papillary. If the outcome is positive the photograph, if the outcome is negative and chemically treat directly. This is what ...

QUESTION - The treated?

ANSWER - Chemically, using specific reagents.

QUESTION - And what exactly does that mean?

ANSWER - It means I take the object, place it, give it to a person, an expert, a technician who takes it, puts him in a room baric or another system to search for the footprints and fingerprints are processed to highlight, If you are photographically documenting the footprints.

QUESTION - I understood. Baric chamber she means the lab?

ANSWER - No, I mean a tool that baric chamber nebulization in high vacuum condition, or a vacuum in general, my foreign, there is an acrylic, and once done, the assessment gives me the opportunity to highlight and document, after highlighting fingerprints.

QUESTION - Look one last clarification and I have done, because it's always been dealt with by the Public Ministry, I realize that this is not a document of her ... But the prosecutor had asked a question, these unidentified fragments, and I mean people would not ...

ANSWER - Unidentified not attributes.

QUESTION - Lei.. .

ANSWER - The problem is that.

QUESTION - The technical term is not identified but I mean ...

ANSWER - No significant technical unallocated, Lawyer, excuse me.

QUESTION - Do not attributed.

ANSWER - Because they are relevant and not identified is not allocated.

QUESTION - So just for clarification, when she says: "unallocated" not allocated to the people who have been identified?

ANSWER - Well, of course.

QUESTION - And so in this case, I think you have done

investigations Kercher, Sollecito and Knox, Mezzetti, Romanelli, Silence, (inc.)Lumumba and Guede?

ANSWER - Mh, mh.

QUESTION - So when I read: "unallocated" is not attributed to any of these people?

ANSWER - Not only that, very often dattiloscopisti send these, these reliefs as you call them, these footprints Afis systems and, therefore, could then be attributed to others, I mean.

QUESTION - "Others".

ANSWER - But in this case, I think ...

QUESTION - In particular, she recalls how many of these fragments, of 14, were not allocated in the room of the victim?

ANSWER - You said 14, 13, is not attributed, is what I seemed to understand, because one then has been attributed to Guede, right?

PRESIDENT - Yes So these 13 ...

DEFENCE - AVV. DALLA VEDOVA - Okay.

ANSWER - Yes, tell me.

QUESTION - Do you remember how many of these were related to the victim's room?

ANSWER - I Look at them one by one, if you want the ...

QUESTION - I ask him a check: the relief 14, which is a palm and desk top.I assume, the victim's room?

ANSWER - You look at me the relief 14 is to the desktop, yes, yes highlighted, right, well so what?

QUESTION - Then, when he says: "scrivaniau floor desk in the room of the victim?

ANSWER - No, I do not think so.No of room Mezzetti.

QUESTION - Where is?Excuse me, because .. . I do this precisely the question because one of the desk top is not identified.As I

understand it is not specified.

ANSWER - Here, on November 2 we found two fragments marked with number 14 and 15 on the desk against the wall right of the room. We are talking of 2 November and we are talking about the room Mezzetti.

QUESTION - I understood perfectly well, thank you, because it was a clarification. No further questions for now, thanks.

PRESIDENT - If there are further questions?

PROSECUTOR - Dr. COMODI - No president of any other question, a question that is not even a question that is Francaviglia that followed has made, has worked with her, in essence, identical transactions in the same, right?

ANSWER - Yes

PROSECUTOR - Dr. COMODI - You were together, right?

ANSWER - Yes

PROSECUTOR - Dr. COMODI - then we do come just to give meaning to his day. But anyway thank you doctor.

### COURT

PRESIDENT - Excuse Maybe it is told, but just to point out: in this room, I seem to recall that she said were found 108 footprints?

ANSWER - No, 108 surveys.

PRESIDENT - 56 and 52 useful not useful?

ANSWER - Well, when you talk about surveys, President, photographing, means that in one survey may be there at 2 or 3 pieces of fingerprints. So not only 1.

PRESIDENT - ECCO, in ...

ANSWER - I mean if I do so, but I run fingerprints photographer 3 1 acquisition.

PRESIDENT - Well, then he also gave a quantitative indication of

these findings in the attribution of known persons.

ANSWER - Yes

PRESIDENT - Perhaps if I may point out, 17 I think I have noticed in Meredith.

ANSWER - Yes

PRESIDENT - And then on ...

ANSWER - So 17 fragments, but then again, President, is an activity which I did, I mean ...

PRESIDENT - ECCO, sorry.

ANSWER - I repeat it to him.

PRESIDENT - Just to point out.

ANSWER - 17 fragments attributed to Meredith Kercher, Raffaele Sollecito attributed to 5 fragments, 1 fragment attributed to Amanda Knox, 15 fragments attributed to Laura Mezzetti, 5 fragments Filomena Romanelli, 4 fragments Silence James.

PRESIDENT - Well, then I think he also said that there were 2 fragments on the pillow ...

ANSWER - Well on the pillow ...

PRESIDENT - ... shoe?

ANSWER - Yes

PRESIDENT - Well, a larger and a smaller one.

ANSWER - I remember well. But I also documented in the report.

PRESIDENT - Yes, but the shoes were different, in fact. a larger and a smaller right?

ANSWER - That I remember, yes, but then again it is an activity that anyway ...

PRESIDENT - What you did not though.

ANSWER - I do not.

PRESIDENT - Well.

PROSECUTOR - Dr. COMODI - Dr. Giunta, sorry, but Francaviglia instead acted in the survey of 18, you know?

ANSWER - Who? Yes, yes Francaviglia.

PROSECUTOR - Dr. COMODI - I CAN .. even if President .

PRESIDENT - Yes.

PROSECUTOR - Dr. COMODI - And what, what kind of activities carried out, others have done .. . did other fingerprint?

ANSWER - As for the fingerprints or highlighting fingerprints I do not think so, but I think they both went, even to see, whether there were any activities to do, in fact it was longer control what was done in its time, but I repeat.

PROSECUTOR - Dr. COMODI - Thanks.

PRESIDENT - There are no other questions, just a curiosity, since she is also an expert and may also give an assessment on this activity, why has this expertise. The circumstance in which a house, still lived in an apartment of Amanda Knox and attributable to the same fragments are very few, only 1, behold, it is possible to give some explanation? Some interpretation?

ANSWER - Look, see President, when we go to perform these investigations, cerchiarno, I mean we found over 110/112 marks. Note that is a remarkable amount, this amount, among other things, is an amount much greater if you think so many impressions, were not documented as having viewed the dattioscopista did not think either should fit the picture, however, because both were ...

PRESIDENT - It was a matter to be included in this situation.

ANSWER - So to clarify, there also exist many other prints but maybe they are so ill-formed, so strusciate, or even partial overlapping so that we can not even ... Here, finding a mark does not mean there's only one impression, maybe there will be other 5 or 6, other 10 but still we have not considered. That was nevertheless given therefore among the many that was one of those that has been used

and given because it was useful.

PRESIDENT - In this activity enhancement of fingerprints is also possible to identify an activity of deletion of fingerprints?

ANSWER - When we see the footprints, for example, has a deposition of an object, but then I do in this manner, that I move my finger already exerting this action I miss my mark, in part or completely, so if the ' imprint is present and it is very clear then we collect, and then maybe we also helpful and then attaches, or is actually a mark that has not much meaning.

PRESIDENT - Okay. There are other questions, is dismissed. We give the last heads.

INTERVENTION - President of the Court has any relation?

PRESIDENT - Yes, this has the report.

ANSWER - If I want to leave here.

PRESIDENT - But, still, we have at least the relationship with all the pictures, the more body.

INTERVENTION - off microphone.

PRESIDENT - With attachments fingerprint is. Please cango.

**DESPOSITION OF THE WITNESS - FRANCAVIGLA ANTONIO -**

THE WITNESS, a warning under ART. 497 CODE OF CRIMINAL PROCEDURE, THE LAW OF RITUAL FORMULA.

GENERAL ': Antonino Francaviglia, Technical expert in service at the Service of Scientific Police in Rome, papillary Latent Fingerprint Section Highlighting. Born in Palermo on July 28 '64.

PRESIDENT - I pray, the Public Ministry.

**PROSECUTOR - Dr. COMODI**

QUESTION - So considering that Dr. Giunta has already described the operations that you did, but if she summarizes them there and especially if we could, quickly, and describe how such footprints were found in various rooms, with particular emphasis, with particular reference obviously, the scene of the crime, the hall, the room of Romanelli.

ANSWER - So ...

QUESTION - And the bathrooms.

ANSWER - Yes, 2 to 5 November, I am, I went several times into the apartment on Via della Pergola number ...

QUESTION - You come along with Dr Giunta?

ANSWER - Yes

QUESTION - Well, times, days are identical.

ANSWER - They correspond, in conjunction with the Board and Dr. Pearl and to the Assistant to the Assistant Manors of Scientific Police Service, who oversaw the home Manieri the photo, and Pearl was an aid and supervised the fingerprint part, that we ... Examined the fragments of papillary footprint and practically gave us judgment if they were deserving or not, and photographic documentation, so that, in fact, the amount of work to do, then at the service. So, we went several times in the apartment and we made the findings required in the manner described by Dr. Giunta and documented in the technical report, with the instruments. So, we have, especially since, after repertazione biological, curated by Dr. Stefanoni, we entered the room of the victim, and we, in the case of the victim's room, the room in the bathroom and the fact that treatment of esters with cyanoacrylics, which are details of the findings, they highlight

a significant number of impressions, while the remaining part of the apartment the investigations were performed with sprinklers, silver with black powder.

QUESTION - sprinkling of dust?

ANSWER - Silver black, silver sprinkling of black powder is a type of magnetic powder that is used with a magnetic brush that allows us to use larger quantities of dust and to protect our health, because less dust (inc.). Scan, we hope so, at least, to be able to continue working for several years. And then, once we have requirements, indeed, healthiness. The investigations lasted this many days because there were demands, in fact, job security, than just to protect our thing, and there was a need, however, occasionally stopping to be able to view, according to lighting conditions, the footprints. So even in the numbering of fingerprints sometimes there is a continuity because according to the lighting of the day, maybe, sometimes because of fatigue, for conditions of light could not just physically but also to see that we have portable systems allow to fully illuminate the scene of the crime, sometimes we really have difficulty, and then maybe some time we had a need to return, at some point so maybe something that seemed at first was worth, to document the 'then we have documented. So, we have highlighted a series of footprints. We have documented photographically and prints are enclosed in the report of which is ... With regard to total in the apartment were highlighted a series of impressions and has been, in the relationship we had, practically, of the footprints in the room, we have shown that of Mezzetti 22 fingerprints. The chamber Mezzetti was the one who was behind the living room, I mean, what was with the drawer open, where we

acted immediately on the first day, because there were no special needs, pending the intervention of my colleague, we started with the black silver powder was told that because there was virtually set aside our attention, in particular, in the victim's room, the room where the stone was in the bathroom and the front room of the victim. Then we have, practically, highlighted other (inc.) in the bathroom where fingerprints were found in the faeces and, later, we found 46 and then 46 ... We recorded 46 tracks on day 3 in the room of the victim and then later, on day 4, still in the victim's room, we found 25 other marks, why? Because we had the need, after the first day, because we saw that the room we reserved the victim's special attention, we also had the need to disassemble the cabinet doors, because we saw that there were fingerprints on the inside, which was difficult to document photographically, so we removed from home and we spoke. The investigation took place in several stages. Us every time, virtually, acquire, and then if the result is the case virtually removing an object, we provide dissect it, because there are always those needs first to acquire the result, once we are sure we keep what we got. In that case, practically, we have dismantled ...

PRESIDENT - The more loudly.

ANSWER - And so we, we continued. We then We then went into Amanda's room, where we showed 9 fragments of papillary impressions and then we went into the kitchen and finally we have, in the end ... Then later after the repertoire ... printed material that he was worthy to wear in the laboratory was found in it and was later brought to the laboratory where we made a treatment of these findings with laboratory techniques. And even there we have

highlighted the footprints so overall between the apartment, the paper finds that mobile phones and we were repertati highlighted a total of 122 fragments of papillary impressions.

QUESTION - What phones?

ANSWER - There had been delivered later in the laboratory two mobile phones in particular a mobile phone brand Sony Ericsson and Motorola that were so, repertati in the garden of a neighbor, and say these guys after the findings from other laboratories were delivered to us where there's been asked to do more specific laboratory investigations, in order to highlight fingerprints useful for the investigation and, of these guys, we showed 3 fragments of papillary impressions, on the phones.

QUESTION - "3 pieces", 3 fragments of both?

ANSWER - Yes

QUESTION - That is a total say.

ANSWER - A total of 3 fragments. And no, 3 fragments were detected on the papillary impressions branded Motorola phone, 1 marked with the number 120 on the front, upper left, 1 marked with the number 121 on the rear cover of the battery cover and 1, with number 122, inside the cell, in fact, for as I said before then, once we treat the outside of an object we also go to work inside, had 3 small pieces, say, normally, not normally .. Maybe they were not even worthy of photographic documentation, however, in order to provide any relevant information for the purposes of a trial justice also working on these minutiae just to try to have more and more items. Now, these fragments, then they were with the report, the report transmitted by beginning immediately, photographs brevimano hand hand evidenziavamo fingerprints dattiloscopisti we spent our

colleagues, who have the opportunity to examine more closely, these fragments and fully to incorporate them into our system that allows Afis, practically, to do a search for the station and, of course, eventually traced to people who have been reported for previous offenses. They have done precisely the match, made the identification of these fragments, are precisely determined which of these are useful for comparing fingerprinting and some people have attributed to these fragments.

REQUEST - Grant did not you?

ANSWER - Grant that I did on which absolutely do not like ...

QUESTION - All right. Look, aside from the paperwork that she said to have found in it, say, and taken to the laboratory for necessary investigations.

ANSWER - Yes.

QUESTION - We have examined other objects removed? That is so small objects, on which were enhanced fingerprint?

ANSWER - So there, inside the apartment in these cases, when we treat the dust, we treat all objects with dust and with cyano-acrylic esters, we treat all objects within the apartment because the apartment is being considered, then all objects contained within. The moment we go to deal with cyanoacrylate, because it is done? This technique is preferred because it allows us to acquire as much data as possible. Then, once we intervene, this side being a technique is more selective, allows to highlight a greater number of fingerprints.

QUESTION - I HAVE understood.

ANSWER - What happens with the cyanoacrylate in contrast with the dust? That pretty much mistake that happens sometimes, the footprint is a soft surface, so when ... the first approach, the first approach by the operator with a brush

and dust is essential because it allows you to consolidate these ridges, and then hardens into practice in a first approach, we risk losing many details, many minutiae that's important, then privileged because it is the technique of cyanoacrylate? Because there allow to harden these ridges. So, in this case, even if the operator commits an unintentional error on display, that maybe he accidentally falls more dust on the fragment is an error that is almost canceled because then maybe in the next step is to remove the brush that excess dust, is to define good design. The design of the footprint, ie throughout. .. Ie, is a series of curves, interruptions of lines, of the minutiae that identify the particular person, then, it is important practically the first approach. So, why was the investigation only of the privileged few rooms so we had to get the most results. Then later we have, we intervened, we continued with the dust because it was more important to acquire as much data as possible, precisely, to provide greater support investigative activities. This one is done and ...

QUESTION - I said, remember if you were shown useful fingerprints on items other than cards?

ANSWER - Yeah, have been highlighted, in fact, of impressions ... that list ... list of objects that are highlighted the footprints there are only so to speak immovable objects such as cabinets, furniture, things but there are also items that were placed there, perhaps, for example, we have highlighted the footprints, going in part of Annex photography so I'm going to see even better. We have shown, then the pillow we have highlighted the famous footprints 4, marked with the letter A ', ' B ', ' C 'and' 'D' whose mark 'B' was then attributed to Guede, who is Another

object of criminal proceedings. Then there are virtually, so

...

QUESTION - In the kitchen?

ANSWER - In the kitchen, here we go, in particular, in the kitchen was one of the last rooms. Then, we have highlighted in the kitchen, then an impression with the number 99, who is on TV, on the left of the post pretty much the TV screen. Then there is an imprint marked with the number 94, which is on the switch of the light, near the entrance door of the apartment, then the stamp 95 and 96, which was practically on a container for DVDs which was on the shelf; then there is an impression, almost 3 fragments of imprint marked with the numbers 102, 103 and 104 on a glass found on the kitchen sink, just because I said before, this one here, the finding is not only about the objects, say is of all objects. All the objects have been subjected to treatments without exclusion, in order to acquire the largest number of data.

QUESTION - But my question was intended to say this later, so immovable objects not removable, so the furniture in the proper sense, even in the legal sense.

ANSWER - Yes

QUESTION - Well, not even in the legal sense, say small objects.

ANSWER - Yes

QUESTION - As the glass, as said before - I do not remember - the pillow, etc., of these objects and the exaltation of the footprints you have made with that technique you described

...

ANSWER - Yes, in this case we have treated ...

QUESTION - ... where things were.

ANSWER - Yes, yes we got on the subject.

QUESTION - Then, once verified, through that process, that there

were footprints that could be useful.

ANSWER - Yes

REQUEST - Take the case of the glass, the Federal or any other object, the repertati you and you have brought to the lab or you left there?

ANSWER - Well, the pillow has been ...

QUESTION - Photographed here, left ...

ANSWER - The cushion was repertata and flow in the laboratory because the tramatu ... we tried to record it there and then the pillowcase, but we saw that there were difficulties of documentation, there were lighting problems and, therefore, the risu ...

QUESTION - The documentation that is?

ANSWER - The photographic documentation, we stood on one side and right there in the room, we tried to photograph these prints that were on the pillow. We, the operator has shown that, in those lighting conditions, had difficulty getting a clear image, and then told us, says: "I have to bring in the lab and I have pictures below (reprovit)" then in that case we reperted.

QUESTION - I understood.

ANSWER - As for the glass, the operator has properly documented the mark, there was no difficulty, the three tracks, there was no need for repertare the object, we interested in the track, the track was clear could work, simply, the object was placed where it was, because there was that need. Also because there's a problem of management of the exhibit.

QUESTION - Of course.

ANSWER - I owe it to acquire the find, and then I return, pretty much the find, in that case, it was there inside the apartment. I did not need anything but ... I used the 'fingerprint is not the finding.

QUESTION - All right. She has also participated in the survey of 18?

ANSWER - Yes, I for an inspection of 18, but since I knew that ...

QUESTION - Of December 18.

ANSWER - The December 18, I came in, in fact, twice in that apartment, that is, 2-5 several times, and then the 18. On 18 I knew that there ... I have been involved in this next site visit and are only entered the apartment, there is a report which was made in which, I have signed, in which he reported my entrance, and was limited to only a visual inspection if anything as there was an opportunity returning said: "If you ever do come there is something more to do." I came, I viewed the crime scene there was nothing else to do and I did. Leave it. Upon this occasion, but I did not even need my input on 18, because there was this thing I got, again, with all due caution, always wearing overalls, gloves and, in fact, to try to at least not to take anything or take anything from inside and outside, in times of tracks, we're talking about, because each input is normal that the operator has a (inc.), there are movements and then somehow can, This is part human.

QUESTION - inadvertently of course, was present when it was found in it the piece of fabric with bra hooks, or had already left?

ANSWER - No, no, because at that .. . I did not go into the room of the victim, because there, in fact, had been made only am I back there in the room of stone, well, just wanted to check some things just a moment, there in that room did not get into because when I was there, it was pretty crowded by other operators who were doing an examination, in fact, had returned, repositioned the closet doors, in

their original location and were making an examination, in fact, these spots, so there was a need of mine. There had been acquired with all relevant information, because I had worked on plenty of both me and the other players and then there was the technical requirement. It had already been ... That is, I repeat, was not needed was an opportunity to return and that's fine, because, as we had, lasted several days precisely because we wanted to make sure you get at most, all that was possible.

QUESTION - Look, on the sill of the window, back to the previous survey.

ANSWER - Yes

QUESTION - On the windowsill of Romanelli.

ANSWER - Yes

QUESTION - And on the envelope containing the stone.

ANSWER - Yes

QUESTION - were highlighted fingerprint?

ANSWER - So the envelope containing the stone was repertata and flow in the laboratory, and I do not remember now, I see a heartbeat if I showed fingerprints. There, on the windowsill, I'm going to see, a moment, on the report.

PRESIDENT - I'm sorry, the relationship is of course entitled to see what it is, that filed June 9, 2008?

ANSWER - That dated, because I do not know when ... It has been

PRESIDENT - Yes.

ANSWER - I Dated January 31, 2008.

PRESIDENT - The time where it is?

ANSWER - The date is on page 12. It is signed by me and Dr. Giunta Agatino.

PRESIDENT - To ensure that ... January 31, 2008, page 12 yes, we've already acts, then, please.

ANSWER - Then we go into this room, we see a little 'way ...

PROSECUTOR - Dr. COMODI - Actually I have not checked if it was ...

ANSWER - How?

QUESTION - It is a question we say in the dark, in the sense that I did not check first if you have found, that does not know the answer, in short.

ANSWER - Yes, okay.Okay. Then there we showed practically the footprint 971, 98) on the outer side of the door of the room; 99) on the inner side of the door of the chamber; 100) the imprint marked with the number 100) highlighted on the outside of the door to the window.Then there was an impression with the number 101) on a mobile, on the wing upper left of the cabinet, which was near the window, so they were one, two, three, four, five surveys.For when we are sometimes more important impressions, always precisely in the case of 98) we have 3 pads.

PRESIDENT - But Excuse the PM had asked ... INTERVENTION - Outside microphone.

ANSWER - not on the window ledge.

PROSECUTOR - Dr. COMODI - On the ledge not.

ANSWER - No, but it is an area with marble sill.

PRESIDENT - But on the envelope, the envelope near the rock and the rock ...

ANSWER - Yes, the envelope was repertoire ...

PROSECUTOR - d'r. Ssa COMODI - The stone sill, as I think it fails to catch on the mark.

ANSWER - Yes, no, but that is a marble is an area ...

PRESIDENT - So it is not possible.

ANSWER - NO.

PRESIDENT - AND on the envelope asking?

PROSECUTOR - Dr. COMODI - The envelope containing the stone, said

he repertata though.

ANSWER - Sislei The envelope, containing the stone, should be Sislei the envelope, containing ... Let 's see, what I have to check on whether the envelope was Sislei, these things are here then ... So let's see '.

QUESTION - The plastic bag was then or was ...

ANSWER - Yes, it was an envelope containing Sislei the rock, on this envelope was brought to the laboratory and as I know, let's see ', then on these items here ... So on paper objects to the laboratory have revealed fingerprints on a notebook, ring striped with blue cover called College. We have highlighted the footprints ranging from number 105 to number 116. Then we showed a mark to number 118 on another pad. An impression of a 119 ... a registration request to the town of Perugia. Leave it. So the envelope has not been highlighted footprints. INTERVENTION - Outside microphone.

ANSWER - So when an impression, when one says ... INTERVENTION - Outside microphone.

ANSWER - Yes, when we say no .. We can not say that there is an impression, an object that is touched usually say ... We can not say that was touched. We can say that have not been highlighted traces useful for making an inquiry fingerprint, that an object is normal, maybe an object to be present impronti on an object, the object, the finger must have a certain percentage of moisture precisely because the sweat the finger must move the object. In practice the finger acts as a stamp. Think of a stamp though ... a stamp which practically does not wet the pad, if the stamp touches, is placed on the card never leaves the drawing, and then what we do physically, the first step, are stamped on a pad and then timbriamo the object. The same thing happens with the footprints. The

finger should be wet. So many times when we touch a object what happens? That the finger, maybe, we covered three items in sequence, we highlight the first impression but the third does not, because the time frame not allowed to taste, in fact, to secrete the amount of sweat from leaving the object.

PROSECUTOR - Dr. COMODI - For me no more questions President.

INTERVENTION - There are questions

PRESIDENT - There are no questions. Please, go on then. The witness is common to Amanda Knox defense, as I recall, there are questions. Yes, please Lawyer.

**DEFENCE - AVV. DALLA VEDOVA**

QUESTION - Listen, you said to have made an exaltation of the footprints.

ANSWER - I do not understand, can store it better to ask, I did not understand.

QUESTION - You made the activity and excitement of the latent prints were taken, his attention to some objects. I wanted to know ...

ANSWER - Not some items, I came inside the apartment and I have done that activity that was required, so there is that some objects, all objects within dell'appartamento were examined.

QUESTION - Then I ask: have you looked at the knives that were in the house on Via Pergola?

ANSWER - The knives that were ...

QUESTION - The knives that were in the house on Via Pergola she examined them for the purposes of assessing whether there were latent prints?

ANSWER - The knives were there, inside the kitchen, were kept

inside the drawers and were examined. Were examined with the powders but the knives, however, had a surface that ... say no ... were ... was made with a sprinkling of dust there were footprints, enough.

QUESTION - Do you remember how many knives you examined?

ANSWER - Why do I need to count them? For me it is an object, because to me an object is, say, worthy of my attention at the time when there is a trace, if they were ...

PRESIDENT - I'm sorry, but I ask: why a knife is usually used, at least in the handle.

ANSWER - Excuse me ... is

PRESIDENT - There were no fingerprints? That is a knife ... That is ...

ANSWER - Then go back, I'm going to document a track that is useful to me for something, if there is ... if there is a pattern that is partial, that is undefined, it is meaningless to me is not, say, worthy of attention. It is worthy of attention at the time of this object, if there are these items that I deal up here, if I document an imprint on this subject, this one is worthy of my attention, so I photographer, I describe it. why? Why is it important then later maybe try to know as much data as possible on this imprint. But if there is one, some papillary crest line for me is not worthy of attention.

PRESIDENT - "If there" excuse me, some?

ANSWER - Some line, a boundary mark, some line, a mark that still does not touch me for the survey is useful fingerprint do not need.

PRESIDENT - So on these knife handles what he found?

ANSWER - (inc.) traces were worthy of my attention and I moved on. It's normal.

PRESIDENT - I mean there were traces worthy in what sense? That?

ANSWER - That there was no photographic evidence of activities to be performed. That's it.

PRESIDENT - As there were no traces, in short?

ANSWER - Because there were no traces, and these traces were so small, so small that no ...

PRESIDENT - And how can you explain this, it is a knife that is .. . because it is washed and then carries away the water ... Because obviously a knife in the least handle is used, here is a person who was killed with stab marks, then the knives could somehow detect them.

ANSWER - So there, now and then washes, I hope so, she sometimes almost washed the knives when they use them, fine.

PRESIDENT - And wash the knives things go away?

ANSWER - So what happens after she has washed them many times, because maybe it does, to make the first instead of putting them in school, maybe take a cloth and wipes it directly, instead of leaving them on the kitchen puts them directly in the drawer. Then if that knife was, yes, she has handled, however, takes the cloth, the dry and puts it there in the drawer.

PRESIDENT - Well, the mark will go away and why it is necessary that in addition to e'ssere steps we washed the cloth, or even just water to carry off the mark?

ANSWER - So why the imprint remains?

PRESIDENT - Yes.

ANSWER - Why the imprint remains on the object must first bring the imprint, the imprint on the object to bring the finger must be wet and then, then, in this case the imprint will end up on the surface of the object. Okay. If your finger is wet, if the finger is dry, the stamp is not going to end, but there she touched the mark because the mark - I repeat - the footprint is what remains, is virtually trace of

sweat that is shaped by the papillary ridge. So if there is exudate on this finger, because it is dry, because maybe ... So in this case there is not, or perhaps there might be a problem of washing, or a problem that in this case, even when the object that is handled, in this case, there is a twist then in this case, highlight a spot, if I have a stain that has the center of the figure confusing, undefined in this case I did not document the stain, because it is a waste of time for me as an operator. I have documented the stain and then have a judgment by the dattiloscopista that I gave it a good track for his work. So, we do three jobs.

PRESIDENT - I understand.

ANSWER - First description ...

PRESIDENT - All right, please Lawyer.

DEFENCE - AVV. DALLA VEDOVA - Listen, always on the objects that you have examined, I guess, I ask: have you checked the books that were in the room of Amanda?

ANSWER - Yes

PRESIDENT - I'm sorry lawyer who is the question?

ANSWER - We checked out the books.

DEFENCE - AVV. DALLA VEDOVA - If you have checked the books that were in the room of Amanda?

ANSWER - Yes, we checked the books, we have also reperatati some books. Included on the list, which I think she has a copy.

QUESTION - And then there are the objects of these latent prints?

ANSWER - So these items were treated in the laboratory and, again, of these objects have not been highlighted ...

PRESIDENT - The more loudly.

ANSWER - These items were taken to the laboratory, okay, fine. We have them subjected to an investigation, the techniques that we use normally in the laboratory and have not been

highlighted tracks to be documented photographically. Perhaps these findings we are now considering maybe, she can see that there are partial prints. But in this case if the design is undefined, if you do not need further investigation we stop them.

QUESTION - I understood.

ANSWER - If I touched a mark of a hand, a fragment of baby footprint that is devoid of the central figure, her ... And remember that it takes to identify 16/17 feature points.

QUESTION - Of course.

ANSWER - Well, if I did not, and with my experience I see that I have a fragment that still has these 16/17 feature points I stop, because it does not aggravate my work, to document everything, I do not go .. . It should be documented what it takes.

QUESTION - Look, it's clear that you need to be documented, however, I understand, of all the objects that you have examined the house, some - you said - they only had the track lines and ridges were not significant and therefore we did not considered, one can say - from his experience - which, however, of these objects were of fingerprint impressions were not good but they can be identified and then you have not considered, but there were footprints, we can say that?

ANSWER - This ...

QUESTION - Of the bad impression, you can say?

ANSWER - Yes, if there are ... I have already said, I confirm what you're saying, but if there is ... To me, the track must be useful, I'll have to be able to work, but I can not work on the document.

QUESTION - Let me understand, then you've identified the tracks only ...

ANSWER - So I have not identified.

QUESTION - Wait, wait.

ANSWER - No, it is important. It's important.

QUESTION - You have exalted.

ANSWER - Well, it is important to differentiate between activities.

QUESTION - You have enhanced the traces useful, you may say - for us laymen - which means good profits and then find a track, and that does not have instead unleashed the other tracks that you have found, however, that you considered not good? I speak in simple, so that understand. It can be said?

ANSWER - Well, we return, we try to understand. Then we have pointed out the tracks and we've documented those who were worthy of making the next fingerprint verification, then the identification was done by the technician. So, I document only those tracks that I need for the subsequent investigation, but those tracks that do not serve me, that is partial, as there is not indefinite and the document does not describe because I do not need.

QUESTION - Thank you. Can I ask, then, if she has found traces partially unidentified in the house?

ANSWER - Yes In other objects.

QUESTION - How many?

ANSWER - And why I need to number them? I do not need, I need the

...

QUESTION - More or less, I can say because ...

ANSWER - No.

QUESTION - Do you remember how many you have found useful instead?

ANSWER - A lot. And then I showed many traces, and therefore those documented are those mentioned in the report.

QUESTION - So are they?

ANSWER - I mean the tracks that were there in the apartment, as there was no need to document, because they were not useful for the investigation and fingerprinting have not been mentioned ...

QUESTION - Do you remember for example the guitar? There were guitars in the apartment, you have done this test to determine whether there were fingerprints and if you have exalted purpose of what we just said?

ANSWER - Well, if an object were the fingerprint was documented, otherwise not.

QUESTION - The guitars.

ANSWER - The guitar, we have between all objects in the apartment there were all treated.

QUESTION - And then he remembers in particular the guitar thing, which gave a result?

ANSWER - The guitar, the guitar for me because it gave a negative result is not mentioned in the report. I remember that.

QUESTION - I understood. She looked at a guitar in Rome in the laboratories?

ANSWER - NO.

QUESTION - But the glass of the glass examined in Rome?

ANSWER - Then the glass beaker, was treated inside the apartment and was left there, inside the apartment. Later, in Rome I found two glasses with another report that was filed, a reminder that now .. . I have it somewhere if I remember correctly, here it is. Then I treated and I signed three reports. A report on a glass negative and, virtually, then I made another report, dated this 7/3 / '08, the glass beaker, and another report dated 28/5/2008 in which I was resubmitted to the hairdryer treatment, petroleum jelly, Vaseline container, MP3 player, the foundation, the pencil,

the pen . . .(Inc. for voice overlay.) . . .

QUESTION - (Inc. for overlapping of voice.)?

ANSWER - Where there are 5 tracks from that dattiloscopisti were found to be not useful. Now, the glass if the glass is pretty, if she wants to eventually link this glass cup to the sink or something, I do not know, I only know, a glass was treated with another report, and on that glass beaker there were fingerprints. The glass beaker that has been treated there in the apartment we were 3 footprints and was treated with the powder. In the laboratory, the glass beaker was treated by another technique, because in the meantime had spent time and then had to do a more thorough technique, most suitable for the type of . . .

QUESTION - But excuse me, was the same glass?

ANSWER - I do not know if it's the same glass, I was given a glass beaker, was given to me a glass that I treated, and in that case is negative. I do not know if she wants to connect, I do not know what does . . . inside the apartment was treated a glass beaker and 3 were identified fingerprints, then to me, in Rome, I got another glass beaker.

QUESTION - So it was different, is another beaker, remember him?

ANSWER - I assume it is another, I was handed a glass "treat it" and I treated it, where it was found in it this glass-glass, on which I have already answered, I do not know. It is not my problem.

PRESIDENT - Okay we get it.

ANSWER - For me, from a technical point of view I do not care, let's say I do not care where it is found in it an object, where an object is found in it as an opportunity, I'm interested to treat a technical point of view the exhibit, and document whether there are traces useful for further

investigation. So much so that many Sometimes the request comes to me: "number of criminal proceedings." Okay.

DEFENCE - AVV. DALLA VEDOVA - The choice of objects to be analyzed, as they were inside the house? It was his decision or the instructions were clear, and also the places she went into every room to make these analyzes?

ANSWER - So in this case, as is the choice? The choice is made during the site visit as saying that I am delegated to the activity of inspection, I am, is who decides which objects sopralluoghista repertare repertare and what not. It is the operator that assumes virtually no liability in the number of objects to repertare and treatments to be performed, based, practically, to courses, the professionalism, experience.

QUESTION - Yes, but for example when you arrive in front of the sink, there were glasses, knives, cutlery, dishes and how those who have chosen? Which of these objects you have chosen? Who told you and how?

ANSWER - We have chosen them, we have treated them all these objects.

QUESTION - Everyone, even all the cutlery?

ANSWER - All, everything that I see I have drawn. Where is the problem?

QUESTION - And there's some excitement of a footprint on a piece of cutlery that has been of interest to you? Or her about all the cutlery did not find anything?

ANSWER - But she has read the report I gave?

QUESTION - Yes I'm asking a question she did not ask questions.

PRESIDENT - I'm sorry, but here she answers questions, because the test is formed at this stage here, so we ...

ANSWER - I'm sorry but she asks me a question that already knows the answer.

PRESIDENT - I'm sorry, please excuse the proof is formed at this stage, although she has written, even if the party knows, even when the texts are examined have already heard several times, the parties, however, are the same texts submitted to further questions, because the test is formed at this stage before the Judge who will then decide what is and is what the witness says here. So for this demand, the parties may pose questions on which they have already received notice of the reply of the witness, the person being tested nevertheless the application should be placed equally, because the test forms, in fact, at this stage and, therefore, are not questions wearisome, useless but move in this situation, here, the case. Then, please.

ANSWER - There are no utensils, cutlery fingerprints on.

DEFENCE - AW.DALLA VEDOVA - And the clothes? Have you checked the clothes of Miss Knox in his room?

ANSWER - The dress is not a finding suitable for highlighting fingerprints.

QUESTION - Even the underwear? Panties? Bras?

ANSWER - Not at all.

QUESTION - Why?

ANSWER - Watch when I be able to highlight an impression of a dress I'll write a good book and will be a best seller.

PRESIDENT - So you can not show finger marks?

ANSWER - NO.

PRESIDENT - Please Lawyer.

DEFENCE - AVV. DALLA VEDOVA - Hear the latest thing, computers, She has got to do analysis on the computer?

PRESIDENT - With reference to the impressions clearly.

DEFENCE - AVV. DALLA VEDOVA - Of course, always certain about his competence.

ANSWER - Yes

QUESTION - And exactly when and where, how ... We remember ...

ANSWER - 11 computers has been treated there in the apartment during the course of the first inspection.

QUESTION - The computer, which means the computer? Do you remember?

ANSWER - All computers, all the laptops that ... all objects that I stumbled on hand were all treated. All without exception.

QUESTION - Do you remember how were the computers? This?

ANSWER - Look, I do many surveys and for convenience I remember only the findings on which I am going to document the traces, the others I just forget them because then I also have a private life, and therefore, the job I did not bring home.

PRESIDENT - I pray, there are other questions?

DEFENCE - AVV. DALLA VEDOVA - Yes, the question is, at this point, do you remember when someone on the computer she found valid impression of attention?

ANSWER - No computer.

QUESTION - Then on 4 computers, why is there be 4 of us are not - according to her - found no trace of an impression of people who have been examined, it was worth?

ANSWER - NO.

QUESTION - This I must necessarily continue, President, I realize it's late, but ...

PRESIDENT - No, no absolutely Lawyer.

DEFENCE - AVV. DALLA VEDOVA - Why ...

PRESIDENT - The answer he provided was useless to go st'esso on topic. Please, go on then.

DEFENCE - AVV. DALLA VEDOVA - Yes, but then you can say is that the computers were still depending on the quality of the prints that I understand, so they were not good enough to be considered useful for ... but that there were

fingerprints, we can say that?

ANSWER - But if an object is touched, I repeat, I never get tired of repeating it, and neither she nor even at any other professionals with whom I am speaking, if an object is touched it is normal ... The surface must be receptive, must be such that, practically, the trace remains. Then what happens, that if the surface is not smooth, though there are virtually knurls ...

PRESIDENT - I'm sorry, but the computer, the computer surface is a surface suitable to receive ...

DEFENCE - AVV. DALLA VEDOVA - For example, look at this area here if I do I have left an imprint in your opinion, or is likely to then say a bad impression.

PRESIDENT - I pray.

ANSWER - So maybe she has touched, she has touched in this case we see and many times, and surely she is convinced that he has left an imprint.

QUESTION - There we go.

ANSWER - No, she is convinced, and I say that to me she has treated as a technical point of view, she has left a biological, okay. Well. But this is the problem here, what she has left a trace organic does not mean that she is the one that left an impression, because if the pressure she put on her finger, which has left the imprint, is strong her when I go for treatment I would draw attention to a spot so I would draw attention to a contour which is traceable footprint but for me it is not useful as a trace.

QUESTION - I understood.

ANSWER - Why is devoid of papillary lines, the central figures of the minutiae that I need to do the fingerprint investigation. If I would draw attention to a spot in what I

need? I need to say, to prove they are been good. NO, I do not need me to tell me that you were good at highlighting the stain I need, I need to identify a track that could be useful for further investigation.

QUESTION - But I'm sorry .. .I seem to her a good track is something absolutely perfect is neither a stain nor is a ridge, or is a line (inc.), as said before, so I mean if I put my hand here, do you think the likelihood of these 5/10 my fingers have really left a mark, that after his exaltation is considered useful, as it is? According to her .. . From what I have ...

ANSWER - So maybe she leaves 10 fingers, okay?

QUESTION - Yes -

ANSWER - You might leave 10 fingers, I make the treatment I highlight 10 tracks, 10 tracks document any of the 10 tracks is perhaps useful for the investigation fingerprint because it is partially defined, maybe she did when he removed his fingers from the surface has a rotation and then ruined the design, ie it must be the pressure, the surface must be receptive, must be smooth, the pressure must be correct.

QUESTION - This has already said.

ANSWER - And then there is the moment of attack and the time of posting. If she at the time when she detaches the finger wheel slightly ruin the drawing, because said before, the ridge is soft, and then this is the reason why then ...

QUESTION - But then Mr. Francaviglia, you can leave the track with a flood of impressions but no earnings?

ANSWER - But she has no idea how many, how many reports of how many impressions we remark how many times over the years and maybe we are told that the fingerprint is not useful by dattiloscopisti. We, many times, we highlight hundreds of

footprints on the reports. We have attached photos of the very large and then the dattiloscopista tells us that perhaps only a few of them are useful, or even tell us that none of this is useful, then what is? Perhaps serves to show yes the object was touched, but the track is not one that is useful, we must also make savings.

QUESTION - So in conclusion, for example, speaking of Miss Knox you can tell that she has touched so many objects in his house but that does not ...

ANSWER - The Miss ...

QUESTION - But that did not leave a footprint in its purpose, so perfect, so good and so useful to be able to then be transmitted to the typist ... then do the exam, you can say that?

ANSWER - then Miss Knox lived in the house and, therefore, it is normal that surely his presence inside the house was a constant, continuous, however it is normal perhaps for reasons that I do not know, at that moment, perhaps the object she has touched and for some reason did not leave the track or the track was not good was not deserving of photographic documentation, and in that case and what I do? Also because if I would draw attention to a fragment and this fragment is not .. . Has characteristic 2 or 3 points from dattiloscopista is even considered for the comparison fingerprint.

QUESTION - That is clear. She's desk Knox has analyzed for this purpose? Do you remember if there were stains, tracks, lines, or fingerprints important?

ANSWER - All surfaces, I repeat, have been treated. All without exception.

QUESTION - And then?

ANSWER - And so if ...

QUESTION - Do you remember if there were still traces that had touched or ...

ANSWER - In the room of Amanda Knox has been highlighted, the counseling relationship.

PRESIDENT - I pray, is authorized course.

ANSWER - So Amanda Knox's room, which is the bedroom adjacent to the room of the victim, were identified fragments of 9 papillary impressions. Then the stamp marked with the number 74) was seen on the wing left the cabinet, the distinguished imprint, the 5 traces marked with the number 75 to 79, were observed on the wing right. 3 fragments of footprints, marked with the number from 80 to 82. 3 sidewall footprints were identified on the front of the radiator, just to reiterate that all objects, even the radiator that is attached to the wall, it is a treat, the windows, the windows were all treated. All objects, all surfaces suitable to highlight fingerprints.

DEFENCE - AVV. DALLA VEDOVA - Senta when she .. . a clarification, when she says, have been treated, she refers to a chemical treatment as explained?

ANSWER - So it is detected by chemical type and then with cyanoacrylate, in the victim's bedroom, the bathroom adjoining the bedroom and the room where the victim was found the stone.

QUESTION - And in the bathroom? The small one.

ANSWER - The bathroom next door to the bedroom, the small one was treated with cyanoacrylate esters. All of the remaining, all the remaining part of the apartment, and then also these three rooms mentioned were treated with the powders. Therefore, in this case, the treatment was double in the chamber of the victim, in the bath and into the chamber of the stone has been done before with esters

cyano-acrylic and then the contrast with the color powder, silver powder with the black, because the white , precisely, is contrasted to highlight, in fact, the papillary ridges.

QUESTION: - Perfect, thank you.Thanks, I'm done.

PRESIDENT - There are other questions.I pray the prosecutor, to exhaust the examination.

**PROSECUTOR - dr.Mignini**

QUESTION - How many points must coincide for identification?

ANSWER - I am not a dattiloscopista But from a standpoint of law 16/17 feature points are, in fact, established by case law to allow, in fact, the identification of a person, the match between an impression derived from the crime scene and an impression of a person suspected there must be matching these 16/17 feature points.For feature points includes break lines, various minutiae that dattiloscopista determines how the peculiarities of that design.

QUESTION - I have no further questions.

**COURT**

PRESIDENT - Excuse me, I just wanted to ask for a clarification because before responding to any questions she Advocate, he touched with a certain forces the exterior of the computer she said, in this manner does not necessarily leave a mark, you can leave a biological trace it?

ANSWER - Exactly.To say the biological trace exudate, however, is a biological trace of exudate interesting to me precisely the drawing, just the impression, so I ... For me the impression is latent, the latent fingerprint is defined unless it is apparent, the imprint is evident when there is ... precisely when a door, maybe you have your fingers

dirty with grease and ink and touches an object, in this case the footprint is evident, but if the finger is dry, the stamp is latent and must be treated with a technique, with one or more techniques according to the type of substrate.

PRESIDENT - I understand.

ANSWER - So the skill of the technician is to choose the technique or sequence of techniques appropriate to highlight the type of track.

PRESIDENT - Well, there are no other questions, the witness is dismissed. There are other texts and reference should be made at the hearing ... C 'is any acquisition, please.

PROSECUTOR - Dr. COMODI - Produrrei copy of the DVD of the second survey, viewed and commented on November 3 by Cantagalli and ... I do not remember the other, (inc.), and a copy of Sferon, that sequence of photographs.

PRESIDENT - Well.

DEFENCE - AVV. DALLA VEDOVA - Can I also ask for a clarification and authorization, only the clarification in relation to property owned by the Knox found inside the house apparently ... END AUDIO
